

DEPARTMENT OF LABOR & INDUSTRIES

Safety & Health Video

C A T A L O G

2002-2003

Welcome.

This catalog contains descriptions of all the safety and health videos currently available in our library. You will find videos listed by subject matter and also by title, with a brief description of what the video contains. All of our videos are available for loan to any employer or worker in the State of Washington. ***We do not loan videos outside of Washington State.***

The Safety and Health Video Library is operated by WISHA Training and Outreach; Division of the Washington State Department of Labor and Industries.

For the latest information and news from the
Safety & Health Video Library,
visit our webpage at: www.LNI.wa.gov/wisha

IMPORTANT MESSAGE

Some videos may contain code violations.

Many commercially produced safety and health videos are based on Federal OSHA Standards. Federal OSHA standards may not be as stringent as the Washington State Industrial Safety and Health Standards. Every effort has been made by the library to evaluate the videos before purchasing them. Safety and Health Standards may have changed since the time of purchase. ***The user assumes the responsibility of previewing the videos before showing and using it with a knowledgeable instructor.***

Our Safety and Health Video Library is the Largest in the Country

WISHA Training & Outreach Services, Washington Department of Labor and Industries operates the Safety and Health Video Library. (The acronym WISHA stands for Washington Industrial Safety and Health Act.) The Library's holdings include over 900 titles covering a wide variety of subjects from accident prevention to workplace violence reflecting the diversity of occupations in Washington. The collection is geared toward maintaining Washington's high standards in occupational safety and health with a mission to save lives and prevent injury or illness.

- Some videos may contain code violations. Many commercially produced safety and health videos based their contents on Federal OSHA Standards. Federal standards may not be as stringent as the Washington Industrial Safety and Health Act (WISHA) standards.
- The library staff has made every effort to evaluate the videos before purchasing them. However, safety and health standards may have changed since the time of purchase. Technical staff has reviewed in all videos to ensure compliance with Washington State Code and federal standards, with the exception of Safety Watch videos.

Last year over 157,000 Washingtonians viewed our training videos. Our most popular titles are reserved months in advance. We will always do our best to fill last-minute requests, but advance scheduling substantially increases your chances of getting what you want when you want it.

A Few Things to Remember

- Unless specifically noted in the catalog and on the materials themselves, all library materials are fully protected by copyright under Title 17 of the United States Code of Federal Regulations.
- **Unauthorized duplication of copyrighted materials will result in immediate cancellation of borrowing privileges.**
- In the collection are a number of public domain video programs produced by the Washington State Department of Labor and Industries, State of Oregon, and the US Federal Department of Labor. These may be duplicated. Videos that may be duplicated are clearly marked. Also a list of these titles appears in the next few pages. Otherwise, assume all videos are fully protected by the copyright law.
- **Videos are shipped only to locations within the State of Washington.**
- **There is no charge to borrow videos.** However, customers must pay return shipping charges for videos borrowed.
- **Borrowers are responsible for the full replacement costs of any lost or damaged videos including the shipping case.**
- **Library materials are available for loan only.** Vendor information is available upon request for those who wish to buy directly from the vendors.
- Admission fees, collections or donations may not be charged when Safety and Health Library videos are shown.

The video library reserves the right to cancel borrowing privileges if library procedures or policies are not followed.

A Few Quick Rules:

The 3 Strike Rule:

Videos must be returned on time. Three late returns will result in immediate and permanent cancellation of borrowing privileges. You must return videos by traceable carrier. Also, you must return phone call messages from us within two business days.

The 5 – 5 Rule:

You can borrow up to five videos for five days.

The 6 Month Rule:

You can schedule videos up to six months in advance.

The 10 Day Rule:

Please give us ten days notice before you want to show videos. The videos will arrive 1-2 business days before your show date.

The “Only You” Rule:

Videos are checked out only to you. Don't loan them out. All transactions must be made through the Safety & Health Video Library.

The Traceable Shipping Rule:

Your only cost is the return shipping by traceable carrier such as United Parcel Service, Airborne or Federal Express. Or if you prefer the US Postal Service, use Certified Mail only.

Special Instructions for Thurston County Residents

If you live in Thurston County you are required to pick up and return your videos to the Safety & Health Video Library in the L & I building, 7273 Linderson Way SW, Tumwater.

Directions: Via Interstate 5—Take exit 101 (Agricultural Way). Go East to Linderson Way (first stoplight). Turn left onto Linderson Way. L&I building is on the left. Parking is available in the visitors lot.

Borrowing a Video is Easy:

1. Become a borrower by filling out the “Library Agreement Form” in the back of this catalog. You only need to do this once. A borrower ID number will be issued to you. Write your borrower ID number in the box on the back of this catalog.
2. Select the videos and show dates.
3. Schedule your videos by phone, fax, or mail using the “Video Reservation Form”. (Make a copy of the form in the back of this catalog).

When you call, **please have your borrower identification number ready. Have a list of the videos you wish to show. Jot down their item number.** It is helpful to include alternate titles and dates in case your first choice is not available.

Return the Video to Us by Traceable Carrier

Many borrowers use *United Parcel Service, Federal Express*, or some other traceable carrier for return shipping. Others prefer the *U.S. Postal Service Certified Mail*. Whatever method used, it's imperative that it be **TRACEABLE. If the video is late you must overnight** it back to us, so that any future booking may be kept.

- Remove any UPS stickers and barcodes from our shipping container to assure the video reaches us rather than being returned to you.

Please fill in the statistics about your use

Department of Labor and Industries Agricultural Division 7273 Linderson Way SW Tumwater WA 98511 Telephone WA 509/31 1200 FAX 509/31 1201	Shipping address only DO NOT MAIL 100% POSTAGE GUARANTEED POSTAGE WILL BE PAID BY ADDRESSEE FIRST CLASS PERMIT NO. 1000 TUMWATER WA POST OFFICE BOX 1000 TUMWATER WA 98511	Reverse This Card to Return PLEASE ANSWER Name (last, first, middle) Address City, State, Zip Telephone () Fax ()
---	---	--

Your Video Program

Your Show Date

Your Borrower Number

Date Deadline for Return Shipping

We provide the return-shipping label. **Turn over the shipping card on the box and you will find our preprinted return address on the back.** It is important to fill out and return all shipping cards.

If you ordered more than one video, please fill out the statistics for each program.

See the next page for some important fine print.

The Fine Print

Be aware that the average cost of videos in our collection is \$500. If you or your shipper lose the video(s) you will be held responsible for their replacement cost. When shipping by UPS your package is automatically insured for \$100. Purchasing additional insurance is your responsibility, but not required.

If you choose to use the US POSTAL SERVICE, you must send by certified mail and use our PO BOX address: Department of Labor & Industries, Safety & Health Video Library, PO Box 44607, Olympia, WA 98504-4607.

The fourth-class, or media rate, is inappropriate for video returns, as are all other non-traceable means.

You will be charged for items not returned.

Also, please be sure to rewind all videos, and to place each one **correctly** in its proper case - videos can be easily damaged by being forced into cases backwards or upside-down. Protect videos from inclement weather during shipment.

Many employees of state agencies borrow videos from the Safety & Health Video Library. They, too, must use a traceable shipper to return videos. Thurston County residents must pick up and return videos in person.

We require you to **reserve videos at least ten days prior to your show date** to allow time for shipping to any city out of the greater Olympia area. For local requests allow at least two days for scheduling and one day for pick-up. Locally borrowed videos must be picked up and returned in person.

May I Duplicate Videos?

Unless you're absolutely certain that a particular program is not copyrighted, **assume that it's fully protected by copyright.** See the next column for a list of titles that can be duplicated.

Good News! Free Videos!

These are the only videos in our collection that may be duplicated. At this time we can offer to send these videos to you as a regular loan. You may make your own copies and return the original video to us. **Library collection videos are not shipped outside of Washington State.** For more information about each title please consult the Video Title Descriptions section of the catalog beginning on page 41.

Special Offer

Along with the commercially produced videos purchased by the Safety and Health Video Library, the library collection includes videos produced by L & I and Oregon OSHA which may be duplicated.

For your convenience we have grouped together certain titles and offer to duplicate them for you. Your only cost is sending blank videos as specified for each set. Please request videos by their titles.

Tape #1 Residential Construction Series (requires one T120 blank videotape)
Residential Construction - Siding Safety; English & Spanish version *La Seguridad En El Acabado De Tablas De Forro, Tambien Concido Como "Siding"*
Residential Construction - Roofing Safety- English & Spanish Version – *La Seguridad en el Techado*
Residential Construction – Framing Safety English & Spanish Version – *La Seguridad Durante la Armazón*

Tape #2 (requires one T 120 blank videotape)
Breathe Easy -English/Spanish
EPA Worker Protection Standard Rules-English/Spanish
Farming Safety: Getting down to Business
Governor's Safety and Health Conference

Tape #3 (requires one T 120 blank videotape)
Load and Lift-English/Spanish
Lockout Tagout (V0142)

Making Claims Work-English/Spanish
Ounce of Prevention-Module 1 & 2

Tape #4 (requires one T 120 blank videotape)
Prevention Is Proactive
Safety First-English/Spanish
Smart Lift
Staying a Step Ahead
Watch That Dog

Tape #6 (requires one T 120 blank videotape)
Working Smarter Not Harder -English/Spanish
Your Safety in the Fruit Packing Plant-English/Spanish
Residential Construction Series (includes roofing and framing) English/Spanish

Tape #7 Oregon OSHA 16 video set part 1 English version (requires one T-160 blank videotape)
Breathe Easy
Dairy Safety: Now More Than Ever
EPA Worker Protection Standard
Farming Safety
Hood River Tractor Safety Seminar
Load and Lift
Ounce of Prevention (module 1)

Tape #8 Oregon OSHA 16 video set part 2 (requires one T 120 blank videotape)
Ounce of Prevention (module 2)
Prevention Is Proactive part I-III
Prevention Is Proactive part IV
Safety First: Safety Is Important
Smart Lift
Tarp Smart
Watch That Dog
Working Smarter ... Not Harder

Alphabetical List of
Video Titles with Descriptions
of their Content*

Videos Listed by Title with Descriptions

A Bit About Backs (CC) V0881

One video with three programs: Back Basics - 12 minutes, Risk Factors - 12 minutes, and Prevention Strategies - 15 minutes. Format varies between stand up humor, lecture style, and humorous scenarios about Bob and his back pain. (Comprehensive Loss Management, Inc.) 41 min. Blueprints 2 c1993

ABC's Of Life V0072

Refresher program for those who have had CPR training. (Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min. c1988

Accident: What To Do (CC) V0550

"A. Sylvester Safety" investigates an accident inside a plant. Reviews the basic steps for investigating an accident effectively. (Coastal Video Communications Corp.) 14 min. c1992

Accident Investigation V0151

This program addresses: The accident; The accident process; The accident investigation; and Accident reporting. (Safetycare, Inc.) 12 min. c1991

Accident Investigation: The Big Picture V0807

Discusses fact gathering & information, evaluating accidents, and writing accident reports. (Coastal Video Communications Corp.) 17 min. c1999

Accident Reporting And Investigation V0634

Reviews procedures in documenting injury reports and investigations. Details the types of information to gather and include. (Long Island Productions) 5 min. Bite Videos c1990

Accidental Poisoning V0052

The causes, signs, and technique of care for the accidental poisoning are explained. Forms of poisoning are dramatically presented: *Drinking lethal fluid; *Pills; *Alcohol; and *Inhaling toxic fumes. (Journal Films) 12 min. c1980

Achieving A Drug-Free Workplace: What Every Employee Needs To Know V0705

Part 1: Yes, We've Already Met; Part 2: Sick Without The Fever; Part 3: The Top 10 Ways To Destroy Your Job; Part 4: This Is Not A Test; Part 5: Just the Facts, Ma'am. Ex-substance abusers and their co-workers share their story on creating a drug free workplace. (American Training Resources, Inc.) 29 min. c1997

Adult Learning V0715

Especially for companies who are striving to improve performance. Provides tips for success when teaching adults including the concept of "just in time training." (Coastal Video Communications Corp.) 14 min. Train the Trainer c1998

Adventures Of Ergoman: A Custodial Ergonomics Video V0812

The Custodian Quality Improvement Team, or CQIT, is a management-empowered team made up of custodians and supervisors. Safety Engineer Jack Tolley and Industrial Hygienist David Zalk were invited to work with CQIT to design a section on ergonomics. Slightly offbeat approach to ergonomic alternatives for performing custodial tasks. (A CQIT Production) 29 min. c199u

Aerial Lift Safety V0722

Complies with OSHA 29 CFR 1910.67 and ANSI A92.6. Covers safe work practices on platforms and pre-operation inspection. Lifts shown include platform, manlifts, vertical booms, scissor lifts, baskets, etc.

Filmed in chemical and manufacturing facilities, refineries and municipalities. (Summit Training Source, Inc.) 13 min. c1998

Aerial Work Platforms V0020

Gives employees an overview of the safety considerations required when using self-propelled aerial work platforms. Describes the specific steps that should be taken when preparing to use an aerial work platform. Explains what safety in transporting an aerial work platform. Describes safety when working from an elevated work platform and proper shutdown procedures. (Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min. c1996

Agricultural Tractor Safety V0111

Deals with the various uses and kinds of farm tractors and their attachments. Includes material on: •Avoiding tractor overturns; •Cab protection; •Pulling loads; •Hitching; •Power take-off shafts; and •Safe driving. (Purdue University) 21 min. c1976

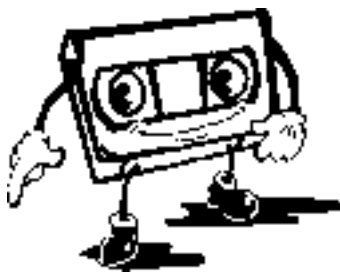

VIDEO TIP:

Remove the (UPS) shipping sticker on the back of the shipping box before shipping videos back to us.

So your videos come back to us and not back to you!

VIDEO TIP:

Remember the 5-5 Rule.

You may check out five videos for five days.

Air Monitoring:

The Purpose (CC) V0534

Representatives from management, safety, medical, and an industrial hygienist departments form the occupational hazard team and contribute to setting up operations in developing work practices and training procedures for employees to access potential hazards. Covers the following: contamination elimination procedures; Identifying potential exposure sources, and Implementing local exhaust ventilation operations. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series September 1996

Anatomy of an Accident (CC) V0910

Stresses safety awareness in the industrial workplace. Documents the choices made by a number of people that lead to an accident. Clearly shows that each person is responsible for identifying, reporting/fixing hazardous situations before a serious injury or accident occurs. (Aurora Pictures) 15 min. 1995

Anhydrous Ammonia V0449

This dramatic training program goes straight to the scene of actual emergencies, to teach vital life-saving lessons. Training includes

where anhydrous ammonia is found, describes its properties, caustic effects, and emergency procedures. (Media Resources Inc.) 27 min. (HAZCHEM Series #2) c1994

Anhydrous Ammonia V0491

Anhydrous ammonia plays a crucial role in making many necessities of life, but it can be toxic—even deadly. Covers basic facts about the chemical, while discussing personal protection and emergency response: How ammonia affects your body; Personal protective equipment; Avoiding personal exposure; Preventing release; and First aid. (Coastal Video Communications Corp.) 19 min. c1995

Anthrax:

What Every Clinician Should Know V0921

Discussion aired on TV 10-18-01 in context of bio-terrorism activities occurring in USA. Provides physicians, nurse clinicians and other licensed health care professionals with an clinical overview. Not for general audiences. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. (Center for Disease Control and Prevention) 100 min/ 2001

Anthrax Awareness (CC) V0923

Gives an overview of threat of anthrax being used as bio-terrorism. Focuses on Anthrax distribution through the mail system. Provides general measures to take in identifying or reacting to suspicious letters or packages. (Coastal Video Communications Corp.) 13 min. 2001

Apple Harvest Safety V0297

Covers the equipment used in harvesting apples. Details tractor/trailer and forklift operation, unloading bins, general orchard safety, proper lifting techniques and ladder safety. (Spanish version V0309) (University of Arizona, Agricultural Health Promotion System) 16 min. c1993

Arc Cutting And Gouging V0814

Covers: Shielded metal-arc cutting; Air carbon-arc cutting & gouging; Plasma arc cutting; and Safety rules. (Safetycare, Inc.) 14 min. c1989

Arc Welding V0210

This program shows safe welding techniques. Includes: Arc Welding Process, workshop, personal and equipment safety, striking the Arc, making a Weld Run, welding faults, and tack welding. Also covers a variety of welds including: Square Edge Butt Joint, Fillet Weld, Outside Corner joint, Lap Joint Weld, Single V-Butt; and The Weaving Technique. This program is for all operators as well as students. (Safetycare, Inc.) 23 min. Skills Education Series c1989

Arc Welding: Safety And Operations V0025

Describes the arc welder and emphasizing the need for safety procedures. Names the five types of electrodes and tells how to put the electrodes into the holder. Correct and faulty welds are shown. (AIMS Media) 13 min. c1970

As It Should Be Done: Workplace Precautions Against Bloodborne Pathogens V0143

Good overview of the intention of the BBP Standard. Does not contain information on Hepatitis C and requirements for use of safer sharps devices. Statistics on HBV, HIV and occupational infection need updating. Targeted primarily to health care workers and related professionals (National Technical Information Service) 24 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1992

Asbestos: Awareness Exposure (CC) V0612

Describes the use of asbestos in buildings and homes, health hazards of asbestos exposure, and precautionary measures such as respirators. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series February 1997

Asbestos:

Controlling The Hazard V0071

An overview of the asbestos hazard for employees with minimal exposure to asbestos. Instruction for removal and/or disposal of asbestos materials. Include protection measures, engineering controls and monitoring. (Comprehensive Loss Management, Inc.) 30 min. c1985

Asbestos Awareness V0127

Gives maintenance workers and other personnel a thorough knowledge of asbestos and the health effects associated with it. Covers: Forms and uses; Diseases; Federal agencies regulating asbestos use; OSHA limits, and abatement requirements for removing asbestos. (Industrial Training, Inc.) 21 min. c1988

Asbestos Awareness

[Also available on V0382] V0362

A look at the dangers of asbestos through the eyes of a woman whose father has contracted mesothelioma, a cancer directly linked to asbestos exposure. Compares friable and nonfriable products; explains the proper precautions and methods of containment, maintenance, and/or removal of both types of products. Discusses symptoms and results of mesothelioma as well as environments in which asbestos is a potential threat. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 5 Segment 4 c1994

Asbestos Awareness:

Are You At Risk? (CC) V0430

Defines asbestos. Covers five areas required by OSHA standards for asbestos awareness training: forms of asbestos; health effects; possible locations; recognizing damage and deterioration; and housekeeping requirements. (Coastal Video Communications Corp.) 23 min. c1994

Asbestos Awareness:

Controlling Exposure (CC) V0431

Coverage under the new OSHA standards is based on exposure levels determined either by atmospheric monitoring of fiber levels or

by the nature of any work operations that involve asbestos exposure. Covers: Basic concepts, protective measures, exposure control programs, and emergency clean-up. (Coastal Video Communications Corp.) 23 min. c1994

Atmosphere Supplying Respirators V0702

Explains proper use, care and maintenance of atmosphere-supplying respirators. Defines the terms: "Constant flow", "Demand", "Pressure demand", "Oxygen deficient atmosphere", "Service life" and "IDLH". Identifies situations that require use of atmosphere-supplied respirators. (Primedia Workplace Learning, Industrial Training Systems Corporation) 16 min. c1998

Attitude Awareness V0293

A new approach in helping all employees identify how their attitude affects their job performance. You will see how their attitude affects their behavior; how it contributes to an accident, and how, in the end, they recognize the responsibility they each hold for their own actions. (CoreMedia Training Solutions) 27 min. c1988

ATV Rider's Guide To Safety V0031

Designed to introduce the correct and safe use of all-terrain vehicles (ATVs) to both the novice and the experienced rider. Offers tips on operating on all terrain vehicles. (800-447-4700) (Specialty Vehicle Institute of America) 19 min. c1986

ATV Safety For Agricultural Operations V0490

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common safety rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards. (Visual Education Productions) 14 min. c1993

B. P. Oil Shipyard Safety V0729

Provides a broad overview of shipyard health and safety hazards so that shipyard personnel and ship crews can recognize and control them. Covers enclosed and confined space entry, fire prevention, health hazards and PPE, and emergency response procedures. (B.P. Oil Shipping Co., USA) 30 min. c199u

Back At Home V0065

This audio-visual demonstrates that the back is never on vacation. Shows common off-the-job lifting tasks to illustrate incorrect and correct lifting techniques. (Visucom Productions, Inc.) 20 min. c1987

Back In Demand V0091

Four principles combined with a sensible approach toward over-all fitness and stretching provide solid training in safe lifting and back injury prevention; Plan the move; Bend the knees; Keep the load close; and Avoid twisting. (CoreMedia Training Solutions) 16 min. c1989

Back Injury Prevention V0682

Explains how the back works so you will have the right information to make the right choices on how to lift anything safely. There is no magic formula, all you need is a good attitude about safety and are willing to think about safety every time you lift anything. If you will do that, it is difficult to have an injury. Covers: Mechanics of the back; What causes backaches - inflammations, injuries, and aging of the spinal disks; How the back works, including diagrams; The "lever principle" of lifting; and Lifting in the ideal situations. (Long Island Productions) 5 min. BITE Videos c1992

Back Injury Prevention [Also available on V0383] V0365

Discusses what each person can do to reduce the risk of back injury, showing the importance of stretching, maintaining good posture, strengthening back and stomach muscles, and lifting properly. Demonstrates simple yet effective stretching and strengthening exercises. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 1, no. 6 Segment 3 c1994

Back Injury Prevention For Construction Workers V0061

A back injury prevention and safety awareness video produced especially for the construction industry. Clearly identifies lifting hazards on the job and explains techniques for safe lifting of construction materials and equipment. (CoreMedia Training Solutions) 17 min. c1988

Back Protection: Defending Your Safety Zone (CC) V0694

Eight out of ten Americans will seek medical attention for a back problem sometime in their lives. That's a scary statistic! Compares the physical rigors workers may face on the job to the physical challenges of many professional athletes, always stressing the right techniques for back safety. Covers: Defending your safety zone; Safe lifting; Posture; Exercise; and Back injuries and prevention. At the end of the video is a short description on the use of back belts. (Coastal Video Communications Corp.) 22 min. c1997

Back Safety (CC) (non CC see: V0790) V0508

Back injuries can and often are very serious. Most result from cumulative stress to the back over time. Before lifting and moving objects, look for alternative ways to move the load. Think the task through from beginning to end before lifting and follow proper lifting procedures to reduce the risk of injury to the back. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series c1996

Back Safety (For CC version see: V0508) V0790

Back injuries can and often are very serious. Most result from cumulative stress to the back over time. Before lifting and moving objects, look for alternative ways to move the load. Think the task through from beginning to end before lifting and follow proper lifting procedures to reduce the risk of injury to the back. Suggested to

supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series c1996

Back Safety For Landscape, Maintenance & Custodial Workers V0765

An invaluable guide to the basic steps that landscape, maintenance, warehouse and custodial workers should follow in order to avoid back injuries. Covers: Body mechanics; Lifting; Pushing; Common injuries; and Back braces. NOTE: The Department of Labor and Industries does not support the use of some back braces. For more information call 360-902-5645. (Coastal Video Communications Corp.) 19 min. c1996

Back Your Back: Back & Muscle Injury Prevention V0146

A videotape program which explains the potential causes of back injuries, and discusses ways to prevent back pain. How to establish load capabilities and proper positioning are also discussed. Slides to Video format. (Department of Labor and Industries, State of Washington) 19 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

Backfire V0049

Covers correct lifting, carrying and general back health, while showing the consequences of a back injury. (Altschul Group Corporation) 15 min. c1983

Backhoe Safety V0152

Focusing on tractor-loader backhoes (rubber tired with a front loading bucket), this program puts the emphasis on safe operation techniques such as: Pre-inspection/start-up hazards; *Problems to look for and how to handle them; Safely loading and unloading trailers; Proper positioning of the backhoe; Digging techniques near underground and overhead utilities; and Safe work practices for crew personnel when working around a backhoe. (Zomar Productions, Ltd) 18 min. c1992

Basic First Aid V0153

Shows how to recognize the types of injuries that occur most frequently in workplace situations, and basic first aid techniques. Includes simple treatment for: shock; burns; eye injuries; simple and compound fractures; CPR; sprains; muscle pulls; lacerations; bleeding; and broken bones. Industrial work environment. (AIMS Media) 14 min. c1991

Basic First Aid [Also available on V0384] V0368

Various first aid treatments are demonstrated, emphasizing the need for careful assessment of the environmental dangers to the injured person and to the assisting person. Stresses the need to follow company policy and to know when to administer first aid and when to call for expert help. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 7 Segment 2 c1994

Beat The Heat: Preventing & Treating Heat Disorders (CC) V0551

Although heat stress sounds like a minor inconvenience, for those workers who must perform their jobs in the heat — reality is it can cause bodily illness or injury, worksite accidents and even death. Covers: Thermo-regulation of the body; Importance of replenishing fluids; and Prevention and treatment. (Coastal Video Communications Corp.) 17 min. c1995

Benzene, Toulene and Xylene V0552

Explains how aromatic hydrocarbons react with other substances and discusses the short and long term effects on exposure. Tells where aromatic hydrocarbons may be found, discusses principal properties, and outlines basic safety techniques for emergency action in the event of an uncontrolled release or fire. Includes actual footage of a tank truck accident involving toluene and xylene. (Media Resources Inc.) 28 min. (#7 Hazchem Series) c1996

Best Strategy: Personal Protective Equipment V0906

Stresses the responsibility of safety for using PPE. Covers head protection, hearing conservation, eye protection, respiratory protection, hand protection, fall protection and life jackets at the construction site. (Comprehensive Loss Management, Inc.) 11 min. Blueprints Select 1995

Bicycle Safety In Plants & Factories (CC) V0535

Bicyclists training for rules, warning gear for bikes, maintenance, and defensive attitude while biking. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1996

Blasting Alternative V0112

This Canadian produced video describes and demonstrates various safe ways to blast trees that would otherwise be a danger if it were attempted to cut them down in logging situations. (Workers' Compensation Board of British Columbia) 14 min. c1977

Blindfold Effect V0696

Over half of all collisions occur at intersections, while backing, or when following too closely. This interactive video features three unforgettable crashes. At pause points, viewers will identify the factors they feel contributed to each crash. Then, practical techniques are explained to help the prevention of these collisions. (Aurora Pictures) 20 min. c1997

Blink: And You Could Lose Your Hand V0667

A single blink - which lasts only one-tenth of a second - is all it takes for a worker who is in a hurry or taking short cuts to lose the use of a hand. This video recounts the story of Calvin, a mill worker who suffered a severe hand injury while operating a paper making machine. Topic included: The consequences of Calvin's injury; The effects of the injury on Calvin's family; Preventing accidents around nip points; and Always performing a job safely. (ERI Safety Videos) 18 min. c1997

Bloodborne Pathogens: Know the Risk (CC) V0637

Designed for general industry not healthcare. Explains bloodborne diseases, transmission, appropriate methods to recognize exposure hazards, suggested methods and practices to prevent or reduce exposure and their limitations, and explanation of the types PPE, and the proper use, removal, decontamination and disposal of PPE. (Coastal Video Communications Corp.) 20 min. c1997

Bloodborne Pathogens: Know The Risk! V0726

For industrial emergency responders, this trains for compliance with OSHA's Bloodborne Pathogens Standard. Designed for industrial emergency responders. Covers: Risk of exposure; The OSHA Standard (1910.1030); The Exposure Control Plan; Universal Precautions; and Recordkeeping requirements. (Coastal Video Communications Corp.) 20 min. Note: V0637 is a Closed Caption version of this video. c1997

Bloodborne Pathogens: Post Exposure Follow Up Part 3 of 3 (CC) V0899

In part 3 the X-Files-like drama, the carrier of bloodborne pathogens continues. (see BLOODBORNE PATHOGENS: WHAT ARE THEY? (V0417) and BLOODBORNE PATHOGENS: PROTECTING YOURSELF (V0426)). Throughout the story, this segment shows the processes such as evaluation and immunization which need to take place after a person has been exposed to bloodborne pathogens. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 2, no. 6 Segment 2 c1995

Bloodborne Pathogens: Post Exposure Follow Up Part 3 of 3 [also V0899 CC] V0466

In part 3 the X-Files-like drama, the carrier of bloodborne pathogens continues. (see BLOODBORNE PATHOGENS: WHAT ARE THEY? (V0417) and BLOODBORNE PATHOGENS: PROTECTING YOURSELF (V0426)). Throughout the story, this segment shows the processes such as evaluation and immunization which need to take place after a person has been exposed to bloodborne pathogens. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 2, no. 6 Segment 2 c1995

Bloodborne Pathogens: Protect Yourself V0304

AIDS and Hepatitis B pose enormous threats to employees today. This program is designed for workers in industrial environments. It will help protect your employees and insure that your facility is in compliance with OSHA's Bloodborne Pathogens Standard (1910.1030). Defines: HBV, HIV and AIDS, first aid precautions, decontamination procedures; and housekeeping. (Coastal Video Communications Corp.) 15 min. c1992

VIDEO TIP:

The borrower is financially responsible for any materials that are damaged or lost while checked out.

***Bloodborne Pathogens :
Protecting Yourself Part 2 of 3
[Also available on V0424]
V0426***

In the fashion of the X-Files, this segment continues the story of the mysterious carrier of bloodborne pathogens, begun in BLOODBORNE PATHOGENS: WHAT ARE THEY? (V0417). Stressing the importance of personal protective equipment and safe work practices, this story shows how to reduce risk of exposure to bloodborne pathogens. Continued by BLOODBORNE PATHOGENS : POST EXPOSURE FOLLOW UP (V0466) or (V0898 CC) (Primedia Workplace Learning, Safety Watch) 9 min. c1995

***Bloodborne Pathogens:
Questions and Answers V0833***

Covers the OSHA standard and addresses issues and concerns of employees involving potentially infected blood by implementing good housekeeping, safe work practices and warning signs and labels. Key Points: universal precautions; wear latex gloves; barrier device for CPR; wear goggles or face mask; stop the bleeding; and prevent exposure to blood. (American Training Resources, Inc.) 10 min. c1999

***Bloodborne Pathogens:
What Are They? Part 1 of 3
[Also available on V0413]
V0417***

In the fashion of the X-Files, this is first in a three part series which describes Hepatitis B and C, HIV, and syphilis viruses and the methods by which each virus is transmitted. Also identifies the symptoms of each virus in its various stages of development and its effects on the infected individual. Continued by BLOODBORNE PATHOGENS: PROTECTING YOURSELF (V0426) and BLOODBORNE PATHOGENS: POST EXPOSURE FOLLOW UP (V0466) or (V0899 CC) (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series Vol. 2, no. 2 Segment 4 c1995

***Bloodborne Pathogens:
What Would You Do? V0154***

A program developed to provide many training pieces for compliance with OSHA standard 29 CFR 1910.1030. Reviews general information about Bloodborne Pathogens and procedures for the Emergency Response Team to avoid exposure to the viruses. For General Industry and First Aid Responders. (CoreMedia Training Solutions) 21 min. c1992

***Bloodborne Pathogens:
Workplace Precautions
For Industry V0288***

Designed to inform employees of the "universal precautions" that have been established to prevent the transmission of bloodborne diseases. Gives a demonstration of how universal precautions should be applied during emergency and first aid procedures, clean-up of an accident site, janitorial activities, and waste disposal. Designed to help you comply with the training requirements of OSHA's Occupational Exposure to Bloodborne Pathogens Standard 29CFR1910.1030. (Primedia Workplace Learning, Industrial Training Systems Corporation) 19 min. c1992

***Bloodborne Pathogens Case
Histories (CC) V0492***

Concentrates on actual real-life scenarios. It is powerful training for both new and veteran employees in general industry. Does not include requirements for use of safer sharps devices and other engineering controls. Covers: Practicing Universal Precautions; Work practice control and PPE; Engineering controls; Housekeeping; and HBV vaccine. (Coastal Video Communications Corp.) 21 min. c1995

***Bloodborne Pathogens For First
Responders V0185***

Explains how exposure to bloodborne pathogens occurs, and that Hepatitis B (HBV) and the Human Immune-deficiency Virus (HIV) are two diseases that pose the greatest threat to employees. Covers: OSHA Standard; on BBP; content of employers

exposure control plan.; modes by which Bloodborne Pathogens are transmitted; precautionary measures to reduce exposure, and the proper use of personal protective equipment. (AIMS Media) 19 min c1992

***Bloodborne Pathogens For
Law Enforcement V0766***

Reviews the essential elements of exposure control: HBV; HIV; and AIDS; Infectious materials; Work controls; Housekeeping; and Personal Protective Equipment. (Coastal Video Communications Corp.) 21 min. c1998

***Bloodborne Pathogens In The
Workplace: Reducing The Risk
V0553***

Overview of Bloodborne pathogens exposure risks in general industry. Employers will want to refer to state and local regulations. Lacks requirements for use of safer sharps devices and other environmental controls. Covers Hepatitis B and HIV. (Safetycare, Inc.) 12 min. c1992

***Bloodborne Pathogens,
Part 1 of 2 (CC) V0546***

For general industry employees to learn the risk of exposure and prevent becoming infected by bloodborne pathogens. Describes symptoms of bloodborne pathogens, and awareness of tasks that may involve exposure to blood. (Part 2 - V0597) (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1996

***Bloodborne Pathogens,
Part 2 of 2 (CC) V0597***

Orientation, review and overview focusing on first aid response workers. The universal precautions set up behavior patterns that reduce exposure to infectious fluids. Infection Control Kits are designed to clean and dispose of bodily fluids and materials appropriately and should only be used by people trained in first-aid and in the use of the kit. Does not cover HCV or post exposure treatment interventions. (Part 1 V0546) (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Boomlifts in Construction

V0904

Covers lifting principles, walk around inspection points, controls, and what should be covered in training of specific boomlifts. (Coastal Video Communications Corp.) 10 min Hard Hat Safety Series 1996

Breathe Easy (English Version)

V0759

A training video covering respiratory protection for workers in nurseries. Shows how to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. (Department of Consumer Business & Services, Oregon OSHA, Oregon Assoc. of Nurserymen, Inc.) 19 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1994

Building Your Business...

In Washington State

(Open Captioned) V0517

Information about setting up a new business in Washington State. To hire workers, contractors or subcontractors there are certain legal requirements to meet. Covers: Business Application; Maintaining records, quarterly reports, and workers' compensation premium payments; Written accident prevention program, Review of minimum wage, overtime and child labor laws, Assistance from your local L & I service center, and bonding and insurance, contractor registration form and meeting prevailing wage requirements for public works projects. (Department of Labor and Industries, State of Washington) 12 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1996

Carga y elevación: Una Guía para la Seguridad en la Elevadora de Horquilla Agrícola (Load & Lift: A Guide To Agricultural Lift Truck Safety)

V0741

Covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre inspection, inspection logs, and

fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. (Department of Consumer Business & Services, Oregon OSHA, Oregon Dairy Farmers Association, Oregon Association of Nurserymen, Inc.) 21min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1996

Caution Lockout For Life!

V0493

Perhaps the most effective way to motivate employees to follow proper procedures is by showing them an actual accident—what went wrong and how that tragedy could have been avoided. Details correct procedures for locking and tagging all energy sources and demonstrates why following the rules can be a life-and-death matter. Covers: Dramatic reenactments of actual incidents; Hazards of uncontrolled energy; Equipment shutdown & isolation; and Review of procedures. (Coastal Video Communications Corp.) 20 min. c1992

Cave-In Response V0199

Knowing how to safely respond when a cave-in occurs can be the difference between life and death, especially for the rescuers. Designed for both people on the site and rescue personnel. Examines the basic considerations involved in responding safely to a cave-in emergency. (Zomar Productions, Ltd) 24 min. c1990

Cave-In! Trenching & Shoring Safety V0434

Details proper trenching procedures. Covers: evaluating an excavation site; effective worker protection systems; general safety practices; and emergency response. (Coastal Video Communications Corp.) 18 min. c1994

Chainsaw Maintenance And Safety V0217

This video includes components of the chainsaw; selection and sharpening; and maintenance functions of sharpening,

depth gauge, guide bar, chain assembly and tension. Personal and operational safety training is also covered. (Safetycare, Inc.) 16 min. c1993

Chainsaw Safety V0176

A two part video on the safe use of chainsaws in sawmills. Discusses tips to safe chainsaw use in: saw selection, inspection, operations and hazards and PPE. Part 2 covers: hazardous environments in sawmills; log decks, edgers, conveyors and sorters. (Workers' Compensation Board of British Columbia) 20 min. c1993

Charlie Answers the Tough Questions V0836

"What would have made you wear your safety equipment?" and "what do you think of firing someone for a safety violation?" These are just two of the provocative questions Charlie Morecraft answers in this compelling video. Charlie's attitude and behavior, before, and after his accident, motivate employees to act more responsibly. (Long Island Productions) 23 min. c1997

Charlie Morecraft Story V0324

A compelling true story. Charlie Morecraft almost died in an industrial fire accident. There were times when he wished he had. He tells his story in 20 minutes—it seems like only 10. Charlie explains that—regardless what your job may be—you can't afford an accident, your family can't afford an accident, and your company can't afford an accident. "So now—whenever you do a job—step back, take a look at it and if it isn't safe,—don't do it." (Media Resources Inc.) 20 min. c1989

Chemical Emergency Preparedness & Procedures V0613

Describes chemical spill emergencies and procedures including reporting the incident, location of spill control equipment and first aid, MSDS, and cleanup. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1997

Chemical Handling: Corrosives V0605

Developed to familiarize employees with the types of corrosives handled in their workplace. Corrosives are widely used in many kinds of work and require special care in handling, storage, and disposal. Explains what corrosives are, the hazards they can present, and ways to handle them safely. It is important to know the corrosives in your workplace so you can identify the symptoms of exposure and react properly to an emergency. Covers: Solid, liquid and gaseous irritants; Labeling/MSDSs; and PPE/ventilation. (Coastal Video Communications Corp.) 12 min. c1992

VIDEO TIP:

*Please return
videos by a traceable
shipping service.*

Chemical Handling: Flammables V0606

Developed to familiarize employees with the types of flammables in their workplace. Helps to recognize flammable hazards that can occur and ways to eliminate them and to identify warning labels associated with flammable materials. Covers: Flammables and combustibles; Labeling/MSDSs; Ignition; Storage; Handling; and Emergency response. (Coastal Video Communications Corp.) 14 min. c1996

Chemical Handling: General Principles V0611

An in-depth and easy-to-use training program on identifying and using safe work practices for handling hazardous chemicals. Covers: Safety procedures; Flammables, corrosives, and solvents. This video can be used to help satisfy training requirements of the Hazard Communication Standard. (Coastal Video Communications Corp.) 16 min. c1996

Chemical Handling: Solvents V0607

Developed to familiarize employees with the types of solvents handled in their workplace. Solvents are an indispensable part of almost any job that involves cleaning, mixing, removing, or processing materials. Because they are so useful, they are even commonplace in the home and office. Used properly solvents make jobs easier. If solvents are misused or handled improperly, they can be dangerous, causing not only physical damage but injury and illness. Covers: How to store and handle them safely; How to treat emergencies; Labeling/MSDSs; and PPE/Ventilation. (Coastal Video Communications Corp.) 12 min. c1996

Chemical Hazard Communication: Your Right To Know V0040

Divided into three parts, this video covers: Part 1: (8 min.) Right-to-Know. Discusses Chemical Hazard Communication Programs, MSDS, and labeling. Part 2: (12 min.) Material Safety Data Sheets. Part 3: (18 min.) Hazardous Materials Identification System. (Dept of Social and Health Services & the Dept of Corrections) 38 min. c1986

Chemical Hygiene Plan: Laboratory Standard Training (3 Parts) V0136

THE CHEMICAL HYGIENE STANDARD: WHAT IT MEANS TO YOU [Module One] gives employees who work in and around the laboratory a plain language overview of the new Standard. (11 min.) . CHEMICAL HYGIENE IN THE LABORATORY: KEEPING YOU SAFE AND HEALTHY [Module Two] for employees working in labs and handling chemicals. (22 min.) CHEMICAL HYGIENE PLANS: PUTTING IT ALL TOGETHER [Module Three] is for managers and supervisors who must develop and administer the Chemical Hygiene Plan required by the Standard. Offers a template to simplify the process of setting up the Plan. 17 min. (Tracom) 50 min. c1990

Chemical Hygiene Plan : Laboratory Standard Training (3 Parts) V0136

THE CHEMICAL HYGIENE STANDARD : WHAT IT MEANS TO YOU [Module One] gives all employees who work in and around the laboratory a plain language overview of the new Standard. (11 min.) . CHEMICAL HYGIENE IN THE LABORATORY : KEEPING YOU SAFE AND HEALTHY [Module Two] for employees working in labs and handling chemicals. (22 min.) . CHEMICAL HYGIENE PLANS : PUTTING IT ALL TOGETHER [Module Three] is for managers and supervisors who must develop and administer the Chemical Hygiene Plan required by the Standard. Offers a template to simplify the process of setting up the Plan. 17 min. (Tracom) 50 min. c1990

Chemical Safety V0247

Excellent refresher course for "Chemical Right to Know" training. Demonstrates the use of Material Safety Data Sheets and other forms of recordkeeping. (Industrial Training, Inc.) 21 min. c1990

Chemical Safety: Hazard Communication V0081

Refresher course for "Chemical Right to Know" training. Material Safety Data Sheets and other forms of recordkeeping. (Industrial Training, Inc.) 21 min. c1988

Chlorine V0554

Covers the hazards of chlorine and response tactics for discharges and fires. Shows that chlorine is a powerful irritant which reacts with body moisture to form hydrochloric acid - a corrosive which can harm eyes, damage lungs, and be fatal. Shows the priorities for emergency responders when fire threatens chlorine containers. (Media Resources Inc.) 25 min. (#4 Hazchem Series) c1989

Chlorine:

Treat With Respect V0727

Outlines the health hazards associated with chlorine and tells how to prevent exposure. Covers proper response to chlorine emergencies, storage and handling.

transportation, spills, leaks, fires, and explosion hazards. (Coastal Video Communications Corp.) 26 min. c1996

Choosing The Correct Respirator V0547

When the air you are breathing does not contain enough oxygen or when it contains too much of any harmful substance you are putting our respiratory system and yourself at risk. Most lung and bodily damage can be prevented by using the right kind of air purifying respirator. Know the respiratory hazards in your work environment and what equipment to wear to protect your level of exposure. The ultimate responsibility for proper respirator use lies with you. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1996

Climbing Poles Safely V0329

This program explains: Hitch-Hiking" and "Free Hand" climbing methods; Electrical Hazards while climbing and working on poles; Inspecting poles and equipment; and the importance of your "Safety Attitude." (ERI Safety Videos) 14 min. c1992

Close Calls:

The Wake Up Call V0555

Shows how to recognize close calls and "wake up" to the dangers they represent. Emphasizes attitude, awareness and personal responsibility. (Aurora Pictures) 14 min. c1995

Coaching Safe Behavior, Part One (CC) V0542

Reviews safety strategies that should be considered on-the-job. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series October 1996 c1996

Coaching Safe Behavior, Part Two (CC) V0548

Your attitude can have a positive or negative affect on the job and the people with whom you work. Positive attitudes benefit everyone. Negative attitudes will harm everyone. Be

informed of the hazards of the job and the precautions to be followed. It is important to ask safety questions regarding one's job. Awareness of your own actions and others will lead to correcting unsafe practices. Being proud of a safe workplace; reporting dangerous activities or situations is a sign of that pride. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Code Blue: A Chance For Life V0054

Shows and explains Red Cross approved techniques. Through a series of vignettes shows how to perform CPR on both adults and children. Both single and two person methods are shown. Included is footage showing various accident victims (dummies) and the proper steps to take as a first aid responder. (Capital Communications) 20 min. c1986

Cold Stress

[Also available on V0403] V0406

Offers many tips for avoiding cold stress, recognizing symptoms of cold stress, and recovering from cold stress. Also includes tips for making the right clothing choices for protection against cold, wet, or windy conditions. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 1, no. 12 Segment 3 c1995

Color Of Danger V0053

Uses stop-action and coloring book techniques to give forklift operators a solid indoctrination on safe practices and the consequences of not looking for possible danger. Shows the dangers of poor forklift operation in various industrial settings, including docks, sawmills and warehouses. (Barr Films) [No longer being sold] 16 min. c1968

Combating Stress (CC) V0506

Not all stress is bad, yet too much stress can lead to health and job performance difficulties. Follow the tips provided in this video for maintaining a healthy balance. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1996

Combination Vehicles And Endorsements V0556

Practical for new and seasoned drivers. Covers: Double and triple trailers; Passenger vehicles and buses; and Tank vehicles. (Coastal Video Communications Corp.) 28 min. c1990

Commercial Grain Handling: Safeguards To Success V0308

Focuses on safety and health in commercial grain handling facilities. Intended audience is management, staff and employees of commercial grain handling operations. (Department of Agricultural Communications, Oklahoma State University) 16 min. c1992

Common Sense In Crane Safety V0086

Dramatizes five important aspects of crane safety: Inspection and maintenance; Moving with care; Machine set up; Communication signals; and Securing your equipment. (Grove Worldwide Company) 11 min. c1981

Common Toxicology Terms Of An MSDS V0601

The study of how different materials affect the human body is known as toxicology. Understand the materials you are working with, and never use any materials until you are certain of its identify and the related hazards and appropriate precautions. Beware of all available information, read warning labels and data sheets. Safeguard your health by using protective equipment and following good hygiene procedures. It is your best defense. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1997

Communication:

Barriers And Pathways V0017

A comprehensive look at communication barriers. This video teaches how to open pathways to communication. Offers suggestions for overcoming barriers rather than just identifying them. (AIMS Media) 16 min. c1979

Competent Person & Soils Testing V0155

Opens with an OSHA inspector showing up at a job site. Defines the role and responsibilities of the "competent person"; Simple explanations of the new soil classifications system; Field tests for determining soil types, including a pocket penetrometer; and Preparing for an OSHA inspection. (Zomar Productions, Ltd) 27 min. c1992

Complete Line Of Footwear (CC) V0513

OSHA requires the use of safety footwear when working in and around hazards. Examines appropriate types of work shoe based on the job and hazards; and should provide balance and support while protecting feet from impact and compression related injuries. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series May 1996 c1996

Compressed Gas Cylinders [Also available on V0403] V0407

Demonstrates techniques for proper handling, storing, and transporting compressed gas cylinders. Also covers tips on cylinder labels, consequences of a cylinder mishandled or knocked over, and some injuries when working incorrectly with cylinders. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 12 Segment 4 c1995

Compressed Gases: Safe Handling (Closed Captioned) (For non Closed Captioned version see: V0494) V0800

Outlines the types of compressed gasses, proper storage and handling procedures, and safety precautions. Discusses the hazards of flammable, non-flammable, oxidizers and toxic gasses. (Coastal Video Communications Corp.) 18 min. c1995

Compressed Gases Safe Handling (For Closed Captioned version see: V0800) V0494

Outlines the types of compressed gasses, proper storage and handling procedures, and safety precautions. Discusses the hazards of flammable, non-flammable, oxidizers and toxic gasses. (Coastal Video Communications Corp.) 18 min. c1995

Confined Space: Air Monitoring [Also available on V0469] V0473

It is important to mitigate continuous air monitoring practices when working in confined spaces. Discusses how a confined space becomes oxygen deficient and which types of monitoring equipment is recommended for permit-required confined space monitoring and what is the difference between a local exhaust ventilation system and a general ventilation system. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 7 Segment 4 c1995

Confined Space: Non-Entry Rescue (CC) V0640

Reviews the dangers of confined spaces, responsibilities of the attendant and how to get someone out without endangering yourself. Also covers the written permit, getting yourself out, and the retrieval system. (Coastal Video Communications Corp.) 21 min. c1993

Confined Space: Using Chemicals [Also available on V0413] V0415

Describes the dangers of chemicals in confined spaces and the steps to take before entering any confined space. Discusses the monitoring entry procedures, ventilation, and types of respirators or other personal protection. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 2, no. 2 Segment 2 c1995

Confined Space Atmospheric Testing (CC) V0638

Reviews how and when to test, and also what to do when air is unsafe. There are three main tests that will identify the atmospheric hazards of a confined space: Oxygen content; Flammability; and Toxicity. Covers procedures for proper pre-testing; (Coastal Video Communications Corp.) 17 min. c1993

Confined Space Case Histories V0495

Perhaps the most effective way to motivate employees to follow proper procedures is by showing them an actual accident—what went wrong and how that tragedy could have been avoided. Concentrates on actual real-life scenarios. It is powerful training for both new and veteran employees. Covers: •Atmospheric testing; •Adequate ventilation; and •Controlling contaminants. (Coastal Video Communications Corp.) 14 min. c1995

Confined Space Entry: (Final Rule) V0190

Describes confined spaces and their hazards. With an explanation of the requirements of the OSHA Permit required Confined Spaces Standard. Followed by a step-by-step description of a typical permit space job. The program is intended for laborers, maintenance technicians, and others who must enter confined spaces to perform inspection, maintenance, or other work. (Primedia Workplace Learning, NUS Training Corporation) 18 min. c1993

Confined Space Entry: Inside Maneuvers V0639

For employees who work in confined spaces like tanks; vaults; vessels, silos; pits; hoppers, pipe lines, or storage bins. Identifies characteristics in space hazard and covers atmospheric testing and other hazard controls, confined space permit, PPE, communication, rescue equipment, team responsibilities and contractors. Filmed on the USS Atlanta submarine. (Coastal Video Communications Corp.) 25 min. c1997

Confined Space Hotwork: Checklist To Safety V0698

Working in a confined space is tricky. However, when hotwork is added, the risk becomes greater. Hotwork is any work that produces a possible source of ignition, such as electrical arks, high temperatures, flames or sparks. Ensure that your workers know the proper precautions required for confined space hotwork. Covers: The hotwork permit; Fire watch; and Emergency rescue. (Coastal Video Communications Corp.) 20 min. c1993

Confined Space Rescue V0188

A two-part program that covers procedures and techniques for the proper rescue of persons within a confined space. Part 1: Covers rescue equipment, PPE, rescue techniques, and hazards associated with confined spaces. Part 2: Technical rescue techniques, mechanical and engineering controls, and rescue systems. CC version V0728. (Visionquest Films) 34 min. c1993

Confined Space Rescue (CC) V0728

A two-part program that covers procedures and techniques for the proper rescue of persons within a confined space. Part 1: Covers rescue equipment, PPE, rescue techniques, and hazards associated with confined spaces. Part 2: Technical rescue techniques, mechanical and engineering controls, and rescue systems. (Coastal Video Communications Corp.) 31 min.
Note: V0188 is the same video, but not Closed Captioned. c1993

Confined Space Safety V0189

Training intended for workers, contractors, supervisors and work monitors. Highlights are: Work monitoring a work-site inspection; Environmental containment testing and ventilation; Pre-entry atmospheric testing; Avoiding toxic gas and fire hazards; Emergency rescue; and Monitoring for heat stress. (Visionquest Films) 21 min. c1993

VIDEO TIP:

*You can view
this catalog at:
www.Lni.wa.gov/wisha*

Confined Space Safety Part 1: Confined Space Entry (Revised Version) V0192

Types of confined spaces and the importance of control measures are discussed in detail. Protective equipment and rescue techniques are demonstrated. 25 min 1993

Confined Space Safety Part 2: Testing Confined Spaces (Revised Version) V0193

Addresses a variety of methods for testing confined spaces. Gas detector tubes and electronic gas detectors are fully explained and demonstrated. The dangers of flammable gases and the proper ways to detect them are discussed. (Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min. c1993

Confined Space Safety Part 3: Working Inside Confined Spaces (Revised Version) V0194

Concentrates on safe work practices when working in confined spaces. Demonstrates ways avoidance of common hazards such as falls, noise, and temperature extremes. Purging, ventilation and PPE are covered. (Primedia Workplace Learning, Tel-A-Train, Inc.) 22 min. c1993

Confined Space Safety (CC) V0837

Defines confined space and hazardous atmospheres. Describes confined space entry permit. Examples of confined spaces include tanks, vessels, vats, ducts, storage bins, containers, tunnels, wells, pipes, sewers, mills, crushers, boilers, and trenches. (Safetycare, Inc.) 13 min. c1999

Confined Space Ventilation (CC) V0641

Special safety precautions required for confined space ventilation is reviewed in this video program. Illustrates how and when to ventilate, safety precautions, atmospheric hazard ventilations trouble shooting, and ventilation techniques. (Coastal Video Communications Corp.) 15 min. c1993

Confined Spaces: Your Training [Also available on V0396] V0395

Permit-required confined spaces can contain many dangers. Before entry, everyone involved should sign the work permit. Workers must receive training before doing confined space work and demonstrate skill and understand of the hazards and duties of the job. Each confined space is different, so review written plans before entering. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 10 Segment 4 c1995

Confined Spaces Deadly Spaces V0177

Explores some of the safety hazards of working in sewers, pipes, wet wells, manholes and other enclosed spaces and provides important safety guidelines for workplace preparation and testing. Presented in the style of a news documentary, this program illustrates health and safety hazards of confined spaces in underground operations. (Workers' Compensation Board of British Columbia) 13 min. c1993

Conflict Resolution [Also available on V0451] V0452

Produced in the style of "Home Improvement". Shows several ways to resolve differences of viewpoint, including strategies of compromise, accommodation, collaboration, avoidance and competition and suggests the circumstances under which each strategy may be most effective. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 5 Segment 1 c1995

Construcción Residencial: Seguridad en el Armaçon (Residential Construction: Framing Safety) V0851

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Keys points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials & web version available at: www.LNI.wa.gov/wisha/videos (Department of Labor and Industries, State of Washington) 13 min. Residential Construction Series. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c2000

Containers And Confined Spaces V0079

Recognizes hazards in various work situations. Demonstrates precautions and protective devices to safeguard the welder. Discusses the potential dangers encountered in welding on containers and in confined spaces. (Beacon Films) 11 min. Welding Safety Series c1986

Contingency Training [Also available on V0412] V0408

Part of each employee's job training is anticipating what can go wrong so that contingency plans can be ready to put into action. By asking about work processes, new employees can more quickly gain the level of expertise which experienced employees have already obtained. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 2, no. 1 Segment 1 c1995

Contractor Safety: Building A Partnership V0200

Provides a step-by-step process designed to open lines of communication between facility owner's employees and contractors and to develop a mutually supportive approach to safety. Based on OSHA's regulation for Process Safety Management of Highly Hazardous Chemicals, techniques can be applied successfully to a wide range of jobs where contractors are used. (CoreMedia Training Solutions) 23 min. c1992

Controlling High Blood Pressure (CC) V0616

Describes in a drama the ways to reduce the risk of high blood pressure, reduce stress, exercise options and choosing a healthier lifestyle. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1997

Controlling The Vehicle V0211

Explores what the driver can and can not control, and explains how the "Natural Laws" of Friction, Energy of Motion, and Force of Impact affect driving. Teaches people how to stop safely in inclement weather and other situations.

(Visucom Productions, Inc.) 13 min. It's No Accident Series c1992

CPR: A Training Tape: Family And Community Version V0223

Covers assessments, one rescuer CPR and obstructed airway for the adult (Heimlich Maneuver). This part of the program is 18 minutes. A nine minute pediatric segment (infant and child CPR and obstructed airway) is also included. Also a short segment on who to call for help and prudent heart living. (Kinetic Inc.) 27 min. c1993

CPR: A Training Tape: Professional Version V0225

Covers all aspects of Basic Life Saving including airway adjuncts, barrier devices and disease transmission during training. (Kinetic Inc.) 34 min. c1993

VIDEO TIP:

Training booklets provided must be returned.

CPR: A Training Tape: Renewal Version V0227

This renewal (re-certification) tape was developed to highlight the new changes within the context of reviewing all the major skills of the Basic Life Saving training and introduce the new standards. (Kinetic Inc.) 15 min. c1993

Crane And Sling Safety: The Inspection And Safe Use Of Cranes And Slings V0201

A training program on the inspection and safe use of overhead and jib boom cranes and slings with two objectives: to teach crane operators the daily inspection of the equipment, and demonstrate safe lifting procedures. Targeted primarily at the operators, but also to mechanics and engineers. (CoreMedia Training Solutions) 19 min. c1992

Crane Operation Safety (CC) V0598

Covers the two primary types of cranes, overhead cranes and booms. Rigging practices and equipment, communication signals, environmental conditions and maintenance practices. Includes operator qualification, crane operation, pre-lift check, rigging and general guidelines for sling maintenance. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Crane Safety V0914

Training in three parts. Part 1: Description of crane types, safety precautions & procedures. Part 2: Procedures to perform before proceeding with and during a lift. Part 3: Necessary shutdown procedures. (Shipbuilders Council of America) 38 min. 2001

Crane Safety: Inspections V0245

Differentiates between a pre-use and periodic inspection and explains how both types of inspections are made and documented. This program is intended for both new and experienced employees. After completing this program you will be able to: Demonstrate and explain how to conduct and document a pre-use inspection of a crane; and Differentiate between a pre-use inspection and a periodic inspection. (Primedia Workplace Learning, NUS Training Corporation) 14 min. c1993

Creating The Safety Plan, Part One (CC) V0521

Sam Diamond and Lauren McCall discuss why worker involvement in a safety plan leads to a willingness to follow program guidelines and regulations...buying into the plan. For every accident there are hundreds of near misses. Design programs around appropriate Action-motivator, Behavior, and Consequences (ABC). For improved safety in a facility, the behavior of the people must change. A good safety program empowers people and provides a way for everyone to communicate and contribute to the safety plan. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. c1996

Creating The Safety Plan, Part Two (CC) V0526

Sam Diamond and Lauren McCall continue their discussion on effective safety programs. These safety programs get everyone involved in the safety process, identify problems, and produce solutions to problems. There are three essential areas to a safety plan; they include: conducting successful safety meetings, observing employee work behaviors, and developing a functional safety

committee. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1996

CTD Prevention for Employees (CC) [Formerly: Cumulative Trauma: Reducing The Risk] V0131

Helps employees to understand cumulative trauma disorders, their causes and, most importantly, how to prevent the injury from occurring. Discusses the elements of good job design, proper body mechanics and the importance of physical fitness. (Comprehensive Loss Management, Inc.) 16 min. c1990

Custodial Staff Safety (CC) V0543

Proper basic safety procedures such as lifting, and when working with chemical-biological hazard for custodial staff. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1996

Cutting Torch Safety V0664

Ensure your employees know about the many hazards associated with this tool. Covers: Safe cutting locations and ventilation concerns; Confined space and compressed gas cylinders; Personal Protective Equipment; Fire prevention and safety tips; and Know your equipment: parts, threading of attachments, inspection, and use. (Long Island Productions) 10 min. c1995

Dairy Safety: It's No Accident V0375

A comprehensive look at the problem areas inherent in a dairy operation, with safety recommendations throughout. The first section - "Handling Cattle Safety" explores the behavior of cattle in the dairy farm environment. You will learn the proper methods to deal with: Handling Dams and Calves Safely; Artificial Insemination Safety; Handling Bulls Safely; and Milking Parlor Safety. In the second section "General Farm Safety" you will see a variety of related topics: Hazardous Chemicals Safety; Feeding

Livestock Safety; Moving Equipment Safely; Physical Facility Safety; Communicable Disease Safety; and Manure Pits and Vertical Silos. (Visual Education Productions) 26 min. c1991

Dairy Safety: Now, More Than Ever V0739

Developed to assist employers and employees in the dairy industry to become more aware of occupational hazards on dairy farms. Go on a dairy farm inspection with an Oregon OSHA inspector to learn what a safe farm looks like, experience an inspection, see most common safety and health problems including the ten most cited violations for 1991, solutions to fix the problems and the consequences of not fixing. (Department of Consumer Business & Services, Oregon OSHA, Oregon Dairy Farmers Association, Oregon Dairy Products Commission) 18 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1999

Danger Within: A Confined Space Entry Training Program V0118

This program instructs employees in safe confined space procedures and meets OSHA's new standard. Six basic steps to safe confined space entry are explained: Recognition; Preparation; Testing; Safeguards; Safety Observer's Role; and Entry Permit. (CoreMedia Training Solutions) 20 min. c1989

Danger Zone V0267

Stresses the importance of hazard assessment and proper selection of personal protective equipment to prevent injury. Demonstrates proper use and care of Hard Hats, Safety Glasses, Goggles, Respirators, Hazardous Materials Clothing, Gloves, and Shoes. Convincing statistics and motivational sequences encourage workers to always wear the right protection for the hazards they face. (Summit Training Source, Inc.) 13 min. c1990

**(CC) Means
Closed Captioned**

***Dangers Of Carbon Monoxide
V0337***

Teaches employees the nature of carbon monoxide (CO), and the extent of the health and safety hazards associated with it. Identifies the symptoms and levels of carbon monoxide poisoning; explains the special hazards of CO and safe practices for CO usage. Covers exposure control methods, and what first aid should be administered to a CO exposure victim. (ERI Safety Videos) 14 min. c1990

Deadly Dust II V0220

Discusses the hazards that are possible in the grain industries that have "Deadly Dust" potential. Identifies the seven events needed at a precise time to cause a grain dust explosion: Oxygen; Fuel Source (dust); Dust must be fixed or suspended in the air; Minimum concentration of dust is needed; Ignition source; Dry dust; and a confined or closed space where pressure will build up. (Cooperative Extension Service, Kansas State University) 30 min. c1990

Deadly Dust III (CC) V0440

All employees should view DEADLY DUST II [V0220] before viewing DEADLY DUST III. Featured are two employees who survived major dust explosions, dramatic scenes of an actual explosion, the devastation, injuries and fatalities from major explosions and stop motion demonstrations of how primary and secondary dust explosions occur. (Department of Communications, Dole Hall, Kansas State University) 22 min. c1995

***Dealing With Chemical Safety
V0156***

The physical form, the dose, the risks, the hazards and methods of entry into the body are some of the subjects addressed in this video. Control measures to minimize the hazards ranging from elimination and substitution through to the role of personal protective equipment are detailed. (Safetycare, Inc.) 15 min. c1989

***Dealing With Manual Handling
V0321***

Manual handling includes lifting, holding, pushing, pulling, shifting, and leveraging. Describes handling, problems and injuries, and safety steps for manual handling. (Safetycare, Inc.) 11 min. c1989

***Death Trap: Permit-Required
Spaces (CC) (For non Closed
Captioned version see: V0787)
V0311***

A live action video designed for entrants, attendants, supervisors, and general personnel who may encounter permit-required confined spaces on the job. Describes the proper procedures for identifying confined spaces, isolating and securing them for entry and performing the actual entry procedure. Emphasizes the importance of following the written program and entry permit to prevent tragic confined space accidents. (Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min. c1993

***Death Trap: Permit-Required
Spaces (For Closed Captioned
version see: V0311) V0787***

A live action video designed for entrants, attendants, supervisors, and general personnel who may encounter permit-required confined spaces on the job. Viewers are taken step-by-step through the proper procedures for identifying confined spaces, isolating and securing them for entry and performing the actual entry procedure. Viewers will learn the importance of following the written program and entry permit to prevent tragic confined space accidents. (Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min. c1993

Decision For Safety V0002

Conveys the importance of taking individual responsibility for safe and proper work methods. Emphasizes each employee's commitment to a safe and healthful workplace. (Coronet/MTI Film & Video) 11 min. Take Ten for Safety Series c1977

Decontamination:

A Matter Of Life! V0305

Will help you comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: tool drop; wash/rinse; cloth/equipment removal; shower/dry/redress; and recordkeeping. (Coastal Video Communications Corp.) 17 min. c1992

Defensive Driving:

A Crash Course V0642

Motor vehicle accidents are the number one cause of work-related injuries and deaths. Over 200,000 employees are injured in automobile accidents each year. So how can you avoid becoming another statistic? Drive like a pro, drive defensively, which means you recognize hazards before something goes wrong, you pay attention to what is happening around you, you have a plan, and use practical driving procedures to avoid or diminish driving hazards. A defensive driver is an alert driver always ready to respond to adverse driving conditions. (Coastal Video Communications Corp.) 17 min. c1996

***Defensive Driving: Prepared for
the Worst (CC) V0643***

Defensive drivers anticipate how to deal with road hazards, poor weather conditions, vehicle collisions and crime. This program shows how to stay in control by being prepared for the worst! Covers: Conditions which create hazardous driving situations, ; How to implement preventive maintenance; Take precautionary measures and be prepared for the worst; Nature's forces, snow & rain; Breakdown basics; Accidents; Road construction; and Personal security. (Coastal Video Communications Corp.) 26 min. c1996

***Defensive Driving Tactics
(3rd edition) V0180***

Two professional drivers demonstrate the difference between defensive driving and aggressive driving as they participate in a safe driving test on city streets and highways. (AIMS Media) 16 min. c1989

Department Of Labor And Industries Videos (11 Video Set) V0457

Contains eleven Department of Labor and Industries produced videos: BACK YOUR BACK - BACK & MUSCLE INJURY PREVENTION (V0146); BUILDING YOUR BUSINESS IN WASHINGTON STATE (Open Captioned) (V0517); GOVERNOR'S SAFETY AND HEALTH CONFERENCE (Open Captioned) (V0625); IS IT WORTH YUR LIFE? (V0148); IS IT WORTH YOUR LIFE? (Closed Captioned) (V0531); LOCKOUT TAGOUT SAFETY PROCEDURES (V0142); MAKING CLAIMS WORK (Open Captioned) (V0529); MAKING CLAIMS WORK (Spanish Version) (Open Captioned) [QUE DEBE DE SABER DE SU RECLAMO] (V0530); OOP'S YOUR OFFICE IS SHOWING : AN OFFICE SAFETY PROGRAM (V0147); STAYING A STEP AHEAD (V0149); and TAKING CHARGE OF CLAIMS FOR YOUR BUSINESS (V0631). For descriptions of each segment, refer to specific titles and title numbers as listed here. These videos were produced by the department and are not copyrighted. You may make a copy of them for your convince or send 2 blank videos (VHS 120) and we will make a copy of all of them for you. * Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. Department of Labor and Industries, State of Washington) 161 min. 1992-1999

Department Of Labor And Industries Videos (3 Video Set) V0456

Contains the first three Dept. of Labor and Industries produced videos: BACK YOUR BACK: BACK & MUSCLE INJURY PREVENTION (V0146); LOCKOUT TAGOUT SAFETY PROCEDURES (V0142); and OOP'S YOUR OFFICE IS SHOWING: AN OFFICE SAFETY PROGRAM (V0147). For descriptions of each segment, refer to specific titles and title numbers as listed here. These videos were produced by the department and are not copyrighted. You may make a copy of them for your convenience or send a blank video (VHS 120) and we will send you a copy (Department of Labor and Industries, State

of Washington) 51 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

Department Of Transportation HM 126F General Awareness Training: Handling And Transporting Hazardous Materials Safely V0158

For employees who handle or transport hazardous materials. Includes: DOT's new regulations on handling and transporting hazardous materials; identification of hazardous materials; Regulations; Awareness of protection measures for working with hazardous materials; Accident prevention and emergency procedures. (AIMS Media) 27 min. c1992

Diet For Energy V0621

"June Honda" and "Roseanne" explain why it is necessary to have balance in your diet and exercise. The key to weight maintenance is balancing the calories value of your food intake with your basal metabolism. Monitoring your diet and maintaining an active lifestyle are the easiest ways of doing so. Repeated goal-setting and self-monitoring are the keys to a lifelong weight maintenance plan. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1997

Digging Dangers IV: Accident Avalanche V0774

Operators of excavating equipment are digging blind; they can only see what is on the surface, not what is beneath them. What is beneath them can be deadly. The next bucket full of earth could change everything. When powered excavation equipment hits an underground gas pipeline or power cable the results can be catastrophe. Such accidents are so common, they do happen to often. An informational aid for damage prevention and protection of underground facilities. (Underground Focus Magazine) 7 min. c1992

Do Your Employees Understand The Importance Of Safety? V0622

The "Drill Sergeant" and his "Recruits" stress that safety is a function of every employee, not just a segment of the organization or the Safety Department. An awareness of your general work environment and the regulations associated with safety compliance are important aspects of creating a safe workplace. The primary tactics used to improve employee awareness are signs, posters and labels in addition to hazards-specific training. Job Safety Analyzes are also used to identify hazardous activities and prevent their recurrence. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1997

Dog Bite Prevention V0893

Illustrates techniques for recognizing dangerous dogs and how to avoid confrontation. 5 min. 1998

Don't Fall For It: Preventing Slips, Trips And Falls V0109

Demonstrates simple effective procedures for reducing work-related accidents and injuries utilizing professional stunt men and women. Discusses hazards related to faulty equipment and the results of deliberate unsafe acts and horseplay. (Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min. c1989

Don't Touch! V0085

Aimed at educating children to the dangers of commercial blasting caps or detonators. Demonstrates the hazards of blasting caps and instructs children on what to do if a cap is found. It also contains a message regarding the positive use of explosives as an essential tool for today's society. (Institute of Makers of Explosives) 9 min. c1986

Drifting Toward Extinction Or ...? V0731

Narrated by Wayne Handley, Ag and Aerobatics pilot. Discusses the problem of spray drifting by ag aviation pilots when they are applying chemical pesticides to crops.

(National Agricultural Aviation Research and Education Foundation) 20 min.
Professional Aerial Applicators Support System c1997

Driven Driver V0300

Uses live action scenes, 3-D graphics and testimonials to motivate and educate employees to change attitudes and behavior while driving. Complies with OSHA's proposed Occupant Protection in Motor Vehicles Standard. Covers: driving skills; peripheral vision; vehicle familiarity; seat belts; loading the vehicle; parking and backing up; and effects of Alcohol and Drugs. (Summit Training Source, Inc.) 13 min. c1994

Drivers Alert: Over-the-Counter & Prescription Medications and Impaired Driving V0890

Addresses the growing problem of driving under the influence of legal medications. (Washington Traffic Safety Commission) 13 min. 1995

Driving Safety V0663

Motor vehicle crashes are the number one cause of deaths on the job! Don't let your employees take driving for granted. Covers: Inspection of vehicles and adjustment of equipment; Use of seatbelts; Mental preparation and concentration; Use of a "Safety Cushion"; Driving tips: passing, night driving, adverse weather, skidding and hydroplaning; and Accident procedures. (Long Island Productions) 16 min. c1995

Driving Safety (CC) (Non CC version see: V0791) V0538

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver. Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Back injuries can and often are very serious. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1996

Driving Safety (For CC version see: V0538) V0791

"Safety Crusader" Adam West tries to foil "Rudy Reckless" by covering strategies that will make you a safe and efficient driver. Covers: Safe driving attitudes, security, maintenance checklist, hazardous materials. Back injuries can and often are very serious. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1996

Drowsy Driving: Shattered Lives V0858

Fatigue is a major cause of fatal collisions in Washington State. Along with testimonials from victims of drivers asleep at the wheel, this video explores issues related to drowsiness and driving, including sleep disorders. (Washington Traffic Safety Commission) 13 min Available from WTSC on request. c1998

Drug Use & Abuse (CC) V0486

Discusses the potentially costly problems which could result from drug abuse. Identifies the drugs most commonly used, their symptoms, and the possible long and short-term problems associated with their use and abuse. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1995

Drugs: We're All Under The Influence V0138

Through the personal dramatic testimonies of people affected by drugs employees will see what devastating effects drugs have on everyone who comes in contact with a drug abuser. Employees' awareness of the high cost of drug abuse will be heightened. (Summit Training Source, Inc.) 15 min. c1989

DUI: Choices And Consequences V0340

This dramatization on the consequences of drunk driving features Jack Hamilton, a young college student who decides to

unwind from the pressures of school, work and family life by having "a few beers." (AIMS Media) 33 min. c1993

Dump Truck Safety V0662

Dump trucks have many uses but are a challenge to maintain and operate safely. Instructs your employees on the proper use of dump trucks. Discusses: Pre-startup inspection checklist; Startup checklist and tests; Knowing the vehicle's controls and instruments; Refueling safety; Receiving and dumping loads safely; and Safe driving concerns: defensive driving, different handling when loaded, and poor site conditions. (Long Island Productions) 15 min. c1995

Earthquake: Some Were Prepared V0057

Uses the aftermath of the October, 1989 earthquake in the San Francisco area as a background for this discussion of earthquake preparedness. Outlines plans specific ways in which families and communities can prepare for the possibility of earthquakes. Shows what people should do if they are in their home, car or large structure when an earthquake occurs. (R M Distributors) 30 min. c1990

Electric Circular Handsaws V0107

Provides on-the-job examples safe operations of various types of saws and their accessories. Basic instruction for novice and experienced users on the residential construction job site or in the shop. (International Film Bureau Inc.) 19 min. c1986

Electrical Emergencies: Proper Response (CC) V0883

Designed for employee training. This video examines: Effects & levels of electric shock; First aid procedures for electric shock victims; Electrical fires; Procedures for fighting Class C fires. (Coastal Video Communications Corp.) 13 min. c2000

Electrical Grounding:

A Vital Precaution V0557

Proper grounding techniques for employees who work around potentially deadly electrical power. Covers: Grounding: Why should you ground? Installing and removing grounds; and Choosing the right equipment. (Coastal Video Communications Corp.) 13 min. 1 c1995

Electrical Hazards [Also available on V0378] V0345

Clearly describes what causes electrical shocks. Through a series of examples, illustrates electrical hazards common to many worksites. Each example includes the precautions needed to minimize risk. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 5 min. Safety Watch Series Vol. 1, no. 1 Segment 3 c1994

Electrical Hazards: Common Mistakes [Also available on V0378] V0373

The three most common hazards associated with electricity - electrical shock, fire, and explosion - are discussed. Many hazards can be avoided by ensuring that cords are in good condition; electricity has protective guards; electrical equipment is properly labeled; plugs and terminals are properly handled; and electrical equipment is frequently inspected. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 8 Segment 3 c1994

Electrical High Voltage: Know The Hazards V0558

"There were three of us down there. My friend was closer to the breaker—all of a sudden he was a ball of flames...". So begins this video program which will help you comply with OSHA's Electric Power Generation, Transmission and Distribution Standard. For workers in electrical utilities operations. Covers: PPE and fall protection; Overhead lines; Enclosed spaces; Proper use of tools; Working on or near exposed energized parts; and Testing and test facilities. (Coastal Video Communications Corp.) 28 min. Warning! May be too graphic for some audiences. c1996

Electrical Maintenance [Also available on V0419] V0422

Basic terminology and process of electricity. Identifies primary causes of electrical shocks and burns. Discusses precautions essential for electrical maintenance personnel, such as when to use GFCI's and personal protective equipment. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 3 Segment 3 c1995

Electrical Safety V0302

Complies with the OSHA Electrical Safety Related Work Practices Regulation covering basic safety rules when working with electrical equipment. A new approach—perfect for all employees. (Long Island Productions) 9 min. c1993

Electrical Safety - Basic Principals (CC) V0884

Developed to create a better understanding of electricity and how it travels, this program examines basic principles of electricity, reviews safe work conditions and procedures, and demonstrates the correct response to emergencies. Key points: Electrical circuits; Insulators & conductors; Electrical paths; Grounding; and Circuit protection. (Coastal Video Communications Corp.) 16 min c2000

Electrical Safety: Beware the Bite! (CC) V0644

Covers: Levels of protection; Engineering controls; Safe work practices; Lockout/tagout; Energizing electrical systems; Qualified electrical workers; Working with energized systems; Personal protective equipment; Working with overhead Emergency rescue; and First aid. (Coastal Video Communications Corp.) 20 min. c1996

Electrical Safety: Down To The Wire V0204

Basic awareness video identifies electrical hazards and shows how to follow simple electrical safety rules. Covers electrical hazards that can cause fires, burns, shock, and other injuries; outlines the steps take to

protect themselves and others from harm; and stresses electrical safety. (Coronet/MTI Film & Video) 15 min. c1991

Electrical Safety: Real, Real-Life V0805

Tim Write hosts this video designed to provide important information about safe work practices when working with or around electricity. Focuses on how employees can protect themselves from injuries - or even fatalities. Covers: Conductivity; Safe work practices; PPE; and Using GFCI's. (Coastal Video Communications Corp.) 12 min. Real Life Series c1998

Electrical Safety In The Workplace V0709

Reviews electrical basic facts; characteristics of conductors and insulators. Factual discussion of electrical currents and formulas for calculating electrical current. Includes hazards and hazard control. (Safetycare, Inc.) 23 min. c1998

Electricity - Handle With Care! V0064

Discusses safety precautions surrounding the use of electricity in the home. Describes circuit breakers and fuses, proper wiring, the principle of grounding, and the problems of extension cords. Although dated, the principles are presented with clarity. (Handle Film Corporation) 19 min. c1988

Electromagnetic Field Awareness [Also available on V0396] V0394

The research on Electromagnetic fields (EMF) is inconclusive. Electromagnetic fields may or may not affect your health. Discusses what objects emit EMF when in use and the ways to limit your exposure to EME Use "Prudent Avoidance" when dealing with EME Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 5 min. Safety Watch Series Vol. 1, no. 10 Segment 3 c1995

Elements of an Ergonomics Program (CC) V0849

For managers and supervisors establishing an ergonomics program, this video shows the steps in designing an action plan, goals, communication and training. Includes reproducible forms on floppy disk. (Comprehensive Loss Management, Inc.) 14 min. Blueprints for Safety c2001

Elements of Ergonomics: Basics of Ergonomics (CC) V0848

This general awareness video educates employees and management on the basics of ergonomics in the industrial workplace. It is a companion to V0849 which is for managers and supervisors establishing an ergonomics program. Employees will learn what the risk factors and how to work in ways that will prevent cumulative trauma injuries. Includes reproducible forms on diskette. (Comprehensive Loss Management, Inc.) 9 min. Blueprints for Safety c2001

Elements Of Safety: The OSHA Formaldehyde Standard V0283

Provides the training required by the new standard, including: safe work practices, personal protective equipment, spill/clean-up procedures, medical surveillance programs and more. (Long Island Productions) 10 min. c1993

Elevated Areas V0010

Covers potential dangers associated with elevated areas and presents appropriate safety precautions. (Coronet/MTI Film & Video) 10 min. Take Ten for Safety c1977

Elevated Work Safety (CC) Humorous V0520

Safety hero, "Captain Safetyman" whose purpose is to inform us of the hazards dealing with elevated work surfaces, and the use of a fall protection plan. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1996

Emergency Evacuation: Getting Out Alive V0879

Addresses emergency building evacuation procedures for fire, earthquake, hazardous chemical spills, explosion disasters and the importance of developing an emergency plan. (Coastal Video Communications Corp.) 16 min. c2000

Emergency Preparedness [Also available on V0382] V0359

Stresses the importance of a comprehensive disaster planning phase to improve the response phase and reduce stress at the time of disaster. Discusses the need to have plans in place and roles defined for all types of business and geographical area. Outlines the major considerations in creating a disaster plan as well as the essential actions to take during a disaster. (Primedia Workplace Learning, Safety Watch) 6 min. c1994

Emergency Responders: Bloodborne Pathogens V0312

Training for police officers, fire professionals, industrial first aid or CPR trained persons, emergency medical technicians, correctional officers or other emergency responders. Covers: Bloodborne Pathogens; An Exposure Control Plan; Engineering Controls; and Personal Hygiene. (Long Island Productions) 18 min. c1994

Employee Education: Safety In The Office V0228

General Office safety focusing on preventing falls, loading file cabinets safely, identifying tripping hazards. Discusses the importance of emergency evacuation, fire safety, and observing electrical safety with appliances and machines. Dated, but essential information (AIMS Media) 13 min. c1990

Employee Performed Safety Inspections (CC) V0623

Cid Cisco "In Harm's Way" game show host and game show participants; attempt to tell us why employee participation provides buy-in to the safety program by employees. Suggested to supplement or as refresher

training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1997

Employee Safety Orientation V0661

Gives an overview of safety in the food services and manufacturing industry. Employees must be aware of safety concerns and act accordingly if accidents are to be avoided in this busy environment. Covers: •Personal responsibility for safety; •Need for attention and alertness; •Fire safety; •Slips, trips and fall prevention; •Safe lifting; and •Cut and burn prevention. (Long Island Productions) 15 min. c1995

Environmental Awareness: Recipe For A Cleaner World V0620

Covers an alphabet soup of agencies: Clean Air Act, Clean Water Act, SDWA; Resource Conservation & Recovery Act, Toxic Substances Control Act, SCA, FIFRA, TSD, CERCLA, EPCRA, SARA, etc. (Coastal Video Communications Corp.) 22 min. c1997

EPA Worker Protection Standard (WPS) Rules (English Version) V0747

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. (Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 17 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1996

Epidemic Of Fear: AIDS In The Workplace V0122

Shows how AIDS is transmitted and the real and perceived fears of contacting it in the workplace. Shows three victims of the disease and how AIDS affected their lives. Explores the need of AIDS patients to continue working contrasted with the fear of some employers that an employee with AIDS

puts other employees at risk of contracting the disease. (San Francisco AIDS Foundation, Pacific Bell) 23 min. c1986

Equipment And Machine Guarding V0680

Shows the risks associated with mechanical hazard and safe work procedures. Describes fixed guards, distant guards, adjustable guards, self-adjusting guards, interlocked guards, and trip devices. (Safetycare, Inc.) 13 min. c1996

Equipped For Safety: Personal Protective Equipment V0069

Opens with dramatic footage from the NASA space program. Reviews eye, ear, head, foot, respiratory, and fall protection. Personal protective equipment maintenance is also discussed. (Primedia Workplace Learning, Industrial Training Systems Corporation) 14 min. c1987

Ergonomic F.I.T.: Looking At The Signals, Video 2 (CC) V0782

Explores the signs, symptoms and solutions for common ergonomic-related injuries. Tells workers to develop an ergonomic eye to recognize risk factors and physical signs in order to preventing injuries and take action early. Shows office and industrial environments. (CoreMedia Training Solutions) 13 min. c1995

Ergonomic F.I.T.: Focusing on the Action Tools, Video 4 (CC) V0913

A training video for ergonomic solutions. Presents nine jobs for job analysis. Viewers can then practice identifying risk factors and solutions. (CoreMedia Training Solutions) 46 min. 1995

Ergonomic F.I.T.: Picturing the Process, Video 1 (CC) V0781

Explains the seven key actions that guide a successful ergonomics program. These include creating a team which includes employee participation, keeping open channels of communication, a strategy to determine most serious jobs, locate the

causes and develop solutions. Motivational. (CoreMedia Training Solutions) 17 min. c1995

Ergonomic F.I.T.: Seeing with an Ergonomic Eye, Video 3 (CC) V0912

The Action Team works to identify work risk factors by job analysis, gathering data, and record keeping. Training for employers. (CoreMedia Training Solutions) 13 min. 1995

Ergonomic Programs that Work (CC) V0681

Ergonomics is the science of designing the workplace and work organization to fit the worker or the employee rather than having the worker's body be fitted into the job at hand. The key elements of a successful ergonomics program is: Management commitment; Worker involvement; Worksite analysis; Medical management; Training & education; and Ongoing evaluation. This video may be duplicated. (U.S. Department of Labor, Occupational Safety and Health Administration) 21 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1998

VIDEO TIP:

If lost, proof of shipping must be provided within seven days of return due date.

Ergonomic Task Analysis: Module 1 Survey and Analyze (CC) V0846

A program to teach members of the ergonomics team basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in an industrial or manufacturing setting. This video covers the Cumulative Trauma Disorder risk factors and

identifies risk factors in the workplace. (Comprehensive Loss Management, Inc.) 14 min. BluePrints Two c1992

Ergonomic Task Analysis: Module 2: Focus and Eliminate (CC) V0847

Part two of a program to teach members of your ergonomics team the basic concepts, knowledge and skills necessary to perform an ergonomic task analysis in a manufacturing setting. This video builds on V0846 to use the findings of the analysis and create an action plan to make effective ergonomic improvements. Ask for the Instructor Guide. (Comprehensive Loss Management, Inc.) 14 min. Blueprints Two c1992

Ergonomic Tools (CC) - Humorous V0487

In the style of the "Home Improvement" TV show, describes the conditions which can lead to injuries of repetitive motion such as carpal tunnel syndrome. The host (Tom the Tool Guy) and his assistant (Hal) show many types of hand tools ergonomically designed to reduce stress to hands, arms, and other parts of the body. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1995

Ergonomics - The Practical Approach V0853

This program is suitable for all in the workforce for an introduction to ergonomics and to reinforce the principles that must be employed when addressing ergonomic problems. Discusses the general approach individuals should apply when addressing ergonomic hazards. Includes: Work space design; Static & Muscular effort; and Controls and displays. (Safetycare, Inc.) 17 min. c1993

Ergonomics: A Weight Off Your Shoulders (CC) V0877

Intended for the employee in the industrial setting. Most shoulder, neck and backaches are not caused by a single traumatic event, but by an accumulation of physical stress. Directs employees to use the science of ergonomics to develop safe lifting techniques

and limit repetitions. Includes stretching exercises.
(Coastal Video Communications Corp.)
13 min. c1995

Ergonomics: Break the RMI Habit (CC) V0768

Many jobs require the repetitive use of shoulders, back, arms, wrists and hands. These joints can be strained when overused or irritated by repetitive motions. Repetitive motion injuries (RMIs) are injuries, which result in damage to soft tissues like muscles and tendons. RMI symptoms usually develop as a result of months or years of strain. By making an effort now, with exercise, neutral positions, rest and good nutrition, you can avoid RMIs later. (Coastal Video Communications Corp.) - 13 min. c1997

Ergonomics: It's Your Move (CC) V0878

Intended audience: employee; office environment. Defines musculoskeletal disorders. Describes signs of MSDs, risk factors and solutions to correct them. (Coastal Video Communications Corp.)
17 min. c2001

Ergonomics: Job Safety Analysis V0507

The Safety Watch Squares game show has questions and answers on ergonomics which address issues of recognizing potential ergonomic problems, choosing correct tools for the job, and altering work areas to minimize body stress. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 15 min. Safety Watch Series c1996

Ergonomics: Solving the Puzzle (CC) V0835

Describes the signs, causes, and symptoms of musculoskeletal disorders and gives common solutions to prevent injury. Covers the proposed OSHA standard 64 FR 65767. (Coastal Video Communications Corp.)
19 min c2000

Ergonomics: The 24- Hour Body (CC) V0825

From the perspective that you "wear" your body 24-hours a day and that you need to take care of it all the time. Teaches employees how to use the ergonomic principles learned at work when working at home. Helpful with reducing lost workdays due to off-the-job injuries. Covers: Practical solutions to potential strains; How staying in your "safety zone" protects your body; and Off-the-job safety procedures. (Coastal Video Communications Corp.) 20 min. c1998

Ergonomics: Your Body At Work (CC) V0560

Reviews proper ergonomic mechanics to help employees avoid injuries. Shows how to make low-cost ergonomic worksite improvements. (Coastal Video Communications Corp.) 20 min. c1991

Ergonomics Awareness Education: For Employees in Caution Zone Jobs and Their Supervisors (CC) V0924

Describes musculoskeletal disorders and the importance of early reporting of symptoms. Explains work related causes of musculoskeletal disorders (WMSDs) including the "caution zone" risk factors. Identifies hazards and common measures to reduce them. Covers the requirements of the ergonomics rule. Showing this video along with the required handouts will meet the awareness education requirements of the ergonomics rule in Washington State. Also available online at: www.wa.gov/wisha (Department of Labor and Industries, State of Washington) 26 min. 2002 *Permission is granted to duplicate this tape in its entirety only for non-commercial uses.

Ergonomics: Taking Matters into Your Own Hands (CC) V0769

Describes cumulative trauma disorder injuries to the arms, wrists and hands. In an industrial work environment, stresses neutral positions, workstation modification, and proper hand tools. Demonstrates techniques

to minimize force, reduce repetition and eliminate direct pressure. Includes wrist and hand exercises.
(Coastal Video Communications Corp.)
14 min. c1995

Essential Elements Of Hand Safety V0679

Because of the versatile nature of our hands, we are constantly putting them at risk, and in order to reduce that risk it is critical that we are aware of what hazards exist and we know what measures we should take to prevent accidents from occurring. Covers: Hand safety awareness; Hand hazards (mechanical hazards, chemical hazards, thermal hazards, other general hazards); Safe work procedures and practices; Engineering and administrative controls; and Personal protective equipment.
(Safetycare, Inc.) 13 min. c1996

Evaluation V0716

Tips for evaluation as a tool. Discusses individual evaluation, formative and summative evaluations, sampling the individual, qualitative data (questionnaires, observations, interviews, skills tests), and application of evaluation findings.
(Coastal Video Communications Corp.)
14 min. Train the Trainer c1998

Every Time I Look At My Hand.... V0668

Nobody chooses to get hurt, but injuries still happen just the same. In many types of industry, many of these injuries involved the hands. Getting accustomed to a daily routine, rushing to complete a job, and taking short cuts are all factors that can and will result in severe hand injuries. Features testimony from workers who have suffered traumatic, disabling hand injuries. Through their testimony, the viewer will learn the importance of taking the time to do a job correctly. Nip points, loose clothing and jewelry, lockout/tagout and using proper tools are all covered in this video. There are no such things as accidents; just preventable injuries. (ERI Safety Videos) 15 min.
Warning! May be too graphic for some audiences. c1994

Every Twelve Seconds V0084

Takes a candid look at how accidents changed the lives of five permanently disabled workers associated with the FOREST INDUSTRY. Shows that accidents can be prevented and the worker needs to take responsibility for his/her actions. (Workers' Compensation Board of British Columbia) 29 min. c1987

Excavation, Trenching And Shoring V0187

Assists employers of the State of Washington to provide the required competent person at trenching and excavation projects. Details all sections of the applicable code Part "N" trenching and excavation. Sections include: Definitions; General Protection Requirements; Protective System Options; and Soils Classification. (Washington Water Power) 2 hrs. 33 min. c1991

Exercises For Anyone Anywhere Anytime V0018

For a trip down memory lane this program is nostalgic. See inventive exercises to actually do at the desk, or at home, without fancy equipment ala 80's style. (AIMS Media) 16 min. c1980

Eye Emergency V0129

Shows how to prevent and how to treat eye accidents. Animation shows how the eye is structured and how it can be protected. Rescue personnel demonstrate how to treat foreign bodies in the eye, sharp injury, blunt injury, penetrating injury, and chemical burn. (Pyramid Film & Video) 23 min. c1978

Eye Injuries V0333

Injuries to the eye can happen in an instant. Graphically depicts injuries that can be suffered when proper eye care is ignored. (Safety Short Production, Inc.) 5 min. c1988

Eye Protection: Why Gamble? (CC) V0710

Describes how the eye works, reviews hazards to eyes, shows actual eye injuries. Describes various types of goggles and other eye protection. Motivates workers to wear protective eyewear. (Coastal Video Communications Corp.) 13 min. c1991

Eye Protection [Also available on V0383 V0364

Many eye injuries occur because people do not recognize the dangers or wear the correct protective eye wear. Describes the most common conditions which create the potential for eye injury and the commonly used types of eye protection for each condition. Shows the importance of proper design, fit, and good condition of protective eye wear. Also shows steps to take in case a chemical gets in the eye. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 6 Segment 2 c1994

Eye Safety V0034

Motivation through education is the idea behind this program. Three kinds of eye hazards are illustrated, and the specific type of protection for each is discussed. Proper first aid procedures are also demonstrated. (Primedia Workplace Learning, Tel-A-Train, Inc.) 20 min. c1985

Eyewash Showers & Stations [Also available on V0469] V0472

Emphasizes that eyewash flushes should last a minimum of 15 minutes and that immediate medical attention should be obtained after the flush. Suggested to supplement or as refresher training.

(Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 2, no. 7 Segment 3 c1995

Fall Arrest Systems [Also available on V0379] V0348

Elements of fall arrest systems - anchors, body harnesses, and lanyards - are illustrated and explained. Covers essential information for all individuals required to wear fall arrest systems equipment. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 2 Segment 2 c1994

Fall Protection V0561

This program covers the following topics: Ladders; Step bolts and manhole steps; Stairs, ramps and bridging devices; Fall

protection systems; Wall openings; Scaffolds; Mobile ladders, stands, and powered industrial platforms. (Visionquest Films) 15 min. c1995

Fall Protection & Prevention V0764

Provides the information employees need to make correct choices when working at elevations. Covers the basic elements of fall hazards, the potential injuries that can result, identifies the conditions and activities that are most likely to result in a fall, fall protection and fall arrest systems, and suitable anchorage points. Applications to residential construction environment. (R M Distributors) 11 min. (Revised edition of V0561 - Fall Protection) c1998

Fall Protection: The Basics [Also available on V0412] (Humorous) V0409

Discusses the fundamentals of fall protection, showing engineering controls such as railings, barriers, and nets, and also personal fall arrest systems. Through models, clearly demonstrates the advantages of fall protection equipment, shows the correct positioning of the anchor, and emphasizes the importance of inspecting all fall arrest devices before each use.

(Primedia Workplace Learning, Safety Watch) 10 min. c1995

Fall Protection Systems Training V0157

Shows proper use of fall protection equipment as required in OSHA's Personal Protective Equipment standard for general industry. Included is training on Fall Arrest Systems, Work Positioning Systems and Climbing Protection Systems. (CoreMedia Training Solutions) 20 min. c1992

Fall Protection Taking Control V0562

Explains correct use of: anchor points, full body harnesses, rope grabs, lanyards, and lifelines. Covers: Recognizing and respecting potential fall hazards; Proper use and care of fall protection equipment; and Importance of a pro-active safety attitude. (Summit Training Source, Inc.) 11 min. c1994

Farm Chemical Safety Is In Your Hands V0259

Discusses the importance of personal protective equipment for anyone working with farm chemicals. Personal hygiene is clearly identified as an important factor in pesticide exposure reduction. (National Agricultural Chemical Association) 12 min. c1987

Farm Safety: Getting Down To Business V0758

A cooperative effort between Oregon OSHA and the Oregon Wheat Grower League of promoting safety on the farm. A consultant will walk through your farm with you and point potential health and safety violations so you can deal with them before it is too late. Shows what an inspector would look for in a random inspection of your farm. Tells you what is right and wrong when it comes to health and safety. Covers: Hazard Communication; A safety committee; A lockout/tagout program; Emergency planning; Guarding; Tractor & Combine safety equipment; Oxygen/Acetylene bottle storage; Fire extinguishers; Grinder rests & guarding; Eye protection; Electrical precautions; Hand tool maintenance; Chemical hazards; Labeling; and Grain storage units. (Department of Consumer Business & Services, Oregon OSHA, Oregon Wheat Growers League) 23 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1993

VIDEO TIP:

Admission fees, collections, or donations may not be charged when videos from the Safety & Health Video Library are shown.

Fatal Shock Electrical Case Histories V0496

Perhaps the most effective way to motivate employees to follow proper procedures is by showing them an actual accident—what went wrong and how that tragedy could have been avoided. Introduces workers to the principles of electricity, shows them how to avoid the dangers of electrical shock and explains correct responses to electrical emergencies. Covers: Dramatic re-enactments of actual incidents; Importance of following proper procedures; Reporting unsafe electrical working conditions; Personal protective equipment; and Personal verification of lockout/tagout. (Coastal Video Communications Corp.) 24 min. c1993

Fire Awareness V0563

Appropriate for all audiences. Covers the nature, causes, and behavior of fire with emphasis on fire safety management. (Safetycare, Inc.) 18 min. c1995

Fire Extinguisher Safety (CC) V0564

Teaches fire extinguisher basics, types of fires and extinguishers, and proper techniques for an emergency in the office or industrial environments. (Coremedia Training Solutions) 11 min. c1996

Fire Extinguishers (CC) V0536

Fire safety procedures and use of fire extinguishers. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Fire Hazard Recognition (CC) V0539

Reviews procedures to prevent fires. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Fire Prevention (CC) Humorous V0482

Follow Jim Carrey look-a-like "Safe Indura", fire detective, through an investigation of an electrical fire. Fires can occur at any facility

so a pre-fire plan should be established. Follow good housekeeping practices, practice proper handling of flammable liquids, and practice proper extinguisher use and evacuation procedures. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 16 min. Safety Watch Series Vol. 2, no. 9 Segment 2 c1995

Fire Prevention & Safety V0224

Explains what to do in case of fire and fire prevention. Discusses common causes of workplace fires; the importance of good housekeeping and other fire prevention measures. Shows various types of fire extinguishers, their use; and building evacuation procedures. (AIMS Media) 15 min. c1991

Fire Protection In Long Term Care Facilities: Moving Patients To Safety V0565

Shows patient-moving techniques in a fire emergency. Demonstrates options to safely move ambulatory and non-ambulatory patients to an area of refuge. (Media Resources Inc.) 17 min. c1989

Fire Protection In Long Term Care Facilities:

Responding To A Fire V0566
Basic procedures to determine priorities in attending to the fire, moving patients, and notification of facilities staff and the fire department. (Media Resources Inc.) 19 min. c1989

Fire Safety: Extinguishers V0021

Inspector Richard Coleman of the Los Angeles City Fire Department demonstrates the proper use of an extinguisher. Discusses the types of extinguishers, types of fires, and proper procedures. (AIMS Media) 15 min. c1985

Fire Safety: Extinguishers [Also available on V0386] V0387

In a relay race, team members demonstrate the use of fire extinguishers for distinct types of fire, showing the importance of being able

to quickly assess the situation, choose the right extinguishers, and properly operate the right extinguishers for that situation. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 9 Segment 1 c1994

Fire Safety: There's No Second Chance (CC) V0645

Discusses the elements of the fire, classes of fire, fire prevention, fire extinguishers, Emergency Action Plan, and what to do if you are involved in a fire. (Coastal Video Communications Corp.) 24 min. c1996

Fire Safety In The Home (CC) V0537

"Fire Marshal Bob" (Jim Carrey look-a-like) takes you through a home fire safety check-up checking for potential fire hazards and how you should act in case of a fire. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1996

Fire Safety Review [Also available on V0385] (Humorous) V0374

Max Monday, the safety cop, is on the worksite to coach fire safety. Shows how to minimize disaster by fire with: safety attitude; monitoring of emergency exits and equipment; a plan, and frequent evacuation drills (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 8 Segment 4 c1994

Fire Safety:

Real, Real-Life (CC) V0804

Covers all the important basics regarding fire safety: classes of fires; extinguishing a fire; Emergency Action Plan (EAP); The three A's - Awareness, Attitude, Action; and Real-life situations. (Coastal Video Communications Corp.) 15 min. Real Life Series c1998

Fires And Explosions V0078

A Canadian produced video focusing on preventing welding fires and explosions by checking the location and taking preventative measures. (Beacon Films) 11 min. Welding Safety Series c1986

First Aid: CPR Review (CC) [Also available on V0474] V0478

Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. c1995 [Record 478]

First Aid: Hands And Fingers [Also available on V0396] V0392

Discusses the kinds of work conditions that could cause injuries to the hands and fingers. Teaches workers to be prepared to respond to a medical emergency, know what limits they should provide in a medical emergency and only provide care they are trained to do. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 10 Segment 1 c1995

First Aid Basics: Unit 1: Responding To An Emergency V0673

Joanne Martin, a first aid instructor, explains the basics of first aid. The preface of this video covers the legal obligations and protection from contamination and infectious diseases. Covers: •How much is a responsible party required to do?; •Precautions; •Responding to an emergency; •Survey the scene and make it safe; •Tap the victim and speak to him to check for responsiveness; •If he doesn't respond, yell for help; •Have someone call EMS; •Check for life-threatening events; and •Administer the ABCD's - Airway, Breathing, Circulation, and Dangerous bleeding. (Coremedia Training Solutions) 32 min. c1993

First Aid Basics: Unit 2: Victim Assessment & Treatment V0674

Unit two covers how to recognize injuries and illnesses that require first aid and their appropriate treatment (victim assessment and treatment). To assess the situation look for signs, listen to complaints and ask questions. The goal is to keep the condition from getting worse and gather information to help EMS, do this and you will help make an enormous difference in the outcome of any accident or illness. Covers: Shock; Traumatic Injuries; Burns; Sudden Illness; Temperature

Extremes; and Poisoning. (Coremedia Training Solutions) 54 min. c1993

First Aid In The Wilderness V0032

Explains basic first aid procedures when medical help is not immediately available after an outdoor accident. Dramatizations demonstrate the essential primary steps, proper emergency care and carefully planned evacuation of the injured person in two different situations. (Beacon Films) 22 min. c1984

First Aid On The Job: Initial Response V0567

Designed specifically for those who may not be first-aid certified, but may be first on the scene of an accident. Emphasizes primary assessment of various illnesses and injuries on the job. Includes techniques for moving a victim, stopping bleeding, and precautions against bloodborne pathogens. Hosted by Bobby Sherman. (Coastal Video Communications Corp.) 26 min. c1994

VIDEO TIP:

*Did you know?
You can reserve
videos up to six

Flagging Operations and Procedures V0869

Produced by Washington State DOT with The American Traffic Safety Services Association. Part five from the WORK ZONE SAFETY for Maintenance Operations on Rural Highways. Instructional in proper flagging basic skills of stopping, releasing, and slowing traffic. Also, teaches: one flagger/one direction, emergency situations, and night flagging operations. (Washington State Department of Transportation) 18 min. Work Zone Safety Series (Maintenance Operations on Rural Highways)

Flagging: You're the Director (CC) V0730

Reviews vital flagging procedures, proper clothing and equipment, flagger position, stopping, releasing traffic and slowing traffic and unusual situations. (Coastal Video Communications Corp.) 18 min. c1994

Flammable Liquids Safety V0257

Through a presentation which educates and motivates this video covers all pertinent information for employees who work with flammable liquids. Explains LEL, UEL, flash points and much more. (Long Island Productions) 9 min. c1993

Foot Protection [Also available on V0385] V0372

Shows examples of many styles of safety shoes and boots for many hazardous situations including dangers of explosive atmospheres; chemical spills; or nails, and glass or metal filings. Advises viewers how to pick the most appropriate safety footwear, using the American National Safety Institute (ANSI) label. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 8 Segment 2 c1994

For Your Protection V0481

A comprehensive training program on the OSHA regulations on bloodborne pathogens. Safeguarding the health of people dedicated to preserving and protecting the public health cannot be neglected. Health care professionals have always found a risk of infectious disease including Hepatitis B, but the threat of HIV has increased awareness of that risk. Covers the OSHA regulations to protect the 5 1/2 million health care workers who are at risk of exposure to bloodborne pathogens. (American Medical Association) 21 min. c1992

Forklift Case Histories Serious Business (CC) V0497

Shows actual accidents—what went wrong and how that tragedy could have been avoided. Demonstrates the dangers of improper use of forklifts. Covers important safety rules to remember when driving or

working around forklifts, including platforms, loading, and transporting. (Coastal Video Communications Corp.) 18 min. c1995

Forklift Fundamentals: Get the Facts (CC) V0797

Meets the new 1999 Washington Rule. Understanding forklift design, controls and instrumentation; Conducting a comprehensive pre-use inspection before each use; and Understanding forklift stability and the factors that affect it. (Coastal Video Communications Corp.) 22 min. c1998

Forklift Handling: Safety In Dangerous Situations (CC) V0826

This program reviews techniques for forklift operators in special situations such as slippery surfaces, heavy traffic areas, loading docks, ramps, and inside trailers/ramps. (Coastal Video Communications Corp.) 18 min. c1999

Forklift Loading [Also available on V0419] V0423

Detailed tips on safe loading, emphasizing the importance of assessing loads prior to lifting and of always being aware of the lift truck's center of gravity. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 2, no. 3 Segment 4 June 1995 c1995

Forklift Operations: Carry The Load (CC) V0798

Meets the new 1999 Washington Rule. Covers: Surface conditions; Various loads and load stability; Lifting and putting down a load; Working with stacks; Traveling tips; Special hazards; and Operating safety. (Coastal Video Communications Corp.) 21 min. c1998

Forklift Safety V0282

Explains OSHA operating requirements and operator maintenance. Stresses employee responsibility for safety and details the engineering principles of the forklift. Covers: Pre-operation safety inspections; Picking up a load; Driving with and setting down a load.

Designed to ensure safe driving habits for all lift truck operators. (Long Island Productions) 12 min. c1994

Forklift Safety (4 Parts) V0116

THE PROFESSIONAL DRIVER. Refresher training. PART 1 (11 min.). OPERATION: Describes the different models and designations of forklifts; basic operations of a forklift, pre-operation safety inspections, load balance and weight capacity. PART 2 (11 min.). DRIVING SKILLS: Principles of the stability triangle, load handling, and the skills required for driving on different surfaces including inclines, 34 railroad tracks, dock plates and transportation vehicles. PART 3 (13 min.): BATTERY CHANGING AND REFUELING. Techniques for changing batteries in electric powered lift trucks; procedures for refueling gas, diesel, and liquid propane models. PART 4 (8 min.). Four video modules that can be used alone or together. (Summit Training Source, Inc.) 4 tapes/43 min. \$495 Each; 2 Parts \$795; 3 Parts \$895; 4 Parts \$995 c1989

Forklift Safety [Also available on V0386] V0389

One important safety precaution for operation forklifts is the daily inspection. This video reviews the many necessary elements of forklift inspections and also offers numerous tips for safe operating, driving, loading, and unloading. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 1, no. 9 Segment 3 c1994

Forklift Safety (4 Parts on one Video) V0896

Update of V0116 Part 1 Operation 10 min. Trains drivers for pre-operation inspection, safe operation, types of forklifts, load handling, and the stability triangle. Part 2 Driving Skills 12 min. Covers principles of the stability triangle, load handling techniques, and hazard awareness; Part 3 The Professional Driver 11 min. Trains drivers to maintain a professional attitude to navigate through difficult situations. Part 4 Battery Changing / Refueling 6 min. Teaches techniques for changing batteries in electric-powered lift trucks and procedures for

refueling gas, diesel and liquefied petroleum models (Summit Training Source, Inc.) 38 min 1999

Forklift Safety:

Operating Safely V0097

Addresses safe forklift operation as a way of avoiding product and equipment damage and personal injury. Intended for the initial training of new operators or for retraining experienced personnel. (Primedia Workplace Learning, Tel-A-Train, Inc.) 20 min c1987

Forklift Safety:

The Responsible Operator V0301

Part 1: OPERATIONS: Forklift operations; refueling and battery changing; load capacity; stability triangle; and pre-operation Inspection. Part 2: SAFE DRIVING SKILLS: driving skills; interaction with pedestrian traffic; proper load handling techniques; and hazard awareness in the driving environment. (Summit Training Source, Inc.) 25 min. c1994

Fumes & Gases V0076

The application of intense heat and light to metals can produce harmful fumes and gases. Explains how fumes are produced, the effects on the body and how to avoid the fumes. (Beacon Films) 15 min. Welding Safety Series c1986

General Safety And Health Standards: First Aid Rooms Chapter 296-24 WAC V0215

The Washington State Dept. of Labor & Industries mandates that first aid equipment and facilities be provided for employee safety in places of employment. Includes a brief summary of the guidelines for industrial first aid as stated in WAC Code 296-24-070. (Publisher Unknown) 5 min. c1993

Give-Safety-A-Hand:

Knife And Blade Safety V0568

Describes safe procedures in office and industrial environments when handling knives and blades. (Coastal Video Communications Corp.) 9 min. c1994

Good Back Bad Back: It's Your Choice V0675

This program uses humor to cover four principles a person can use to protect his/her back in everyday situations: Preserve the curves, Build a bridge; Keep it close; and Lock and lift. (Coremedia Training Solutions) 20 min. c1997

Goofy's Office Safety Championships (Humorous) V0139

Discusses several specific preventive measures and vital concepts of safety awareness and personal responsibility, including how to avoid eye and arm strain, cuts and burns, and fires. (Coronet/MTI Film & Video) 12 min. c1990

Goofy's Plant Safety Championships (Humorous) V0083

Potential safety hazards and specific preventive measures to avoid serious accidents or injury in plant settings. Goofy as safety trainer, turns the real workplace into an athletic competition to illustrate the techniques for safe loading, emergency procedures for heavy lifting, avoiding slips and falls, handling chemical spills, and dealing with fires. Some animation. (Coronet/MTI Film & Video) 13 min. c1990

Gopher Guide to Dig Safety V0838

Digging safely requires knowledge of precautions and advance notice requirements. This program lists a variety of additional materials made available by Washington State to promote worker and utility safety. Potential safety hazards to excavation work such as fiber optic cables, gas and telephone lines, are dramatized with safe procedures demonstrated. (Washington Utilities Coordinating Council) 8 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 2000

Governor's Industrial Safety And Health Conference (Open Captioned) V0625

The conference is rooted in a rich tradition of helping to make people aware of the latest ideas and technology in the fields of accident prevention and industrial hygiene. These efforts have helped provide greater awareness of safety and health throughout our lives - at home - at work - and at play. Safety and Health experts are there to help with your questions. Attending the conference can help equip you with the tools to prevent injuries, disease, fatalities, ruined careers, down-time, damaged equipment and will save money for everyone.

(Governor's Industrial Safety and Health Advisory Board, Department of Labor and Industries, State of Washington) 6 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1997

Grounds Keeping: Lawn Mower Safety [Also available on V0380] V0354

Points out precautions that need to be taken for safe lawn mowing, such as familiarizing yourself with the features of your mower and the area to be mowed, wearing protective clothing, cleaning and maintaining the mower, and having the mower professionally serviced. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 3 Segment 4 c1994

Groundskeeper Safety Including Pesticides (CC) V0509

Many safety issues for groundskeepers are discussed, including working in hot and cold weather, working with power equipment, using appropriate PPE, lifting correctly, avoiding insect bites, and working with pesticides. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1996

Groundskeeping Safety:

Be A Pro! V0646

A professional groundskeeper must know that maintaining lawns, trees, and shrubs day-after-day requires use of potentially dangerous equipment and chemicals.

Covers: Keeping yourself safe by wearing the proper personal protective equipment; applying general ground rules for the work you do; and implementing safe work practices for the chemicals and equipment you will be using. Covers: Dress the part; Wear the proper personal protective equipment; General checklist for safety; Tractors, riding and push mowers; Trim and brush cutting equipment and blowers; and A checklist for hazardous materials.

(Coastal Video Communications Corp.)

19 min. c1996

Groundskeeping Safety:

Dealing With Bugs And Critters (CC) V0806

Designed especially for public works, utility, government employees or anyone whose job function includes grounds maintenance or outdoor responsibilities, is essential for a safe work environment where you are exposed to pests — flying, creeping, crawling critters that can bite, sting and cause serious harm. Covers: Basic PPE; Snakes, wasps, bees, fire ants; Poison ivy/oak; Hantavirus; and First aid.

(Coastal Video Communications Corp.)

21 min. c1999

Grove Manlift Product Familiarization V0279

Discusses safety with Grove Manlift products and familiarizes the operator with various applications and machines manufactured by Grove. Based on safety in the workplace with Manlift products and brings to the forefront the many important aspects of using construction equipment properly.

(Grove Worldwide Company)

22 min. c1994

Hágase Usted una Promesa:

Estado de preparación en contra de Terremotos para Usted y su Comunidad (Make Yourself A Promise: Earthquake Preparedness For Yourself And Your Community) V0342

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making you home/workplace earthquake safe; and Organizing a neighborhood response plan. (TODCO)

27 min. c1990

Hand Protection [Also available on V0381] V0356

Discusses the uses of gloves for hazard protection, illustrating a wide variety of glove designs suited for many different circumstances. Describes the situations which call for cleaning and storing gloves for future use. Also covers the basics of glove care for all situations. (Primedia Workplace Learning, Safety Watch)

7 min. Safety Watch Series Vol. 1, no. 4

Segment 2 c1994

Hand Protection: Lessons for a Lifetime (CC) V0700

Features workers who recount their experiences with hand injuries. Very motivational! Cover hazard assessment, hand, machine, and electrical hazards, glove selection and maintenance. (Coastal Video Communications Corp.) 22 min. Warning! May be too graphic for some audiences.

c1995

Hand Safety V0096

Uses live-action footage, computer graphics, interviews with actual victims, and a medical expert to point out dangers to hands when using equipment improperly. Shows danger spots on machinery. Explains proper use of hand tools and outlines first aid tips.

(Coastal Video Communications Corp.)

15 min. c1987

Hand Safety:

The Irreplaceable Tools V0250

This program identifies the three important steps in guarding against hand injury: potential hazards; safe work procedures; and correct use of protective personal equipment. Aimed at the general workforce. (Safetycare, Inc.) 10 min. c1989

Hand, Wrist And Finger Safety (CC) V0602

In the "Safety Watch News" format, covers activities that involve constant, repetitive motion of the hands, fingers, or wrists that can result in injury to those extremities over time. Also, covers machine guards, following lockout/tagout procedures; and using proper personal protective equipment. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 14 min. Safety Watch Series c1997

Handling Hazardous Materials [Also available on V0398] V0400

Offers many tips for the safe use of hazardous materials, emphasizing the importance of proper containers and container labeling and storage of flammable and corrosive materials. Suggested to supplement or as refresher training.

(Primedia Workplace Learning, Safety Watch) 8 min. c1995

Harassment: Keeping It Out Of The Workplace V0763

A series of vignettes helps communicate the destructive nature of workplace harassment, including discrimination, medical harassment, sexual harassment, electronic harassment, deliberant exclusion, and racism. Discusses how the added burden of harassment for the organization has an affect on morale, productivity, and the profitability of the company. (American Training Resources, Inc.) 18 min. c1998

Harvest Of Danger Season Of Hope V0221

Examines a wide range of safety and health issues affecting farmers, farm workers, and farm families throughout the United States.

Explores the myriad causes of farm-related injuries and illnesses. Features interviews with experts in agricultural safety and rural health, as well as with farmers and farm workers. It illustrates the seriousness of health and safety concerns, and demonstrates the impact that accidents and illnesses have on individuals and their families. Explains why farming has some of the highest work-related injury and death rates of any industry in the United States. Suggests strategies for reducing the effects of numerous work-related problems ranging from stress to pesticide poisoning. (MIBH/NYCAMH/FPP/MARY Imogene Basset Hospital) 18 min. c1993

Hazard V0124

Eleven threatening hazards are created and avoided in this "real life" training program. Loggers are shown face to face with some of the most common and deadly problems confronting modern production cutters. Realistic solutions and suggestions for each hazard make the program appealing. (Northern Woods Safety Foundation) 18 min. c1987

Hazard Alert:

Back Safety V0271

Following safe lifting procedures effectively reduce the possibility of back pain. Explains how back injuries can occur with improper lifting techniques. Illustrates the proper methods to use when lifting. (Primedia Workplace Learning, Industrial Training Systems Corporation) 5 min. c1990

Hazard Alert:

Safety Is Number One V0272

Discusses a comprehensive program to encourage safe behavior and to make every employee aware of the high priority given to Health and Safety. Covers: Training; Rules and Procedures; Control Measures; Protective Equipment; Safety Inspections; and Emergency Procedures. (Primedia Workplace Learning, Industrial Training Systems Corporation) 6 min. c1989

Hazard Communication:

Learning The System V0013

An introduction to the hazard communication act for either manufacturing or non-manufacturing employees, from the workers' point of view. Stresses: individual responsibilities, identification of dangerous chemicals, labeling, MSDS's, physical & health hazards, and routes of absorption. (Comprehensive Loss Management, Inc.) 16 min. c1986

Hazard Communication:

Solutions V0175

This straightforward, non-technical presentation provides employees with the information they need in terms they to understand for compliance with Right to Know training. (Comprehensive Loss Management, Inc.) 12 min. c1985

Hazard Communication:

The Right-To-Know, The Right-To-Understand, Part 1: Awareness And Identification V0732

OSHA's standard 1910.1200 is about communication: Part One covers chemical inventory, a written Hazard Communication Program, employee training responsibilities, basic hazards associated with blocks of chemicals - Flammables, combustibles, oxidizers, reactives, and heavy concentration of interpreting labels and labeling. (Industrial Training, Inc.) 9 min. c1995

Hazard Communication:

The Road To Safety (CC V0647

Year-after-year the HAZCOM standard continues to be one of OSHA's most violated standards. The HAZCOM standard mandated by the Occupational Safety and Health Administration (OSHA) requires an employer to inform you of the potential hazards in your workplace. This program will cover the training requirements of the HAZCOM standard. Explain various physical and health hazards and teach you how to use warning labels and MSDSs. Covers: Identifying potential hazards; Warning labels; and Material Safety Data Sheets. (Coastal Video Communications Corp.) 16 min. c1995

Hazard Communication:

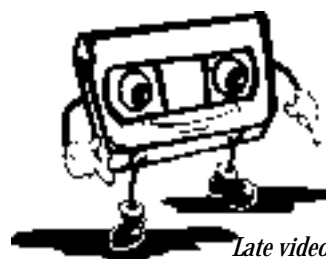

Your Safety Net V0770

If you've worked around chemicals and hazardous materials for any length of time, you know the HazCom is short for OSHA's Hazard Communication Standard. It's your safety net, providing information about the protection you need to work safely with and around chemicals and hazardous materials. Your employer provides HazCom information and training for your safety. Your part is an ongoing commitment to staying up-to-date on chemical safety at work. Every day what you need to know changes. New substances, new procedures and new people are added. Hazard communication training is an ongoing process that takes continual commitment. It's the only way you can keep your safety net in place. (Coastal Video Communications Corp.) 19 min. c1998

Hazard Communication Standard For Construction: 29 CFR 1926.59 V0174

Describes a hazardous communication inspection. Procedures include: identification of all hazardous chemicals on site; all containers properly labeled; MSDS for chemicals are available to employees; and awareness training in hazards of the chemicals. (National Technical Information Service) 14 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1993

VIDEO TIP:

*Late videos must be
shipped overnight.*

Hazard Communication Today V0137

For training or retraining workers, this video covers in easy-to-understand language the terms associated with the Right-To-Know regulation. Gives an overview of the standard with emphasis on MSDS's and labeling. (Summit Training Source, Inc.) 15 min. c1988

Hazard Communications V0660

Designed to help employees in restaurants meet OSHA requirements. Chemicals can cause property damage, injuries or even death if not handled properly. Motivates staff to think safety when working with chemicals. Covers: Hazardous material definition and effects; Importance of labeling, reading and following directions; Identifying container contents; Material Safety Data Sheets; Detailed listing; and Avoid mixing chemicals. (Long Island Productions) 13 min. c1996

Hazard Communications - Your Right To Know! V0684

When you work with chemicals it is your right to know all that there is to know, about any hazardous materials that you may be dealing with. This information is always contained in a Materials Safety Data Sheet for each chemical in your facility. Covers: Recognition of instant killers among health and physical hazards; First aid procedures; Spill cleanup procedures; and Employees "right to know" about workplace chemicals. (Long Island Productions) 4 min. BITE Videos c1993

Hazard Recognition [Also available on V0385] V0371

Shows examples of using teamwork to solve safety problems such as employees helping co-workers maintain safe attitudes and employers responding to safety issues raised by employees. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 8 Segment 1 c1994

Hazardous Areas V0005

Deals with recognizing hazardous areas and taking appropriate protective measures, including barricading, taping, and tagging.

(Coronet/MTI Film & Video)
10 min. Take Ten for Safety Series c1976

Hazardous Materials V0666

This video will increase your employees' awareness of chemical hazards in their workplace and how to avoid them. Covers: Definition of "hazardous materials"; Thorough presentation of MSDS information; Reading and use of labels and labeling concerns; Accident preparation and use of PPE; Safety rules for use & storage of flammable, and fuels; Spill and accident procedures including fire safety; and Special shop/maintenance fluids and materials: batteries, solvents, corrosives, glues, paint, exhaust, and metal grindings. Stop - Look - Read, before using chemicals or hazardous materials. Learn when...how much...and how to use chemicals correctly. (Long Island Productions) 23 min. c1997

Hazardous Materials Identification V0266

Describes five important identification resources and how to use them quickly and effectively at the scene. Covers: Introduction; Objectives of Identification; Marking Systems; Shipping Papers; Reference Books; CHEMTREC; and Computer Data Systems. (Media Resources Inc.) 22 min. c1987

Hazardous Materials Transportation: What You Don't Know Can Hurt You V0608

Everyone involved in shipping, handling, transporting, and/or storing of hazardous materials must be trained in HAZMAT procedures. This video will help supervisors and employees understand the DOT regulation and comply with OSHA's 49CFR 171-180 standard. Covers: Scope of hazardous materials regulations; Definitions, terms and requirements; and Initial response to the HAZMAT incidents. (Coastal Video Communications Corp.) 20 min. c1996

Hazardous Waste: Helping Small Business Understand The Law V0058

Created by the Department of Ecology, this video attempts to explain what a hazardous chemical is and what steps can be taken to prevent accidental leakage of chemicals. (Department of Ecology, State of Washington) 25 min. c1988

Hazardous Waste Awareness [Also available on V0384 and V0626] V0369

Discusses the properties of ignitable, corrosive, reactive, and toxic waste and the processes involved with determining proper handling and storage of hazardous material. Outlines the activities which need to occur in all hazardous waste management programs. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 7 Segment 3 c1994

Hazardous Waste Operations And Emergency Response: HAZWOPER: [Awareness Level] V0306

Will help you comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: legislative background; hazardous materials definitions; activities & workers covered by the HAZWOPER standard; and awareness-level training. (Coastal Video Communications Corp.) 20 min. c1990

Hazardous Waste Operations And Emergency Response: HAZWOPER: Response Levels V0307

Will help you comply with the joint OSHA/EPA Hazardous Waste Operations and Emergency Response Standard, OSHA 1910.120 and RCRA training requirements. Covers: Operations-levels training; Hazard and risk assessment; Personal protective equipment; Control, containment, confinement; Decontamination; Standard operating procedures. (Coastal Video Communications Corp.) 22 min. c1990

Hazards of Long Hair, Loose Clothing, and Jewelry V0834

Rotating shafts, moving machinery and other objects in industrial operations can unexpectedly "bite" much like a creature in the wild. Shows how to reduce the chance of such an injury by controlling long hair, not wearing loose clothing and hazard awareness of wearing jewelry at work. (ERI Safety Videos) 10 min. c1999

HAZCOM: Corrosives [Also available on V0419] V0420

Focuses on hazards specific to corrosive chemicals. Discusses importance of using personal protective equipment and storing corrosive chemicals in containers specifically designed for them. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 2, no. 3 Segment 1 c1995

HAZCOM: Including Acids & Caustics (CC) V0512

The investigation of an accident involving a corrosive substance reveals that this type of accident can be avoided by using proper PPE and by not rushing the job. Shows the role of employer and safety officers as well as the employee in assuring that safe work practices are always carried out. Includes discussion of characteristics of acids and caustics and precautions required for working with them. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 18 min. Safety Watch Series c1996

HAZCOM: Labels & MSDSs [Also available on V0380] V0351

Identifies the pieces of information needed for all hazardous chemical labels and discusses the benefits of these labels. Details the specific informational requirements of the MSDS document. Emphasizes the importance of each individual knowing where the MSDS sheets can be found at the jobsite and how to use them. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 3 Segment 1 c1994

HAZCOM: Reducing Exposure [Also available on V0424] V0425

Engineering controls, administrative controls or safe work practices, and personal protective equipment are the three main ways to reduce hazardous chemical exposure. Gives examples and reviews PELs and MSDS's for chemicals exposure. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 4 Segment 1 c1995

HAZCOM: Review [Also available on V0379] V0349

Reviews the solid, liquid, and gas forms which chemicals come in and the methods by which chemicals enter the body. Outlines the basic requirements of the OSHA Hazard Communication Standard which is designed to minimize dangerous exposures. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 2 Segment 3 c1994

HAZCOM: Training [Also available on V0381] V0357

Shows the elements of thorough training in recognition of hazards and preventing chemical overexposure. Staff must be familiar with specific physical chemical hazards and health hazards in their work environment and must follow safe work practices. This frequently includes the use of personal protective equipment. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 4 Segment 3 c1994

HAZCOM: Using MSDSs [Also available on V0412] V0410

Overview of the purposes and components of Material Safety Data Sheets. Describes the types of information found in each section of the sheet. Not a serious presentation. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series Vol. 2, no. 1 Segment 3 c1995

HAZCOM Case Histories: Learn From Their Mistakes V0336

Details true stories of HAZCOM accidents - what went wrong and how that tragedy could have been avoided. Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." (Coastal Video Communications Corp.) 19 min. c1994

HAZMAT Spills: Are You Ready? [Also available on V0383] V0363

Emphasizes the importance of knowing how to keep a spill from happening, how to identify a chemical spill, when to handle a chemical spill, and when to alert trained personnel. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 6 Segment 1 c1994

HAZWOPER: Role Of The First Responder (CC) V0488

Overview of Hazcom requirements and the specific responsibilities of the first responder. To be successful in this role, the first responder must be prepared for emergencies, be familiar with all hazardous materials on site, be observant of the environment and use the proper PPE when responding to a problem. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1995

HAZWOPER: Your Role As A First Responder (CC) V0603

There are two levels of response to a hazardous substance emergency; the first is to recognize the incident, and the second involves the actual control, containment, and clean up of the hazardous substances. Employees most at risk are the ones who attempt to intervene without adequate training or equipment. Any substance that has the potential to affect the health and safety of overexposed employees adversely, or the environment, is classified as hazardous. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 15 min. Safety Watch Series c1997

Head Protection [Also available on V0451] V0454

Describes requirements for protective helmets and shows various work environments and the helmet styles required for each. Compares ANSI designations of Class A, Class B, and Class C helmets. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 2, no. 5 Segment 3 c1995

Heads Up! Hard Hat Safety (CC) V0569

Topics covered: OSHA 1910.135; Head hazards; Classes of hard hats; and *Hard hat care and maintenance. Details true stories of accidents involving head injuries (Coastal Video Communications Corp.) 21 min. c1994

Health & Safety Training For The Painting Environment V0744

Produced in partnership with International Brotherhood of Painters and Allied Trades to provide accurate information relative to the health hazards of the painting profession. Discusses the diagnosis of occupational toxic conditions. Focuses on the hazards and symptoms of overexposure, the use of personal protective equipment (PPE), the hierarchy of hazard control, and the proper selection, fit and maintenance of respirators. (Department of Consumer Business & Services, Oregon OSHA, IBPAT District Council #55 44 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Health And Safety Orientation: The Competitive Edge (CC) V0570

New employee orientation or refresher training for seasoned workers, provides an overview of OSHA-required health and safety practices and procedures. Covers: Personal protective equipment; Sign, tags, and labels; Confined spaces; Lockout/tagout; Hazardous materials; Safe lifting; Housekeeping; Emergency preparedness; and Fire protection. (CoreMedia Training Solutions) 24 min. c1994

Hear For A Lifetime! V0291

Aimed at satisfying OSHA regulations for hearing conservation, this video examines the causes and prevention of hearing loss at work and in the home environment. It presents inner ear anatomy, noise controls, testing procedures, and use and benefit of personal devices. (CoreMedia Training Solutions) 16 min. c1988

Hearing Conservation V0253

Introduces the basic elements of the plan required by OSHA for work areas that meet or exceed the OSHA action level. The program explains various types of hearing protection equipment and how they are rated. Designed as an introduction for new employees and as a refresher for experienced personnel. (Primedia Workplace Learning, NUS Training Corporation) 11 min. c1993

Hearing Conservation V0115

Shows how the ear works, the effects of noise, the purpose of protection, testing procedures, and personal experiences involving hearing loss. (Summit Training Source, Inc.) 10 min. c1987

Hearing Conservation (CC) V0287

Takes the creative approach to hearing conservation to help your employees be motivated to wear hearing protection on the job. At the same time, you will be able to comply with OSHA's Occupational Noise Exposure Standard 29 CFR1910.95. Covers: Hearing Mechanics; Hearing Loss; Audio metric Testing; Use and Maintenance of Hearing Protectors; and Symptoms of Hearing Loss. (Comprehensive Loss Management, Inc.) 12 min. c1994

Hearing Conservation for At Risk Workers V0895

Focuses on hearing protection in road construction. Extensive supplemental materials including Power Point presentation on CD-ROM. Oregon 15 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c2001

Hearing Loss Prevention: Employee Training V0841

The hearing loss prevention programs focus is preventing hearing loss before it occurs. This program examines the importance of hearing protection in noise hazardous environments. It includes types of protections, symptoms of hearing loss and dangers of off-job noise. Covers: How the ear works; Noise Assessment; Training for employees on the effects of noise on your hearing; Proper selection & use of hearing protections; and Hearing tests. (American Training Resources, Inc.) 14 min. c1999

Hearing Protection: HCP & PPE [Also available on V0380] V0352

Demonstrates the proper insertion and the use of numerous types of canal caps, ear plugs, and ear muffs. Hearing protection should not interfere with conversation although it can prevent damaging noise levels. Reviews hearing protection in light of OSHA's Hearing Conservation amendments. Pairs with V0347 (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 1, no. 3 Segment 2 c1994

Hearing Protection: It Makes Sense (CC) V0699

Helps workers understand exactly how noise affects them and what they can do to protect themselves from hearing loss. Provides ways workers and employers can work together to safeguard your hearing. By monitoring work area, testing hearing regularly and wearing personal protective equipment, hearing can be preserved. Covers: The human ear; Preventing hearing loss; Audiometric testing; Engineering and administrative controls; and PPE. (Coastal Video Communications Corp.) 23 min. c1995

Hearing Protection: Sounds Good to Me (CC) also available V0701 V0897

Features country music legend, Charlie Daniels and covers the importance of proper hearing protection. It discusses the effect noise has on the human ear, personal

protective equipment and controlling harmful noise. Describes anatomy of the ear, how to reduce high noise levels, and audiometric testing. (Coastal Video Communications Corp.) 14 min. c1998

***Hearing Protection:
Sounds Good To Me
(for CC see V0897) V0701***

Features country music legend, Charlie Daniels and covers the importance of proper hearing protection. It discusses the effect noise has on the human ear, personal protective equipment and controlling harmful noise. Describes anatomy of the ear, how to reduce high noise levels, and audiometric testing. (Coastal Video Communications Corp.) 15 min. c1998

Hearing Safety V0197

Explains the hearing process, how excessive noise damages hearing, how to choose, fit, and care for hearing protection. Orientation to hearing conservation for new employees to a hearing conservation program or refresher for employees in the use and need for protective equipment. (Industrial Training, Inc.) 16 min. c1990

Heat Stress (CC) V0648

Focuses on preventing illnesses and minimizing safety hazards hot weather / hot environment working conditions. Complies with NIOSH & OSHA recommendations. Covers: hot environment hazards; First aid; Heat distress disorders and treatment; and controlling heat stress. (Coastal Video Communications Corp.) 16 min. c1988

***Heat Stress [Also available on
V0381] V0358***

Covers symptoms of each type of heat stress and shows what individuals' and employers' responsibilities are in reducing potential of heat-related illnesses. Suggests a variety of methods for avoiding heat stress. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 4 Segment 4 c1994

***Heat Stress
(Safety Watch Series) V0514***

Ken Topples of "Safeline" has two guests, "Dr. Kepe M. Kool" Heat Stress Expert and "Safe Endura" Prevention Specialist, who discuss what heat stress is. Shows the signs and symptoms of heat stress and when symptoms appear; gives immediate corrective actions. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series c1996

Heat Stress Prevention V0092

Shows the effects of heat stress on the body, and teaches how to reduce suffering heat related disorders as: Heat cramps; Heat exhaustion and heat stroke. Outlines First aid measures to take if stricken by heat stress. (Summit Training Source, Inc.) 10 min. c1989

***Hepatitis C: Diagnosis, Clinical
Management, Prevention
V0691***

Dan Rutz is the moderator of this live satellite video conference from the Centers for Disease Control and Prevention in Atlanta, Georgia. In a football stadium there are usually 71,000 people, 1,300 of those are probably infected with the Hepatitis C virus. Most of these 1,300 people don't even know it. Covers: Epidemiology and screening; Clinical Evaluation and Management; Specialist's workshop; Prevention & Counseling. The objectives are to: Describe the natural history; Describe the risk factors; Describe serological and laboratory tests; Describes treatment options; and to Discuss the most effective methods to counsel patients. (Centers for Disease Control and Prevention) 150 min. c1997

***He's Not the Man I Married..
Could it be Lead ? (No es
el hombre con quien me
case..Sera el plomo?)
V0894***

Bi-lingual video in drama format illustrates the hazards of lead in the industrial workplace. (CA Dept of Health Services) 17 min. 1991

***High Impact: Crane Safety
V0775***

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. (ERI Safety Videos) 18 min. Warning! May be too graphic for some audiences. c1998

***High Impact:
Electrical Safety V0571***

Demonstrates electrical safety lessons in ten recreated accidents. Highlights importance of teach importance of qualified electricians to maintain electrical equipment; lock-out / tagout; proper distance, ladder safety and safe work practices. (ERI Safety Videos) 18 min. Warning! May be too graphic for some audiences. c1995

High Impact: Eye Safety V0695

Make a new commitment to eye safety when you see the real accidents shown in this video. More than 1,000 eye injuries occur at work everyday. Most can be prevented by simply wearing proper personal eye protection. After watching this video employees will be dedicated to protecting their eye sight. Accidents include: A hammer that sends a nail into the eyeball; Flying metal particles; Electrical flash from a short circuit; Popping slag while welding; Sulfuric acid that sprays a worker; and A line-breaking accident. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1994

***High Impact: Fall Prevention
(Spanish Version) (Prevencion
De Caídas) V0777***

Accidents are shown to remind workers about short cuts and other safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Training and authorization; and Attitudes. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1997

**High Impact:****Forklift Operator Training V0778**

The eight forklift accidents re-created in this video shows operators and pedestrians the life-threatening consequences of incorrect and unsafe lift truck operation. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1998

High Impact : Forklift Safety Training V0334

Covers the importance of forklift operators and pedestrians following rules, the 13 most common accidents with lift trucks, characteristics and limitations of trucks, tip overs and stability, operating guidelines, visibility, loading docks and trailers, and operator attitude. Warning: May be too graphic for some audiences. (ERI Safety Videos) 19 min. c1994

High Impact: Hand Safety V0330

This "Real World" video was produced on factory floors of the following industries: Paper Making, Meat Packing, Metal Working, Heavy Assembly, Foundry Operations, Sheet Metals Forming, and Industrial Maintenance. Topics covered: Pinch points; Hot surfaces; Arm Protectors; Long hair; Lock-out; Pinch points; Hot running nips; Loose clothing; and Guards. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1994

High Impact:**Industrial Safety Attitudes (Life & Death Series) V0886**

Dramatization from the perspective of three EMT's responding to industrial accidents to review safety basics. Stresses the importance of preventing accidents by anticipating unsafe situations; adhering to company safety rules, keeping a positive attitude; and taking responsibility for personal safety of self and others. Warning! May be too graphic for some audiences. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c2000

High Impact:**Lockout - Tagout Safety V0779**

Features eight accident recreations to demonstrate the importance of following all prescribed lockout/tagout procedures. The viewer will also learn the responsibilities and safe work procedures of those who are affected by lockout/tagout as well as those that are authorized to service machines and perform lockout/tagout procedures. Warning! May be too graphic for some audiences. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1996

High Impact: Lockout Tagout Safety V0843

A dramatic presentation opens when Martha, a veteran plant employee, discovers Ralph unconscious and bleeding beside the turning dryer. As this mystery unfolds, the co-workers recall other lockout mistakes that have caused serious injuries and deaths. Key points: Employee complacency; Training and authorization; Isolating energy sources; Lockout devices; and Verification. Life and Death Series. Warning! May be too graphic for some audiences. Life and Death Series. Warning! May be too graphic for some audiences. (American Training Resources, Inc.) 19 min. Life and Death Series. Warning! May be too graphic for some audiences. c1999

High Impact: Maintenance Safety V0704

Illustrates three truths that form a solid foundation for personal safety for maintenance workers. Covers: Ladder safety, Welding and cutting, Gas cylinders, Personal fall protection, and lockout/tagout. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1995

VIDEO TIP:

Observe
copyright laws.

Videos may not
be copied!

High Impact:**Safety Awareness V0671**

Covers 24 specific safety topics from ladder safety to lockout; stresses employee responsibility for personal safety; proper training and authorization for designated tasks; following procedures and company policy. (ERI Safety Videos) 21 min. Warning! May be too graphic for some audiences. c1996

High Impact:**Welding Safety V0672**

Illustrates the hazards that apply to the different types of welding and how to avoid them as well as the general safety procedures that apply to all types of welding. Covers: Areas where welding may be prohibited; Sparks and fire prevention; Hazardous fumes in breathing zones; Maintaining healthy breathing zones; Eye protection; Other personal protective equipment; Safeguards for electrical arc welding; Conducting oxy-fuel operations safely; and General welding safety tips. (ERI Safety Videos) 17 min. Warning! May be too graphic for some audiences. c1996

High-Impact Fall Prevention V0669

Falls kill about 12,000 people every year, 1500 of them at work. In addition fall injuries at work account for much personal suffering as well substantial losses in productivity. The 10 accidents shown in this video will remind all of us about short cuts and other common safety mistakes that lead to death and injuries. Covers: Ladder safety; Improper use of forklifts; Housekeeping; Aerial lifts; Harnesses and shock absorbing lanyards; Proper footwear; Recognizing hazards; Friction, momentum and gravity; Training and authorization; and Attitudes. (ERI Safety Videos) 19 min. Warning! May be too graphic for some audiences. c1997

High-Impact Metal Working Safety V0670

Re-creates ten industrial accidents involving metal working to illustrate the necessity of following proper safety procedures and maintaining a good safety sense. Reviews safety issues that are important for operating

brake presses, grinders, metal cutting shears and other machines. The following points are stressed: • Understand the machine's operations and the potential hazards involved; • Acquire proper training and authorization before operating any tool or machine; • Always wear the correct personal protective equipment and clothing for the job; and • Follow safe operating procedures at all times and protect yourself from the machine's actions. (ERI Safety Videos) 22 min. Warning! May be too graphic for some audiences. c1996

Highway Construction And Maintenance Safety (CC) V0511

Gives guidelines for safe traffic control and safe work practices for flaggers and all other workers close to roadways. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Highway Driving Tactics V0100

Reviews highway safety and accident prevention. Gives on-the-road demonstrations of such various survival skills as: speed; vision; seat belts; and the two-second rule. (AIMS Media) 18 min. c1975

Highway Driving Tactics (3rd edition) V0181

On-the-road demonstrations provide a number of "survival skills" for drivers, including monitoring ahead, around, and behind; the two-second rule and using seat belts. (AIMS Media) 18 min. c1986

Highway Work Zone Safety: Moving Operations / Maintenance Safety V0861

Features safety tips and proper maintenance checks before starting out in emergency situations. Emphasizes the hazards of operating plows in snow removal, operating heavy construction vehicles on the road, and operating landscaping tools along the road in conditions where traffic control procedures are at a minimum. NOTE: Some footage contains Washington State Code

violations! (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 13 min. c1998

Highway Work Zone Safety: One Step From Death V0862

Safety Awareness and general orientation for road construction workers. Through a series of dramatizations of accidents causing injury or death, the program emphasizes the importance of personal responsibility for safety in road construction work zones. Emphasizes the hazards of heavy equipment, work vehicles, and on coming traffic. NOTE: Some footage contains Washington State Code violations! (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 11 min. c1995

Highway Work Zone Safety: Paving Safety V0863

For road construction workers. Discusses the common hazards of asphalt cement concrete (ACC) and Portland cement concrete (PCC) paving operations. Includes hazards of night paving, loading and unloading paving equipment; working in adverse weather conditions. and PPE NOTE: Some footage contains Washington State Code violations! (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 11 min. c1998

Highway Work Zone Safety: Plant Site Safety V0864

For road construction workers. Shows hazards of on site processing plants, such as concrete mixing or asphalt preparation, increased traffic, heavy equipment, chemicals and flammable materials. NOTE: Some footage contains Washington State Code violations! (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 10 min. c.1995

Highway Work Zone Safety: Traffic Control Safety V0865

Procedures for installing & maintaining effective traffic control through a highway work zone. Alerts construction workers to dangerous situations related to traffic movement. NOTE: Some footage contains Washington State Code violations! (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 10 min. c1996

Highway Work Zone Safety: Utility Safety in Work Zones V0866

For Road Construction worker training. Shows the different marking indications for telecommunications, electric, gas, water, and sewer lines. NOTE: Some footage contains Washington State Code violations! See also V0838 Gopher Guide to Dig Safety. (Iowa Department of Transportation; Associated General Contractors of Iowa; US Department of Transportation; Federal Highway Administration) 14 min. c1999

Historias des Casos sobre la Comunicación del Peligro (HAZCOM Case Histories: Learn From Their Mistakes) V0799

Details true stories of HAZCOM accidents. . Covers: Warning labels; MSDS; Personal Protective Equipment; Emergency response; and Your "right-to-know." (Coastal Video Communications Corp.) 19 min. c1994

Holiday Safety: At The Top Of Your List (CC) V0572

Holidays are a joyful time, but they can be dangerous if you aren't careful. Shows you and your employees how to have a safe holiday season. Includes a 25 item holiday checklist: Christmas trees; Christmas lights; Decorations; Using your fireplace safely; Other fire hazards; Holiday food preparation; Alcohol and the holidays; Holiday traveling; Shopping safely; and Holiday stress, etc. (Coastal Video Communications Corp.) 17 min. c1994

Homicide In The Workplace V0256

Homicide in the workplace is the third largest cause of death in the workplace nationwide. Points out the newest trend in deaths occurring in the workplace, explains the problem and what to do in order to protect employees. (Long Island Productions) 17 min. c1993

Hood River Tractor Safety Seminar For The Tree Fruit Industry, Part I, II, III (English Version) V0750

Provides in-depth training on the safe use and maintenance of orchard tractors. Covers OR-OSHA tractor safety rules and safety/accident statistics; proper maintenance for safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; why accidents occur; and implementing safety standards. (Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 42 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Hot Work V0007

Illustrates techniques for controlling the hot work environment in a chemical plant and equipment to avoid explosive accidents. (Coronet/MTI Film & Video) 10 min. Take Ten for Safety Series c1976

Hotel Safety: A Reality Check-In V0573

Help all of your employees take a pro-active approach to safety by reviewing what to watch out for in a hotel setting. Covers: Bloodborne pathogens; Hazard communication; Fire safety; and Protecting your back. (Coastal Video Communications Corp.) 30 min. c1996

Household Hazardous Waste V0059

Demonstrates how common chemicals found around the home can create accidental poisoning of our environment. Shows the

proper disposal methods for a variety of substances (Ecology, Solid and Hazardous Waste Program) 15 min. c1988

Housekeeping: It Ain't Like The Movies V0574

Reviews the importance of good housekeeping and what to look for in your facility. (Coastal Video Communications Corp.) 15 min. c1995

Housekeeping: Personal Work Space V0332

Clutter in the workplace can often get in the way of safety. This video stresses the importance of an orderly work area for keeping hazards at a minimum. (Safety Short Production, Inc.) 5 min. c1988

Housekeeping For Safety [Also available on V0413 and V0416] V0627

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1995

Housekeeping For Safety [Also available on V0413 and V0627] V0416

Good housekeeping is everyone's job and affects everyone. Keeping work areas clean, reporting or cleaning up spills and taking other precautions can save you and your co-workers from painful mishaps. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 2, no. 2 Segment 3 c1995

How To Conduct A Safety Meeting: A Part Of Your Job V0130

Designed for supervisors and mid-management. Covers planning and conducting a safety meeting, including agenda, scheduling, preparations, notification, and follow-up after the meeting. (Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min. c1990

How to Develop an Effective Safety Program (Revised) V0900

Emphasizes the importance of training for supervisors and employees. Includes components of a safety program, safety committees and suggested resources. Shows footage of warehouse, retail and construction workplaces. Revision of V0186. (R M Distributors) 20 min. 1995

How To Develop And Implement An Effective Safety Program V0186

Designed for supervisors and mid-management. Explains, step-by-step, how to provide safety leadership in a manufacturing environment. The steps, when implemented, have reduced accidents and injuries by 50 - 75%. (Cinema Safety Products) 18 min. c1990

How To Have An Accident At Work (Humorous) V0063

You learn caution when you see how Donald Duck's bad on-the-job safety habits make him a walking hazard to himself and others. This amusing program gives you an important safety message about taking care in everyday tasks. Animated. (Coronet/MTI Film & Video) 8 min. c1959

How To Have An Accident In The Home (Humorous) V0077

Donald Duck arrives home believing he is safe. Donald's home, however, is a masterpiece of safety hazards. By the end of the film Donald has experienced most of them. Animated. (Coronet/MTI Film & Video) 8 min. c1956

How To Investigate Accidents V0255

Teaches supervisors the basics of accident investigation and the important points to consider when gathering the facts for an accident report. Goes through a scenario of an accident investigation. (Long Island Productions) 13 min. c1993

How To Stop Bleeding

V0284

Features a medical doctor explaining the basics of how to stop bleeding in an emergency, including the precautions necessary to prevent transmitting HIV or HEV by contact with contaminated blood. Includes life saving emergency procedures needed at work, play, or in the home. (RMDistributors) 7 min. c1993

Hydrogen Sulfide

V0575

Provides an in-depth examination of safe handling techniques as well as action to take in the event of a leak or fire. Combines footage of actual incidents with realistic training scenarios. (Media Resources Inc.) 28 min. (#8 Hazchem Series) c1996

Hydrogen Sulfide:

A Matter Of Life Or Death

Whether working in a manufacturing plant, laboratory, mine or for a public utility, your employees' health depends on understanding the potential hazards of hydrogen sulfide and the safe work practices necessary to avoid injury. Hydrogen sulfide is a poison, and in high concentrations, it can kill. Helps teach workers how to protect themselves. Covers: •What is hydrogen sulfide? •The effects of hydrogen sulfide; •Aid monitoring requirements; •Personal protective equipment; and •Emergency response/first aid procedures. (Coastal Video Communications Corp.) 20 min. c1993

Hypothermia

V0326

Explains how to recognize and treat hypothermia. Shows the major symptoms, step-by-step instructions for treating the victim, and the "help" and "body-to-body warming" methods. (National Technical Information Service) 15 min. Fisheries Safety and Survival Series *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1983

Hypothermia:

Outdoor Enemy #1

Two case study dramatizations reveal the causes, symptoms and dangers of hypothermia. Shows how to guard against it, and the proper step-by-step treatment of a

victim. Viewers who engage in outdoor activities at any season will benefit from the practical information in this video. Sensible outdoor tips are offered. (Beacon Films) 24 min. c1984

I Am Joe's Ear

V0067

An introduction to the construction of the ear and its functions, plus an explanation of hearing loss and the importance of hearing tests. Although dated, the video presents a strong message to those who don't realize their hearing has diminished and what they can do about it. (Pyramid Film & Video) 23 min. c1986

I Am Joe's Eye

V0128

Provides a comprehensive overview of the human eye at work. Alternating sequences of live action and colorful clay animation show the eye's structure and function. (Pyramid Film & Video) 26 min. c1988

I Felt Comfortable

V0460

This tragic true life story is about Randy Fellhoelter and the conditions which lead up to his narrow escape from death. Randy tells his dramatic story to an audience of co-workers and its impact can be felt as well as viewed. Randy discusses how our attitude about taking risks can affect our lives and those of our families and friends. Scenes of Randy's injuries were taken at the hospital and during his recovery. Should be seen by all employees, supervisors, and managers. (National Resource Safety Center Inc.) 23 min. Warning! May be too graphic for some audiences. c1994

Incident Investigation:

Proactive Prevention

V0438

Designed for supervisors and managers, provides in-depth training on the methods and techniques investigative teams need to discover the true causes of an incident. Explains how to identify and recommend effective corrective actions. (Summit Training Source, Inc.) 18 min. c1995

Incident Reporting: You Can

Save A Life

V0576

Discusses following expectable work standards, controlling hazards, reporting incidents, and avoiding accidents. (Coastal Video Communications Corp.) 16 min. c1996

Indoor Air Quality

V0609

Informs employees of poor air's harmful effects as well as methods to prevent, identify and correct air quality problems. Covers: Sources of air contamination; Adhesives, solvents and vehicle exhaust; Housekeeping, smoking, and humidifiers; and Symptoms and signs of poor air quality. (Long Island Productions) 13 min. c1996

Indoor Air Report Breathe Easy

V0610

Describes sick building syndrome, building related illnesses; and environmental tobacco smoke. NIOSH has found that the primary causes of IAQ problems are: inadequate ventilation; contamination from outside the building; and microbial contamination from building fabrics. (Coastal Video Communications Corp.) 15 min. c1994

Industrial Ergonomics [Also

available on V0382]

V0361

Causes and symptoms of cumulative trauma disorders (or work related musculoskeletal disorders - WRMSD) are discussed with specific ergonomic strategies for reducing risk factors or caution zone jobs. Shows that both employer and individual employees need to consider ergonomics in arranging work environment and scheduling tasks with risk factors. Solutions oriented for the light manufacturing workplace. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 5 Segment 3 c1994

Industrial Safety Overview

V0892

New employee orientation or quick refresher. Covers thirty industrial safety topics from crane safety to MSDS to PPE to welding. Stresses safety attitude. 11min. 2000

Industry Hygiene For The Safety Manager V0614

The terms "recognize," "evaluate," and "control," represent a conceptual framework that the Industrial Hygienist uses to deal with hazardous agents. "Recognize" addresses the ability to anticipate hazardous conditions. "Evaluate" addresses assessment by using monitoring tools. "Control" considers conditions to remove agents harmful to workers. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 5 min. Safety Watch Series c1997

Inspection, Care And Storage Of Slings V0463

Looks at a range of lifting equipment and what fundamental principles should be followed to prevent accidents. Discusses safe operation: Pre-use checks; Care of equipment; "Planned periodic inspections"; and Correct storage of equipment. Covers: Chain slings; Wire rope slings; Fiber slings; and Web slings. (Safetycare, Inc.) 18 min. c1994

Introduction To Hearing Protection [Also available on V0379] V0347

How can noise hurt you? What can be done to reduce noise exposure? These and other questions are answered in this video. Cites the OSHA requirement relating to Hearing Conservation Programs; shows that knowing which device is right for the job requires the involvement of employer and employee. Good for re-training when paired with V0352, also a Safety Watch program. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 2 Segment 1 c1994

Is It Worth Your Life? V0148

Provides information from the Late Night Worker's Crime Protection Code: WAC 296-24-10203 to prevent or defuse violent situation in retail. Topics addressed include: store appearance; adequate lighting; and lock box use. Suggested behavior in the event of a robbery. (Department of Labor

and Industries, State of Washington) 18 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

Is It Worth Your Life? (CC) V0531

To comply with the safety codes of the state of Washington, each retailer must have in place a formal accident prevention program. Part of that program deals with the Late Night Worker's Crime Protection Code: WAC 296-24-10203. This video provides information from the code to prevent or defuse violent situations. Topics addressed include: The appearance of the store; Adequate lighting; Proper use of a lock box; and Suggested behavior in the event of a robbery. (Department of Labor and Industries, State of Washington) 18 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

It Only Takes a Second - Discussion Version V0911

The topic of driving safely, PPE, slips, trips & falls, machine guarding, and safe operating procedures and illustrated in a series of scenarios showing unsafe acts or conditions vs. the right way. (Aurora Pictures) 24 min. 2001

It's Not Gonna Happen To Me V0318

Stresses safety practices and emphasizes knowing your tractor. Includes pre-operation checks, transporting tractors, operation checks, tractor mishaps and how to avoid them and procedures to follow in the event of an accident. Rules every tractor operator should know—and live by. (Visual Education Productions) 24 min. c1990

Job Safety Analysis V0501

In a game show format, Safety Watch Squares, "celebrities" discuss the elements and requirements of job safety analysis. Shows an example of a JSA and demonstrates its benefits for planning work and identifying hazards. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 17 min. Safety Watch Series c1996

Keep The Lead Out V0214

A live-action video filmed in multiple industrial and construction locations. Training for workers on: potential hazards of lead, and how it enters the body. Describes the requirements for regulated areas and how engineering controls and personal protective equipment are utilized. Ideal for all employees exposed to lead on-the-job...manufacturing, chemical, petroleum, maintenance, utilities, and construction industries. (Summit Training Source, Inc.) 13 min. c1993

Key to Laboratory Safety: Handling Hazardous Chemicals V0113

Discusses the health and physical hazards present in the laboratory and detection methods. Safe work practices, personal protective equipment, and emergency response procedures are explained. (Industrial Training, Inc.) 23 min. c1991

Kitchen Safety V0159

Addresses hygiene, personal protective equipment, manual handling, use of knives, slips, trips, and falls, dealing with kitchen fires and general hazards. (Safetycare, Inc.) 15 min. c1990

La Seguridad en el Techado (Residential Construction: Roofing Safety) V0785

This video's intent is to help provide employees and employers with the tools to make the residential workplace productive and safe. Provides examples on ways to meet to safety requirements. The construction employer is required to provide a safety program tailored to the operation and types of hazards involved; safety meetings to address the needs and safety of the job; first aid training and kits; personal protective equipment necessary to do the job safely; code requirements; and how to work safely during the roofing phase of residential construction. Covers: Job prep; Walk-around safety inspection; Ladder safety/safe access; Anchorage's; Roofing; and Job completion. (Department of Labor and Industries, State of Washington)

13 min. Residential Construction Series.

*Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1999

Lab Safety For Non-Laboratory Personnel V0525

Get a dose of what lab safety is all about from "Dr. Chemical Imbalance". Covers safety measures, the labels on chemicals, and response procedures to follow in an emergency. Notice: slightly offbeat presentation. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1996

Ladder Safety V0314

Incorrectly used, a ladder can be one of the most dangerous tools in the workplace. This program offers a few guidelines for safe ladder use. (Safety Short Production, Inc.) 5 min. c1988

Ladder Safety V0462

Discusses how falls could have been avoided if the proper safety procedures were followed and basic guidelines for working on ladders and rolling scaffolds. Covers: Step ladders; General maintenance; Selecting the right ladder; Lifting & carrying of ladders; Erecting ladders; Securing ladders; Safe positioning of ladders; Rolling scaffolds; and Inspection and maintenance. (Safetycare, Inc.) 18 min. c1994

Ladder Safety [Also available on V0381] (Humorous) V0355

Dragnet show spoof. Max Monday, safety cop, shows the importance of training in ladder safety, inspecting ladders, using the correct ladder for the job, and the proper positioning and securing of ladders. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 1, no. 4 Segment 1 c1994

Ladder Safety Training V0316

Describes types and ratings of ladders, instructions for inspecting and maintaining ladders, methods for evaluating the site, setting up, and securing ladders for stability. (Ladder Safety And Supply) 21 min. c1992

Landscape Power Tools V0905

Concentrates on three tools; chainsaws, string trimmers, and gas powered blowers. For each type of tool the training format includes the elements of safety check and inspection before use, importance of PPE for feet, hands, head, eye, and ear protection. Gives safety precautions and techniques to prevent injury to the operator and others in the area. (Coastal Video Communications Corp.) 20 min. 1992

Latex Allergies:

A Closer Look V0808

Explains the routes of exposure and self-protection. Covers: Allergies; Who's at risk; Personal protective equipment; Office supplies; Foods; Housekeeping; Allergic reactions; Irritant and allergic contact dermatitis; and Immediate Hypersensitivity. (Long Island Productions) 10 min. c1998

Lead Awareness [Also available on V0366 and V0383] (Humorous) V0628

Through the game show, "It's Your Job" format, this video describes major sources of lead exposure and methods by which lead can enter the body. Identifies the parts of the body most adversely by excessive levels of lead. Lead poisoning symptoms and protective measures are outlined, including medical monitoring. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1997

Lead Awareness [Also available on V0383 and V0628] (Humorous) V0366

Through the game show, "It's Your Job" format, this video describes major sources of lead exposure and methods by which lead can enter the body. Identifies the parts of the body most adversely by excessive levels of lead. Lead poisoning symptoms and protective measures are outlined, including medical monitoring. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 6 Segment 4 c1994

Let's Talk About Safety V0708

A safety video designed for hard-boiled longshoremen. Half of all longshoremen are numb to safety messages yet work in one of the most dangerous environments on earth. This video was shown to them and they loved it. The unique approach to safety training woke the sleepers and actually got them talking about safety. (CSI Multimedia, Gonzer Video Division) 18 min. c1998

License To Drive V0577

Reviews crucial information covered in the CDL test that will make drivers safer and smarter. Covers: Commercial classes and endorsements; Safety inspections; Air brakes; Driving skills; and Handling cargo. Also covers: Testing drivers on skills to operate commercial vehicles safely; Getting problem drivers off the road; and Keeping commercial drivers from getting more than one license. (Coastal Video Communications Corp.) 25 min. c1990

Lift It Right V0016

Gives workers the proper techniques for: Lifting; How to avoid injuries; To carry safely; and How to best use their legs to avoid undue stress to the back. (Bureau of Business Practice, Prentice Hall) 11 min. c1989

Lift With Care V0101

Designed specifically with the health care worker in mind. Shows how lifting a patient requires complex planning, careful execution, and input from the patient and/or their records to avoid injury to either the patient or their care-giver. (Visucom Productions, Inc.) 30 min. c1987

Lifting It Right V0418

Designed for the auto service technician who operates an automotive lift to teach them the right way to lift a vehicle without causing injury or property damage. Discusses the most common in-ground and surface-mounted lifts and what you have to know to operate each safely and effectively. (Automotive Lift Institute) 17 min. c1993

Lifting Safety in Construction V0901

In a construction work environment, covers the mechanics of the spine, demonstrating how turning and bending can cause injury. Shows safe lifting techniques and explains the 10:1 lever ration. (R M Distributors) 9 min. 1993

Line Breaking: Use A Permit! V0432

Every day lines and equipment must be opened for different reasons. Safely managing the materials flowing through that pipeline system is the focus of this program. Covers: Line and equipment opening (LEO); establishing an effective safety program; LEO permits; Lockout/Tagout; line breaking procedures/post procedures; and emergency response. (Coastal Video Communications Corp.) 16 min. c1994

Listening: The Key To Problem Solving V0042

Identifies the causes of poor listening habits and the reasons for improving them. Different techniques for developing listening skills are demonstrated. (AIMS Media) 22 min. c1979

Load & Lift: A Guide To Agricultural Lift Truck Safety (English Version) V0740

Covers the basics of the proper operation and safety procedures for forklifts. Illustrates forklift pre inspection, inspection logs, and fueling the vehicle. Demonstrates load safety and capacity. Includes standard and rough-terrain forklifts. (Department of Consumer Business & Services, Oregon OSHA, Oregon Dairy Farmers Association, Oregon Association of Nurserymen, Inc.) 21min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1996

Lockout / Tagout [ALSO AVAILABLE ON V0360 AND V0382] (CC) V0629

A safety-conscious family shares home video of their vacation to see lockout/tagout programs at various facilities. Covers

purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series c1994

Lockout / Tagout: When Everyone Knows V0870

Trains for compliance of OSHA 1910.147 by explaining critical lock-out/tag-out procedures. Video contains reenactments and wrong way/right way scenarios that clearly illustrate the importance of energy control and proper procedures. (Aurora Pictures) 17 min. 2000

Lockout For Life! V0733

Reviews critical procedures such as hazards of uncontrolled energy, equipment shutdown and isolation. Dramatic re-enactments of actual incidents. (Coastal Video Communications Corp.) 22 min. Warning! May be to graphic for some audiences. c1992

Lock-Out Procedure V0815

Covers: Planning; Methods of lockout; Lockout sequence; The try; and Return to operational status. (Safetycare, Inc.) 10 min. c1993

Lockout Tagout V0315

Describes the process of locking equipment; terms for lockout/tagout; and identifies the specific training for lockout. (Comprehensive Loss Management, Inc.) 12 min. c1994

Lockout Tagout Procedures V0094

Identifies and illustrates proper procedures for lockout/tagout and start-up sequences when working with four energy types: electrical, hydraulic/pneumatic, fluids and gases, and mechanical. (CoreMedia Training Solutions) 27 min. c1988

VIDEO TIP:

Promptly return phone messages about overdue videos.

Lockout Tagout Safety Procedures V0142

Designed to help employers and employees understand requirements for the standard that applies to the control of energy during maintenance and servicing. Slides to video format. (Department of Labor and Industries, State of Washington) 17 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

Lockout Tagout: Controlling the Beast (CC) V0734

A roaring Bengal tiger helps demonstrate the power of uncontrolled energy and motivates employees to use the proper lockout/tagout procedures. Graphically demonstrates energy's dangers. Complies with OSHA 1910.147. (Coastal Video Communications Corp.) 19 min. c1994

Lockout/Tagout [Also available on V0382 and V0629] (Humorous) V0360

A safety-conscious family shares home video of their vacation to see lockout/tagout programs at various facilities. Covers purpose for lockout/tagouts, the types of devices used in lockout/tagout, and the steps taken in the lockout/tagout procedures. Describes the responsibilities of the authorized employee as well as responsibilities of affected employees in lockout/tagout. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 5 Segment 2 c1994

***Lockout/Tagout: A Life Is On The Line (CC) V0502***

Details the steps in the lockout/tagout procedures. Discusses the importance of employee training, pre-planning and review, notification of impacted employees, and identification of energy sources. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series c1996

Lockout/Tagout: Controlling Hazardous Energy V0448

Unexpected start-up or energization can result in workers being crushed, cut, electrocuted, burned, maimed or even killed. Describes lockout/tagout procedures from various energy sources, and the procedural steps to lockout/tagout. (Industrial Training, Inc.) 20 min. c1995

Lockout/Tagout: Just Do It [Also available on V0451] V0455

Although it may be tempting to omit the lockout/tagout procedure in order to save time, that brief savings in time may result in serious losses! Reviews the basic lockout/tagout procedures and stresses the importance of always taking the time to protect yourself and your co-workers. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 2, no. 5 Segment 4 c1995

Lockout/Tagout: The Basics [Also available on V0384] (Humorous) V0370

In a game show format identifies roles and responsibilities of both the "authorized" employee and the "affected" employee. Explains the purpose of lockout/tagout procedures and the dangers if those procedures are not followed. Describes the four types of energy which may be locked or tagged out. Advocates frequent review and annual evaluation of lockout/tagout procedures. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 1, no. 7 Segment 4 c1994

Los Primeros Auxilios en el Trabajo: Reacción Inicial (First Aid On The Job: Initial Response) V0533

Designed specifically for those who may not be first-aid certified, but may be first on the scene of an accident. Covers: When and how to move a victim; Stopping bleeding; Symptoms of shock and prevention; and Incorporates bloodborne precautions. Hosted by Bobby Sherman. (Coastal Video Communications Corp.) 26 min. c1994

Low-Power Lasers: Be Aware Of The Hazards V0479

Designed to provide employees with an awareness of the potential hazards of low power lasers. Reviews the hazard categories of lasers, describes the specific hazards of Class 2 and 3a lasers and explains the safety precautions that should be exercised when using them. (Primedia Workplace Learning, Industrial Training Systems Corporation) 15 min. c1995

Machine Cutting, Grinding And Sanding (CC) V0489

Discusses unique hazards in operating heavy equipment. Shows preventative measures for ensuring safe operation of grinding, cutting, and sanding equipment. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series c1995

Machine Guarding V0252

Emphasizes individual responsibility when working on or around machines and equipment. Demonstrates lockout/tag-out, machine guarding requirements and personal responsibility. (Long Island Productions) 13 min. c1993

Machine Guarding [Also available on V0398] V0402

A dramatic presentation in which the safety officer shows the company nurse the principles of machine guarding and examples of different types of guards. Discusses the critical components of effective guard designing. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 11 Segment 4 c1995

Machine Guards & Safety Devices V0882

Demonstrates various machine guards and safety devices designed to protect workers from flying particles, debris, chemical splashes, and injury. Fixed, adjustable and self adjusting machine guards are shown. Also discussed: Interlocks, pressure sensitive mats and photoelectric devices such as light curtains. Use of PPE is reviewed. (BNA Communications Inc.) 20 min. c1999

Machine Shop Safety V0519

Covers the hazards associated with machine shops; emphasizes safe work practices; wearing appropriate personal protective clothing and stresses good housekeeping practices. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1996

Machine Shop Safety V0160

Basic shop safety including PPE, clean work area, recognizing and avoiding mechanical, electrical and chemical hazards; and correct work practices. (Primedia Workplace Learning, Tel-A-Train, Inc.) 20 min. c1991

Maintaining A Drug-Free Workplace: A How-To-Guide For Supervisors V0706

Part 1: It's Up To Us; Part 2: Document, Don't Diagnose; Part 3: Step By Step; Part 4: How Testing Works; Part 5: You're Talkin' To Me. A manager's view and responsibility on identifying, creating and defending a drug free workplace. (American Training Resources, Inc.) 33 min. c1997

Maintenance Person Safety V0338

Covers many topics briefly. Reviews: personal protective equipment and clothing, housekeeping, electrical safety, fire protection, and working with flammable materials. Also, safe lifting, ladders, hand and power tools. (ERI Safety Videos) 16 min. c1989

Maintenance Person Safety V0685

The definition of a maintenance person goes like this: "An individual who is expected to do the impossible, in the shortest time, at the least expense, and to keep doing it day-after-day, year-after-year, without complaining, and never achieving the recognition deserved for keeping the organization in good operating condition. Covers: Hazardous materials; MSDS; PPE; Machine guarding; Lockout/Tagout; Electrical safety; and Fire prevention. (Long Island Productions) 6 min. BITE Videos c1997

Make Yourself A Promise: Earthquake Preparedness For Yourself And Your Community V0341

A guide to earthquake preparedness techniques for the individual and the community, with a particular focus on the needs of vulnerable populations, the elderly and the disabled. Topics: Preparing an emergency kit; Making you home/workplace earthquake safe; and Organizing a neighborhood response plan. (TODCO) 27 min. c1990

Making Claims Work (Open Captioned) V0529

Designed to inform injured workers about the workers' compensation claims process. Discusses what injured workers covered by the State Fund can expect from the Washington State Department of Labor and Industries and what the department expects from them. Stresses the partnership between the workers, employers, providers and the department necessary to help return workers to their jobs. Open captioned. (Department of Labor and Industries, State of Washington) 12 min. 1996

Making Healthy Choices: Safe & Healthy Lifestyles [Also available on V0419] V0421

Outlines some of the keys to selecting a healthy diet such as reading nutrition labels, limiting fat intake, and increasing complex carbohydrates. Shows the benefits of

exercise. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series Vol. 2, no. 3 Segment 2 c1995

Making Learning Stick V0717

Covers the principles of adult learning; Immediacy, Relevancy, Involvement; and Feedback. (Coastal Video Communications Corp.) 17 min. Train the Trainer c1998

Managing Space And Time For Safe Driving V0202

A driver education presentation emphasizing how good drivers continually adjust their driving to maintain a safe space cushion in traffic. (AAA Foundation for Traffic Safety) 9 min. c1991

Manbaskets in Construction (CC) V0903

Covers proper procedures for hoisting using a crane or derrick (Coastal Video Communications Corp.) 12 min. Hard Hat Safety Series 1997

Manejadores de Pesticidas y el Estándar de Protección de Trabajador (Pesticide Handlers and the Worker Protection Standard) V0845

Meets the federal Worker Protection Standard training requirements for pesticide handlers. The video is divided into 16 segments 2-5 minutes in length. A sampling of the key points: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing & loading pesticides; Cleaning up spills; Cleaning & disposal of pesticide containers; Applying pesticides; Cleaning up; and Working safely with pesticides. (Michigan State University Extension) 50 min MSU Extension project # 93-EXCA-3-0273 c1994

Materials Handling & Storage (CC) V0484

In a news show format, "Wide World of Safety", Howard Containment and Paula Prevention highlight the hazards of materials handling and storage. Improper storage can

lead to spills, tripping conditions, and slipping conditions. These conditions can result in injury to humans and damage to materials being stored. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 2, no. 9 Segment 4 c1995

Meaningful Hazard Communication: The Hazard Communication Standard: West Program Unit 18 V0090

Clearly explains the OSHA Hazard Communication Standard. Covers: MSDS; Labeling; and Right-to-know. (National Construction Association) 10 min. c1989

Mechanical Power Press Safety: Don't Press Your Luck V0578

It happens almost daily. Experienced machine operators lose a finger, a hand, or worse, all because they cut corners and their luck runs out. This video program will motivate your workers to follow proper safety procedures, help you comply with OSHA's Mechanical Power Press Safety Standard, and reviews safety tips for operators. Covers: Types of presses; Safeguarding devices; Safely operating a press; and Inspection and maintenance. (Coastal Video Communications Corp.) 19 min. c1996

Medical Monitoring: How It Works (CC) V0483

Discusses why it is important to have a healthy body both on and off-the-job. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 2, no. 9 Segment 3 c1995

Modern Driving Hazards: Road Rage, Cell Phones & Other Hazards V0831

Analyzes the four stages of road rage and the steps drivers can take to keep themselves from becoming a victim of violence. The use of cellular phones, other devices and distractions while driving is also reviewed.

Stresses the importance of safe driving for those who drive company vehicles. (American Training Resources, Inc.) 20 min. c2000

Moment For Decision V0006

Stresses the importance of accepting personal responsibility for protecting one's self and others from work-related injury. (Coronet/MTI Film & Video) 10 min. Take Ten for Safety Series c1976

Monitoring Airborne Contaminants V0303

Reliable measurements of airborne contaminants are useful for selecting personal protective equipment, delineating areas where protection is needed, assessing potential health effects of exposure; and determining specific medical monitoring. Covers: measuring instruments; direct-reading instruments; site monitoring; onsite monitoring; perimeter monitoring; periodic monitoring; personal monitoring; and variable monitoring. (Long Island Productions) 10 min. c1993

MSDS: Read It Before You Need It (CC) V0650

Explains the organization of Material Safety Data Sheet format by sections and includes product information; exposure situations; hazard prevention and personal protection; toxicology; ecology; and disposal; transportation; and regulatory information. (Coastal Video Communications Corp.) 19 min. c1993

Needs Assessment And Objectives V0718

Shows steps to develop that exceptional employee. Includes how to conduct a needs assessment, four different ways to uncover performance problems, observations, interviews, questionnaires, and group meetings. Also covers how to write training objectives, terminal objectives, enabling objectives, and why objective are an important component in training. (Coastal Video Communications Corp.) 15 min. Train the Trainer c1998

New Hantavirus V0528

So what happened in 1993? Where did the illness come from and how can we prevent it? To answer these questions scientists and health professionals across the nation are working together to solve the mysteries of the new hantavirus. Discusses the outbreak, clinical description, laboratory diagnosis, treatment, surveillance, and prevention. This virus is linked to the Deer Mouse and the Cotton Rat. Produced for medical professionals. (Center for Disease Control and Prevention) 57 min. 1993

NFPA 86 Ovens And Furnaces (1990 edition) Explosion Vents V0216

Explosion and fires in fuel fired electric and other heat utilization equipment constitutes a loss potential in terms of life, property, and production. While the cause of most furnace failures can be traced back to human failure including inadequate training of operators, lack of proper maintenance or improper application of equipment, the oven design itself also plays a sufficient role in the safe operation of ovens that contain flammable liquids, vapors, or gases. Nowhere is this more important than the design and placement of explosive vents. These vents give the blast of an accidental explosion an escape route, thus minimizing the risk to employees and damage to plant equipment. Describes the National Fire Protection Association Standards for Oven and Furnace Explosion Vents. (Publisher Unknown) 5 min. c1993

Night Driving Tactics (2nd edition) V0022

Dramatizes just how the physics of light, mass, and motion combine with the physiology of vision and reaction time to make fast night-time driving life-threatening behavior. Emergency procedures for fog and breakdowns, and ways to fight drowsiness are described. (AIMS Media) 13 min. c1984

No Injury, No Accident (CC) V0909

Based on the work of W. H. Heinrich and the "Heinrich Triangle," this video demonstrates the importance of tracking near miss and non injury accidents in order to prevent serious or fatal injuries. (Aurora Pictures) 17 min. 1994

No me va a suceder a mi (It's Not Gonna Happen To Me) V0319

Stresses safety practices and emphasizes knowing your tractor. Includes pre-operation checks, transporting tractors, operation checks, tractor mishaps and how to avoid them and procedures to follow in the event of an accident. Rules every tractor operator should know—and live by. (Visual Education Productions) 24 min. c1990

Nursing Homes: Hazards and Solutions (Open Captioned) V0692

Nursing homes and personal care is a fast growing industry, and a key part of our health care system. Yet these facilities have one of the highest work injuries and illness rates in the country, similar to trucking and shipbuilding, occupations often thought to be more dangerous. Covers these nursing home dangers: lost work time rate; Over exertion rate; Potential hazards in nursing homes; Lifting residents and transferring them; Ergonomic improvements; OSHA inspections and evaluations. (U.S. Department of Labor, The Division of Audiovisual, Communication Services with Oppix & Hider, Inc.) 16 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1998

Off The Job Safety (CC) V0515

Covers: Toxic Hazards; Food preparation and handling; Fire safety; Slips and falls; Electrical safety; Carbon monoxide; and Fire arms safety. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. c1996

Off The Job Safety [Also available on V0413] V0414

A camping trip illustrates the importance of being safety-conscious in off-the-job situations. Being prepared for potential emergencies and knowing how to safely use recreational equipment can help make your vacation less stressful and less dangerous. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 2 Segment 1 c1995

Office Health & Safety V0842

The program offers training in office safety and workplace health. Topics include: housekeeping, emergencies, hazards in the workplace, chemical hazards, ergonomics, security, safe lifting and handling loads. (American Training Resources, Inc.) 10 min. c1999

Office Safety V0183

Hazards covered include: Slips, trips, and falls, misuse of chairs and file cabinets; deficient lighting; cuts from sharp objects, including paper; the dangers of electricity and office machines including photocopiers and computers; and fire hazards. (International Film Bureau Inc.) 15 min. c1991

Office Safety (CC) Humorous V0516

A zany dramatization. Foster Safewell, world renown Office Safety Expert discusses how people survive in such an untamed environment as the office. Shows how to spot and take corrective action to remove office hazards. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 15 min. Safety Watch Series c1996

Office Safety: It's Serious Business! V0317

Comprehensive orientation covering: basic office safety such as, closing drawers, crowded aisle spaces, ladders and stairs, chemical, stress and fatigue. Discusses the importance of: proper lifting techniques; handrails; fire safety; evacuation and emergency action plans; ergonomics; and exercise. Dated. (Media Resources Inc.) 14 min. c1989

Office Safety Orientation V0686

A brief overview which covers: Accident statistics; Alcohol and drug use policies; Electrical safety; Dressing for work; MSDSs; Fire extinguishers; Ladder safety; Slips and falls; Reporting accidents and injuries; and Avoiding on-the-job accidents. (Long Island Productions) 6 min. BITE Videos c1992

On Your Guard: Power Tool Safety V0907

Discusses general safety precautions for working with power tools. Covers the circular saw, radial arm saw, table saw, portable drill, portable sanders, bench grinder, angle grinder, and reciprocating saw. Construction site environment. (Comprehensive Loss Management, Inc.) 14 min Blueprints Select 1992

Oop's Your Office Is Showing: An Office Safety Program V0147

Designed to help office personnel identify office accident causes and how to prevent them. Teaching points include: Office accident causes; Work station design; and Proper lifting techniques. Slides to video format. (Department of Labor and Industries, State of Washington) 15 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

OSHA Confined Space Regulation Enforcement (2 Parts) V0397

A cooperative effort between Kirkwood Community College in Iowa and OSHA to bring you a live interactive video conference on OSHA Confined Space Regulation Enforcement. Features Don Parker (708-297-4810 ext. 142) and Linda Surling (708-297-4810 ext. 174), two of OSHA's senior instructors. Provides an overview of the regulation and clarify some issues that have arisen since the regulation was promulgated on January 14, 1993 and discuss its enforcement. Introduction from Joseph A. Dear, Asst. Secretary of Labor, OSHA. (National Technical Information Service) 2 hrs. 30 min. *Permission is granted to

duplicate this tape in its entirety only for non commercial purposes. c1994

VIDEO TIP:

*You can borrow
5 videos for 5
working days.*

OSHA Lead Standards For Construction And General Industry: An Employee Training Program V0260

Especially useful to building/construction companies, manufacturers, public-sector organizations, recyclers and hospital maintenance staffs. Explains lead overexposure; symptoms and effects on the body. Describes how to assess lead exposure. Shows how engineering, work practice and administration controls can be used to limit lead exposure; personal protective equipment; and the Medical Surveillance Program. (International Film Bureau Inc.) 24 min. c1993

OSHA Record Keeping: Keep It Simple! V0712

Provides basic instructions and guidelines to keep accurate records; how to complete the necessary forms; and how to determine when an injury or illness is recordable. This program covers current regulations and OSHA forms. (Coastal Video Communications Corp.) 22 min. c1996

Ounce Of Prevention V0073

Preventing an accident or injury is the emphasis of this program. Subject matters covered are: Drowning; Sunburn; Anaphylactic shock; Heat exhaustion; Animal bites; Contact with poisonous plants; Heat stroke; Snake bites; Insect bites and stings; and Frostbite. (Primedia Workplace Learning, Tel-A-Train, Inc.) 14 min. c1988

Ounce Of Prevention (Module 1) V0752

Encourages business owners to develop safety and health hazard communication programs. Covers: *Responsibilities of the practice owner/operator; and Consequences of non-compliance. The diversity of activities in hazardous materials present in veterinary practices, raises concerns about potential risks such as exposure to pesticides, hazardous gases, photochemicals, disinfectants, cleaners, radiation, needles, scapulas, heavy lifting, and animal bites. Developed specifically for veterinary practices to identify the potential hazards that exist. (Department of Consumer Business & Services, Oregon OSHA, Oregon Veterinary Medical Association) 17 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Ounce Of Prevention (Module 2) V0753

Offers specific training information to employees in veterinary clinics. Covers: Health and safety information for veterinary employees; and Encourages their involvement in an ongoing health and safety program. Covers: Hazards you may face; Hazardous materials; Potential health effects; How to protect yourself; Chemical safety; Protective measures; MSDSs; Animal bites and scratches; Disposal of sharps; and General housekeeping. Developed specifically for veterinary practices. (Department of Consumer Business & Services, Oregon OSHA, Oregon Veterinary Medical Association) 15 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Ounce Of Prevention: Protecting Yourself From Bloodborne Pathogens V0161

Orientation for First Aid and Emergency Responders. Presents overview of the risks of exposure to BBPs in general industry. Includes description of: HIV & Hepatitis B; OSHA's requirements for BBP Standards in work practice and engineering controls, PPE, housekeeping, signs/labels, Hepatitis B vaccination and post exposure managements. (Comprehensive Loss Management, Inc.) 15 min. c1992

Overhead Cranes: Safe Operation V0289

Designed for operators, focuses on the basic procedures for the safe operation of overhead cranes. Operators are provided with the information needed to conduct daily walkarounds and operational checks prior to using the crane. Special considerations are addressed, such as working in less than ideal situations and communication with a signal person. (Primedia Workplace Learning, Tel-A-Train, Inc.) 18 min. c1993

Oxy Acetylene Welding: Safety And Operations V0024

Defining gas welding, this video explains: The procedures for opening regulator valves; and How to prepare a torch for use. (AIMS Media) 15 min. c1970

Oxy-Acetylene Cutting V0208

This program shows the correct and safe use of Oxy-acetylene Cutting equipment, and includes: equipment and workshop safety; gas and gas cylinders, their types and flow rates; the cutting torch and the types and applications of the tips; equipment knowledge and maintenance. Also includes techniques for setting-up, cutting of metals, and closing down. (Safetycare, Inc.) 14 min. Skills Education Series c1989

Oxy-Acetylene Welding V0209

Shows operators how to use Oxy-acetylene equipment correctly. Includes: the Oxy-acetylene process; workshop and equipment safety; explanation of all the components of the Welding Unit; flame types; backfires and flashback; running a bead with and without a rod. Shows correct procedure for a variety of welds including: edge welds, corner welds, butt welds, fillet welds; and safe procedures for closing down. This program is aimed at professional operators and trainees as an operational guide on the use of Oxy-acetylene Welding Equipment. (Safetycare, Inc.) 25 min. Skills Education Series c1989

Pallets Move The World...With Your Help! (Proper Pallet Handling Techniques) V0518

Overview of techniques for inspecting, loading, lifting, and moving with power pallets. (Girard Wood Products, Inc.) 13 min. c199u

Permit Required Confined Space Entry V0436

The dramatic opening for this program makes a lasting impression illustrating the hazards of working in a confined space and the importance of following proper procedures. Defines confined space, associated hazards, proper entry procedures and permits, monitoring and PPE, and emergency rescue procedures. (Summit Training Source, Inc.) 21 min. c1993

Personal Fall Protection: Hook Up! V0579

FACT: this video program actually saved a worker's life. A worker who had not been using his fall protection correctly, saw this program, made the adjustments and survived a major fall as a result. Complies with OSHA's proposed 1910.128.131. Covers: Equipment anchorage; Tie-off and use; and Body belts and harnesses. (Coastal Video Communications Corp.) 18 min. c1995

Personal Fall Protection Systems [Also available on V0464] V0465

Detailed demonstrations of the use of the components of fall protection systems: anchorage point, compatible hardware, and harness or belt. Shows differences between using belt or full-body harness, and also shows how to inspect and maintain your system. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series Vol. 2, no. 6 Segment 1 c1995

Personal Health & Fitness V0544

In this "Rocky" spin-off, physical fitness expert "Stocky" tells Pauly and Adrian why good exercise serves at least three important purposes: Maintaining or increasing your strength and endurance; Preparing your musculoskeletal frame for your work demands through proper stretching and warming up; and Strengthening your mind and body, connections that help connect the intellectual, spiritual and physical self. A good exercise program covers aerobic exercises, strength training, and flexibility training. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1996

Personal Protection Equipment Basic V0001

Covers the types and uses of personal protective equipment. Discusses use of hard hats, eye protection, body protection equipment, and foot protection equipment. (Coronet/MTI Film & Video) 10 min. Take Ten for Safety Series c1977

Personal Protective Equipment V0461

Personal protective equipment is used in a wide variety of applications. Covers: Head protection; Hearing protection; Eye protection; Eye and face protection; Respiratory protection; Hand and arm protection; Foot and leg protection; Skin protection; Whole body protection. (Safetyscare, Inc.) 18 min. c1995

Personal Protective Equipment: Simple Things [Employee Module] V0206

This companion video was produced to motivate employees to choose the correct Personal Protective Equipment for the task and to wear it properly. (CoreMedia Training Solutions) 7 min. c1991

Personal Protective Equipment: Supervisor Training In Hazard Assessment V0207

Trains supervisors in a five-step Hazard Assessment process to ensure the correct Personal Protective Equipment is used for each employee task. (CoreMedia Training Solutions) 12 min. c1991

Personal Protective Equipment: The Race to Safety (CC) V0697

NASCAR driver Ted Musgrave knows what it takes to be a winner. Compares the extreme dangers of auto racing to the industrial hazards workers encounter every day on the job. Discusses all aspects of PPE including safe use and maintenance, total body protection and hazard assessment. Covers: Protecting your eyes and face; Protecting your hearing; Protecting your head; Protecting your feet; Full protective covering; Knowing the limitations; and Maintenance and disposal. (Coastal Video Communications Corp.) 25 min. c1996

Personal Protective Equipment: Win The Race To Safety V0810

NASCAR driver Bobby Labonte compares the extreme dangers of auto racing to the industrial hazards workers encounter every day on the job. Discusses all aspects of PPE including safe use and maintenance, total body protection and hazard assessment. (Coastal Video Communications Corp.) 20 min. c1999

Personal Protective Equipment In General Industry V0447

Examines the use of PPE to prevent eye, head, hand, and foot injuries. Discusses training requirements in 29 CFR 1910.132. Reviews the use of respirators, hearing protection, and protective clothing. (ERI Safety Videos) 17 min. c1994

Pesticide Handlers and the Worker Protection Standard V0844

Meets the federal Worker Protection Standard training requirements for pesticide handlers. The video is divided into 16 segments 2-5 minutes in length. A sampling

of the segments: Employer/employee responsibilities; Pesticide poisoning; Emergency first aid; PPE; Respirators; Heat stress; Reading pesticide labels; Storing and transporting pesticides; Mixing & loading pesticides; Cleaning up spills; Cleaning & disposal of pesticide containers; Applying pesticides; Cleaning up; and Working safely with pesticides. (Michigan State University Extension) 50 min MSU Extension project # 93-EXCA-3-0273 c1994

Plain Talk About A Serious Problem...Silicosis V0636

Well over a million workers in a wide range of industries throughout the United States are exposed to this very serious disabling lung disease called silicosis that results from inhaling dust containing silica. Covers: Dust; Four factors/Silicosis (particle size, percent of free silica; length of safe exposure, individual susceptibility); and Silicosis...three basic stages. Narration by Andy Griffith. (North Carolina, Dept. of Labor, Mine & Quarry Division) 18 min. c19uu

Planning And Designing V0719

Designing the learning event. Begin with a needs assessment and a clearly written training objectives. Covers learning environments, presentation techniques, and setting standards. (Coastal Video Communications Corp.) 15 min. Train the Trainer c1998

Play It Smart, Play It Safe V0917

Promotes safe work practices for contractors and workers who handle fiberglass, rock and slag wool insulation products. Lively format uses two insulation installers, fresh off the basketball court. Endorsed by OSHA. (North American Insulation Manufacturers Association) 16 min. 2000

Pneumatic & Hydraulic Tools (CC) V0599

Alerts viewers to know the difference between pneumatic and hydraulic tools, their hazards, and limitations. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1996

Pole Topping Safety (High Voltage Electrical Pole Topping Safety) V0887

For public and private utility workers, and linemen. Shows examples of acceptable and effective safe pole top removal practices. (Department of Labor and Industries, State of Washington) 10 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c2000

Policy is Not Enough: Leading a Respectful Workplace (CC) V0854

Specifically tailored to managers and supervisors, this focuses on their leadership role in establishing a comfortable and respectful workplace. Issues addressed include sexual and other forms of harassment; investigating complaints and preventing retaliation. Good companion to With All Due Respect (V0855) which is for employees. (American Training Resources, Inc.) 17 min. c2000

Portable Hand Tools [Also available on V0396] Humorous V0393

Before using a tool inspect it and wear the appropriate personal protective equipment based on the tools used and the type of job. Use tools designed and fitted to the task you are doing, carry tools properly, and put them away when you are finished with them. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 10 Segment 2 c1995

Portable Ladders V0008

Discusses the safe use of portable ladders. Includes inspecting ladders, proper placement, extension ladders, step ladders, and tying-off the work area. (Coronet/MTI Film & Video) 10 min. Take Ten for Safety Series c1976

Portable Power Tools [Also available on V0380] (Humorous) V0353

A humorous game show is the setting for learning the do's and don'ts of using portable power tools. Discusses common

sense but sometimes forgotten procedures to perform before and during your use of power tools. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 1, no. 3 Segment 3 c1994

Powder Actuated Fastening Tools V0761

Demonstrates the use of explosive powered hand held fastening tools. Covers: Tool characteristics - direct acting standard velocity tools and indirect acting low velocity tools); Explosive charges; Personal Safety; PPE; Operational safety; Preparing a low velocity and standard velocity tools for use; Firing the tool; Fasteners and their selection; Fixing to concrete; and Fixing to steel. (Safetycare, Inc.) 14 min. c1992

Power & Hand Tool Safety V0098

Covers a myriad of general and specific tool use. Demonstrates the correct methods of use. Details proper methods of selection, inspection and use of hand tools and portable power tools, both on the jobsite and at home. (Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min. c1987

Power Fastening Safety and You: A Partnership V0916

Testimonials to a safety attitude with air power tools in the residential construction work environment. Stresses the importance of using the correct trigger system for the job, keeping the finger off the trigger, wearing safety goggles, reading and heeding the instructions. (International Staple, Nail and Tool Association) 15 min. 2001

Powered Hand Tool Safety: Handle with Care (CC) V0839

Emphasizes the basic safety principles with direct application to powered hand tools on and off the job. Discusses: Hazards and safety measures; Proper use of PPE; and Tool pre-inspection. Specific tools include saws, drills, pneumatic tools, and powder-actuated tools. (Coastal Video Communications Corp.) 22 min c2000

Powered Low-Lift Trucks: Walkies & Walkie/Rider Safety (CC) V0827

When OSHA issued its revised rule (1910.178), powered low-lift trucks were included in the new training requirements. Goes over training for operators of walkies and walkie/riders, transporters, pallet trucks, and platform trucks. Covers: Characteristics; Load handling; Pedestrian traffic; and PPE. (Coastal Video Communications Corp.) 17 min. c1999

PPE: Electrical (CC) [Also available on V0474] V0477

Basic rules when working with electricity. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series Vol. 2, no. 8 Segment 3 c1995

PPE: Put It On (CC) [Also available on V0469] V0471

Uses an old television sitcom format to emphasize certain hazards in the work environment that require the use of PPE. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 7 Segment 2 c1995

Presentation Skills V0720

Stresses the importance of presentation as part of the training process and will help to sharpen your skill. Covers the basics of good communication: professional appearance, proper body language, an interesting voice and receiving feedback from your audience. Discusses the trainer's role as a leader. (Coastal Video Communications Corp.) 14 min. Train the Trainer c1998

VIDEO TIP:

*Reservations
for videos
may be made
6 months in advance.*

Preventing Burns And Fires: Program 2 V0793

Food service is a hot service in more ways than one, every source of heat represents a hazard for everyone nearby whether they are working with it or not. Covers: Being prepared to work with the hot equipment found in a food service industry; How to avoid burns around the fryers, burners, and heat lamps; Preventing fires and watching for the hazards that may cause them; and Dealing with a fire emergency. (National Restaurant Association, The Educational Foundation) 12 min. Servsafe Risk Management Program: Employee and Customer Safety c1992

Preventing Cuts and Lacerations: Program 4 V0795

Covers: Preparing to use knives and the machinery; Shows the proper way to handle knives as well as how to clean and store them; The proper way to use machinery such as slicers and grinders; and Other hazards that can lead to a cut.

(National Restaurant Association, The Educational Foundation) 15 min. Servsafe Risk Management Program: Employee and Customer Safety c1992

Preventing Electrical Accidents:

Safe Work Practices V0162

Designed to help employers meet training requirements of the electrical safety related work practices standard (29CFR 1910.331-335). Discusses different ways to approach energized versus de-energized equipment, differences between qualified and non-qualified workers, and safe work practices on or near overhead electric lines (Industrial Training, Inc.) 23 min. c1992

Preventing Hantavirus Disease V0527

See a still presentation of this video at <http://www.cdc.gov/ncidod/diseases/hanta/html/hv94cont.htm> During 1993, a new hantavirus was identified in the United States. The virus causes Hantavirus Pulmonary Syndrome (HPS) and is transmitted by the Deer Mouse and the Cotton Rat. Doctors and scientists who have

had first hand experience discuss the most up to date facts covering the following topics: Symptoms; Transmission; Risk factor; Treatment; and Prevention. Produced for the general public. (Center for Disease Control and Prevention) 26 min. 1994

Preventing Slips, Falls And Lifting Injuries: Program 3 V0794

Slip and fall accidents are the number cause of injuries in the food services business. To prevent accidents this video covers: Preventing slips and falls, how to be alert so they don't happen, and steps to take to prevent them when cleaning the floor; Lifting heavy objects, how and how not to do it; How to use a ladder when something is stored up high. (National Restaurant Association, The Educational Foundation) 13 min. Servsafe Risk Management Program: Employee and Customer Safety c1992

Prevention Is Proactive: Part I - The Support Process, Part II - Attitudes In Action, Part III - How Does That Make You Feel? The Power Of Stress V0754

Discusses an introductory training program on crisis prevention that examines staff values and stress reactions and the techniques of diffusing a crisis situation in which an individual is threatening the safety of himself and others with severe aggressive, destructive, or self-abusive behaviors. The support process covers: What the steps in the support process are; Who is involved, and The process for each individual. (Department of Consumer Business & Services, Oregon OSHA, Oregon Rehabilitation Association) 26 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1991

Prevention Is Proactive: Part IV - Crisis Diffusion V0755

Discusses strategies that you can implement to diffuse a crisis. The best way to deal with a crisis is to prevent it from occurring in the first place. The staffs' role is to support the individual especially in times of crisis. The main goals of crisis intervention are: *To assure the safety of everyone involved; and To

help the person in crisis regain control of himself. Designed to reduce the incidence of on-the-job injuries sustained by rehabilitation staff who works with people with physical, mental, or emotional impairments. 22 min. color 199u (Department of Consumer Business & Services, Oregon OSHA, Oregon Rehabilitation Association) 22 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1991

Prevention Of The Most Common Accidents (CC) Humorous V0549

In this "Get Smart" format, "Agent Fax" and "Agent 29" meet "Tool Time" helper "Hal" who wants to get safety facts to help other employees understand how potential accidents can be recognized and prevented on a daily basis. Note: slightly offbeat presentation. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series c1996

Primero la Seguridad: La Seguridad Es Importante (Safety First: Safety Is Important) V0757

(Pictograms For The Food Processing Plant) A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. (Department of Consumer Business & Services, Oregon OSHA, Northwest Food Processors Association) 5 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Principles of Office Ergonomics (CC) V0880

This program focuses on office environments with several specific ergonomic solutions. Accompanied by forms and overhead templates on disk, and five training booklets. (Comprehensive Loss Management, Inc.) 16 min. Blueprints for Safety c2001

Propane Safety V0657

Includes properties of propane, approved transport cylinders, proper use, refilling tanks and cylinders, and hazards of escaping propane. (Long Island Productions) 11 min. c1994

Propane, Butane And Propylene (Version 2.0) V0450

Propane, butane and propylene are the most common liquefied petroleum gases. They are highly flammable and, when exposed to fire, their containers can fail with explosive force. Propane, butane, and propylene is a comprehensive examination of liquefied petroleum gas problems. Identifies dangerous properties of LPG, safe storage and handling, and safe response to emergencies involving leaks and fires. (Media Resources Inc.) 29 min. (HAZCHEM Series #9) c1997

Proper Use Of Compressed Air V0510

Gives safety tips for using both breathable and work-related compressed air. Shows proper transporting, storing, and use of compressed air tanks. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Proper Use Of Suspended Personnel Platforms V0047

Describes the OSHA requirement for the proper use of suspended personnel platforms or manbaskets. Shows condition of the Crane, platform design & specifications, trial lift inspection & proof testing, and traveling the Crane. (Lifting Technology, Inc.) 20 min. c1991

Protect Your Sight! V0132

Thoroughly covers not only the various types of shields and guards to prevent accidents to the eye and what to do if one happens, but also the care and maintenance of the eye protection equipment itself. Identifies a number of major industrial hazards: Flying particles, radiation, and chemicals; The appropriate safety equipment for each; and The proper coverage and fit. (Coronet/MTI Film & Video) 16 min. c1989

Protecting Workers: How OSHA Conducts Inspections V0327

Go with an OSHA compliance officer through an inspection consisting of the opening conference, the employer representative, the actual inspection, the closing conference, and reporting the findings to the area director who determines the appropriate citations and penalties. Different violations are discussed: serious, willful, repeat, other than serious violations; and failure to abate. Also, steps to contest citations and OSHA's benefits to employers. (National Technical Information Service) 18 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1994

Protecting Yourself And Your Customers: Program 1 V0792

Everyday in the food service industry employees work with tools and equipment that can cause serious injuries: a kitchen knife, a burner, a fryer, even the floor that is walked on can lead to a cut, burn or back injury. Safety meeting help to prevent accidents from happening or from happening a second time. Explores: The causes of accidents (the main cause is human error); The cost of accidents; and The benefits of preventing accidents. (National Restaurant Association, The Educational Foundation) 12 min. Servsafe Risk Management Program: Employee and Customer Safety c1992

Protection From Exposure: Important Information For Pesticide Applicators V0246

Discusses the development of better equipment and more efficient methods of application for protecting ourselves from exposure to pesticides. If pesticides are used improperly they have the potential of causing severe health problems even death. Identifies how and where exposure occurs, Personal Protective Equipment (PPE), and proper methods of application. (Department of Agriculture, Pesticide Management Division) 14 min. c1993

Protective Clothing (CC) V0503

The four levels of protective clothing, per EPA definitions, are defined and illustrated. Gives tips on inspecting high level protective

clothing. Also shows and discusses use of accessories such as helmets, aprons, gloves, goggles, and footwear. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 12 min. Safety Watch Series c1996

Put'er There! V0125

Presents four excellent reasons to learn and use directional felling techniques: profit, save time, save wood, and prevent injury. Reveals that the techniques demonstrated share five important felling rules and keys to successful felling. (Northern Woods Safety Foundation) 22 min. c1989

Putting Your Best Foot Forward (Humorous) V0103

Illustrates the common sense approach to combating accidents caused by slips and falls in three different work environments; office, warehouse outdoors, and in the parking lot. Some animation. (Coronet/MTI Film & Video) 16 min. c1988

Que es lo que debe de Saber de su Reclamo - (Abiertos Subtitulados) (Making Claims Work (Open Captioned) V0530

Designed to inform injured workers about the workers' compensation claims process. Discusses what injured workers covered by the State Fund can expect from the Washington State Department of Labor and Industries and what the department expects from them. Stresses the partnership between the workers, employers, providers and the department necessary to help return workers to their jobs. Open Caption. (Department of Labor and Industries, State of Washington) 12 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1996

Rapid Intervention Teams / Firefighter Survival Series: Part 1 V0821

Every citizen expects firefighters to come to the rescue, but what happens when firefighters get in trouble? Rapid intervention or FAST teams are an answer to that question. Covers: What rapid intervention teams are; Why and when they are needed;

and, How department's can begin to think about how to deploy them. Segment 1 covers such issues as what causes firefighter fatalities and various definitions of the rapid intervention concept. Segment 2 covers a review of specific tools that are used by many RIT units and staffing issues. Segment 3 focuses on basic training. Segment 4 features a demonstration of a thermal imaging camera. Segment 5 takes the classroom training to the fireground for a live burn simulation. (Working Fire Emergency Training Systems) 54 min. Hands-On" R.I.T./Firefighter Survival Series 133

Rapid Intervention Teams / Firefighter Survival Series: Part 2 V0822 Segment 1:

Air-pack bottle change-overs, demonstrates how to change air bottles on-scene using both MSA and MMR air pack systems. Segment 2: Auxiliary Air Lines, demonstrates additional information regarding air pack air lines and additional ways to receive air. Segment 3: PASS devices, reviews the major types and discusses their employment. Segment 4: Two-person search, demonstrates a two-person search without using a lifeline, where a downed firefighter is located and his/her device is disarmed. Segment 5: Four-person search, discusses the merits of 2- vs. 4-person searches, a 4-person search locates a downed firefighter, using a search rope. Emphasis in this scenario is on the deployment and management of team members by the team leader who must direct team members to perform different tasks." (Working Fire Emergency Training Systems) 49 min. c1998 "Hands-On" R.I.T./Firefighter Survival Series c1997

Rapid Intervention Teams / Firefighter Survival Series: Part 3 V0823

Segment 1: Station drills, covers three basic skill stations: Entanglement station; Air Bag Procedures Station; and Hydraulic tools station. Segment 2: Interior breaching station, which demonstrates techniques for reaching an inaccessible victim or saving oneself in the event of a collapse or some similar structural event. Segment 3: Exterior

breaching, in the event an of trying interior egress point cannot be found or should a firefighter run low on air, breaching an exterior all can be a lifesaving move. Segment 4: Air Pack Removal, once a breach is made, firefighters may have to pass through wall joists or building supports, necessitating the removal of their air pack in order to fit through. Techniques to do this move correctly are covered. (Working Fire Emergency Training Systems) 46 min. c1994

Rapid Intervention Teams / Firefighter Survival Series: Part 4

V0824 Segment 1: Enlarged opening technique, demonstrates how to enlarge a currently existing opening such as a window or how to create a new opening in an exterior wall for expedited revival of a fallen firefighter or citizen victim. Segment 2: Scenario briefing, covers: Pre-scenario briefing, Live scenario, and Post-scenario critique. Segment 3: Mini-course for college credit, outlines the various ways firefighters can acquire continuing education toward a degree in fire science. (Working Fire Emergency Training Systems) 58 min. c1998

Rappelling V0583

A rescue worker trained in rappelling techniques is often the only one able to reach a victim trapped in a high or awkward position. Detailed directions about this crucial skill are spelled out in this video program. Covers: Bottom/body belays; Safety-line belays; Equipment; Prusik knots/ Munter hitches; Rappelling procedures; and Safety precautions/emergency procedures. (Coastal Video Communications Corp.) 15 min. c1995

RCRA Large Quantity Generators: A Commitment To The Future V0584

Defines large quantity generator. Covers hazardous waste activity notification, waste accumulation and storage requirements, transportation procedures, setting up a waste minimization program, and emergency plans/recordkeeping. (Coastal Video Communications Corp.) 24 min. c1994

Real Key To Crane Safety V0261

Reviews safety procedures for various mobile cranes, the importance of operator training on specific cranes; preparation and pre-inspections, and performing safe lifts. Intended for use as a training supplement or review of safe crane operation practices. (Grove Worldwide Company) 22 min. c1993

Real, Real Life: Personal Protective Equipment (CC) V0711

Overview of all types of PPE with an emphasis on safety awareness and attitude. (Coastal Video Communications Corp.) 16 min. Real Life Series c1997

Recognition Evaluation And Control Of Hazards V0678

The fundamental principal behind any occupational health and safety program should be the control of hazards. Any program that does not have the control of hazards at its core is doomed to produce poor results. This program's object is to examine the options available and suggest strategies that can be used in all work places. Areas covered are: Recognition; Evaluation; and Control. With the control measure the following points are covered: Elimination; Substitution; Administrative controls; Engineering controls; and Personal protective equipment. (Safetycare, Inc.) 14 min. c1991

Recognizing Sudden Illness V0075

Subject matters covered are: Appendicitis; Heart attack; Diabetic emergency; Stroke; Fever; Dizziness; Fainting; High temperatures; and Convulsions. (Primedia Workplace Learning, Tel-A-Train, Inc.) 14 min. c1988

Recreational Safety V0226

Emphasizes the importance of performing warm-up exercises, using the right type of equipment, and wearing suitable clothing. Provides safety rules for hiking, climbing, and other sports activities, and demonstrates

Pro Driving Tactics (Washington Version) V0274

Drivers can protect themselves from the hazardous actions of others by learning to use pro driving tactics of space and time. Tactics shown in this film include: Maintaining a space shield and a clear field of vision; Developing perceptions of potential hazards; Using proper eye movement; Getting other drivers' attention. Each tactic is demonstrated in a situation related to a common accident cause. (AIMS Media) 15 min. c1978

Pro-Active Safety: The Self-Inspection V0582

Teach employees how to stay safe and healthy by teaching them how to keep an eye out for danger signals on the job. Covers: Identification; Assessment; Intervention; Maintenance; Task exposure analysis; Self-inspection during the maintenance step; and Making the most of self-inspections. (Coastal Video Communications Corp.) 15 min. c1996

Pro-Active Safety: The Total Quality Approach (CC) V0735

Covers the five keys to a pro-active attitude toward safety awareness: Taking a pro-active position of safety awareness that everyone can work safely and accidents don't have to happen; Looking at safety as an ongoing continuous improvement process rather than just another program; Having the support of management at every level; Safety training is important both at the entry level and on the job by the supervisor; and Safety committees and job safety analysis both play a pro-active role in spotting potential hazards upfront before its too late. (Coastal Video Communications Corp.) 18 min. c1993

Pro-Active Safety Attitudes: Looking Out For Number One (CC) V0580

Takes a unique look at safety and safety training. Underscores the importance of safety and safety training, the importance of safety equipment, safety habits, and demands that all employees take personal responsibility for safety. Covers: Showing how safety affects workers and their families;

Re-enactments of real-life accidents motivating workers to take precautions; and Contains interviews with actual workers. (Coastal Video Communications Corp.) 15 min. c1994

Pro-Active Safety Attitudes: Target Zero (CC) V0651

Pro-active safety - the aggressive pursuit of Zero Accidents in the workplace - relies not only on knowledge of safe operating procedures and principles, but also in the right attitude among all workers. The right way to foster the right attitude is through leadership. The attributes found in a good leader can be found or developed by anyone who has caught the vision of Zero Accidents. Covers: Vision and initiative; Creating expectations; Accident prevention; Building trust; and Maintaining leadership. (Coastal Video Communications Corp.) 18 min. c1996

VIDEO TIP:

*You'll receive your videos 1-2
working days before your
show date.
Call us if they
don't.*

Pro-Active Safety Committee: A Team for Success (CC) [non CC V0581] V0885

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for effective safety committee. Viewers also get an inside look at how some of the country's most successful safety teams work, giving them ideas they can bring to their own workplace. (Coastal Video Communications Corp.) 13 min. c1996

Pro-Active Safety Committee: A Team For Success (See V0885 CC) V0581

Using the analogy of a football team, this program focuses on the purpose, organization, and operation of a successful safety committee. Details the essential elements necessary for effective safety committee. (Coastal Video Communications Corp.) 13 min. c1995

Process Safety Management: It's Just Good Business V0265

Provides an overview of OSHA's new Process Safety Standard to help companies with their compliance efforts. The key aspect of the Standard are described and examples are shown. This valuable tool enables managers, supervisors and other plant personnel to understand their responsibilities under the law. (Primedia Workplace Learning, Industrial Training Systems Corporation) 27 min. c1992

Process Safety Management: Process Safety Information V0191

Gives detailed information about how to gather process safety information which will be used in a process hazard analysis. Provides practical information about the types of information which must be gathered and where to get it. (Visionquest Films) 17 min. c1993

Professional Fleet Driver: Safe Operation Of Company Vehicles V0294

Teaches safe driving skills to professional drivers. (Kinetic Inc.) 15 min. c1988

Professional Fleet Drivers: Proper Driver Attitude V0285

Designed to be administered with groups of drivers at a regional or district meeting, and to teach drivers to overcome attitude problems and develop instead a safe professional attitude. (Kinetic Inc.) 15 min. c1989

proper procedures for using trailers, motor homes, and recreational vehicles. Includes first aid tips and a list of organizations to consult for information on recreational safety issues. (AIMS Media) 20 min. c1988

Recreational Safety: On Milligan's Island (CC) V0522

Milligan, Chipper, the Protector, and Kerri Jan discuss how recreational activities on "Milligan's Island" can pose the same types of hazards as found in the work environment. Covers PPE and basic safety practices. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1996

Reducing The Risk V0796

Hepatitis B is a potential killer. The debilitating illness, lengthy recovery process, and painful disruption to professional and personal life that they experienced by infected workers can now be avoided. (SmithKline Beckman Corp.) 13 min. c1988

Reglas de Estándar para la Protección de Trabajador (EPA Worker Protection Standard (WPS) Rules) (Spanish/English Version) V0749

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. (Department of Consumer

Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 36 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1996

Reglas del Estándar para la Protección del Trabajador (EPA Worker Protection Standard (WPS) Rules) V0748

For orchard workers not directly involved with pesticide handling, this program covers the basics of the worker protection standard, including the nature and use of pesticides, restricted entry intervals (REI's), safe work practices to avoid exposure, symptoms of exposure, and what to do in case of exposure. (Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 20 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1996

Remember Charlie V0707

Remember Charlie is a story of an Exxon refinery worker who was critically injured in an explosion that burned 45% of his body. Those who hear him speak discard their attitudes of "accidents don't happen to me" and "safety is management's responsibility" and take personal responsibility for their own safety and the safety of their co-workers. (Summit Training Source, Inc.) 56 min. c1994

Rescue BBP:

Nothing To Fear V0652

Covers: The risk of exposure; AIDS and Hepatitis B; Transmission of bloodborne diseases; Transmission of BBPs in the workplace; Minimizing your exposure risk; Precautions you can take; Preventive work practices; Protective barriers; and CPR. (Coastal Video Communications Corp.) 22 min. c1997

Residential Construction (6 video set) V0816

Contains the first six Dept. of Labor and Industries "Residential Construction Series" videos: Residential Construction – Roofing Safety (V0737); Residential Construction –

Roofing Safety (Spanish Version) (La Seguridad En El Techado) (V0785); Residential Construction – Siding Safety (V0811); and Residential Construction – Siding Safety (Spanish Version) (La Seguridad En El Acabado De Tablas De Forro, Tambien Conocido Como "Siding") (V0813); Framing Safety (V0850); Framing Safety (Spanish) (V0851) For descriptions of each segment, refer to specific titles and title numbers as listed here. These videos were produced by the department and are not copyrighted. You may make a copy of them for your convenience or send a blank video (VHS 160) and we will make a copy for you. (Department of Labor and Industries, State of Washington) 52 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1999

Residential Construction - Siding Safety V0811

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs & safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. (Department of Labor and Industries, State of Washington) 13 min. Residential Construction Series. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. 1999

Residential Construction - Siding Safety (Spanish Version) (La Seguridad En El Acabado De Tablas De Forro, Tambien Conocido Como "Siding" V0813

Dedicated to the residential construction workforce. Provides examples of ways to meet safety requirements. Includes Safety programs & safety meetings; First aid training and kits; and PPE. Discusses: Job prep; Walk-around safety inspection; Setup and siding; Ladder safety/safe access; Scaffold safety; and Job completion. (Department of Labor and Industries, State of Washington) 13 min. Residential

Construction Series. *Permission is granted to duplicate this tape in its entirety only for non-commercial purposes. 1999

Residential Construction: Roofing Safety V0737

Focus on residential construction workplace safety. Covers job prep, walk-around safety inspection, ladder safety/safe access, fall protection, roofing hazards, and job completion housekeeping. (Department of Labor and Industries, State of Washington) 13 min. Residential Construction Series.

*Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1999

Residential Construction: Framing Safety V0850

Intended for training general contractors, sub contractors, carpenters, and framers, this program provides examples of acceptable and effective safe work practices. Key points: Safety preparations; Guardrails; Raising walls; Rolling trusses; and Roof sheeting. Accompanying written materials & web version available at: www.LNI.wa.gov/wisha/videos (Department of Labor and Industries, State of Washington) 13 min Residential Construction Series.

*Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c2000

Resource Conservation and Recovery Act (CC) V0624

The concept "cradle to grave" implies that the producer is responsible for hazardous waste throughout a chemical's life and to its final disposition. RCRA was first established in 1977, but due to increased public pressure the Hazardous Solid Waste Amendment Act of 1984 amended RCRA and added additional requirements for the treatment, storage and disposal of hazardous waste. Facilities that generate less than 1,000 kg of hazardous waste a month are defined as "small quantity generators" and are exempt from most RCRA requirements. "Large quantity generators" are required to maintain waste in DOT approved containers and must maintain rigid requirements for storage and shipping. Suggested to

supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1997

Respirator Care and Use (CC) V0600

A respirator is not any good to you if it's not maintained properly and cared for on a daily basis. Just wearing a respirator isn't enough, you need to wear the right respirator for the work being performed. You must have a good fit, and the respirator should be well maintained. If you consistently followed these rules, than your respirator can perform the job it was designed to do: protect you from airborne contaminants. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series c1996

Respirator Fit Testing Face It V0498

Use of a respirator is vital to your employees' survival in oxygen-deficient or toxic atmospheres. Gives employees a solid understanding of the different types of respirators, while demonstrating the proper care and fitting of respirators. Covers: Respiratory protection; How the lungs work; Respiratory hazards; Types of respirators; Fitting a respirator; and • Inspection, cleaning, and storage. (Coastal Video Communications Corp.) 18 min. c1995

Respirator Maintenance [Also available on V0384] V0367

Covers the essential components of thorough inspection, cleaning, maintaining, and proper storage of respirators. Emphasizes the need for inspections before and after each use and demonstrates what to look for in these inspections. (Primedia Workplace Learning, Safety Watch) 6 min. Safety Watch Series Vol. 1, no. 7 Segment 1 c1994

Respiratory Protection [Also available on V0378] V0344

Reviews characteristics of air-supplied respirators and air-purifying respirators, shows steps for inspecting respirators for proper fit and function. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series

Vol. 1, no. 1 Segment 2 c1994

Respiratory Protection: Air Purifying Respirators V0163

Provides specific information on air purifying respirators, including their advantages and limitations, the basic types and styles, and the various parts of a respirator. Proper use, storage and maintenance are emphasized. Step-by-step donning instructions and the importance of fit testing are demonstrated. (Industrial Training, Inc.) 18 min. c1991

Respiratory Protection: Air Purifying Respirators (Revised 1998) V0724

Deals with the application of air purifying respirators in a respiratory protection program. Trains employees in selection, fit testing, function, limitations and maintenance. (Summit Training Source, Inc.) 10 min. c1998

Respiratory Protection: Air Supplying Respirators (Revised 1998) V0725

Step-by-step workers learn the importance of protecting their respiratory system from dangerous contaminants and oxygen deficient environments. Covers types of air supplying respirators, qualitative and quantitative fit testing, correct use, inspection, maintenance and storage, and respirators limitations.. (Summit Training Source, Inc.) 11 min. c1998

Respiratory Protection: The Invisible Hazard (Revised 1998) V0723

Trains workers to respect potential respiratory hazards and motivates them to use the proper equipment. Describes types of respirators and their functions, and the importance of qualitative and quantitative fit testing. (Summit Training Source, Inc.) 12 min. c1998

Respiratory Protection Another World V0499

When respiratory protection is needed, be sure to use the right respirator for each job. Covers: Introduction; Your lungs and how

they work; Respiratory hazards; Types of respirators; Emergency use of respirators; Respirator fit testing; Respirator maintenance; Inspections; Decontamination; and Storage. (Coastal Video Communications Corp.) 19 min. c1995

Respire Fácilmente (Breathe Easy) V0760

A training video covering respiratory protection for workers in nurseries. Shows you: How to select the proper respirator for the job; Demonstrates how to test for the proper fit; Maintenance procedures; and How to identify the proper respirator storage. (Department of Consumer Business & Services, Oregon OSHA, Oregon Association of Nurserymen, Inc.) 19 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1994

Retail Employee Safety V0658

Individual awareness and elimination of unsafe acts will help your employees achieve a great safety record. Highlights: Retail hazards; Slips and falls hazards; Broken glass, pins and scissors; Cardboard cutting safety; Ladder, stair and escalator safety; Electrical and fire safety; Safe stocking practices; and Accidents & emergencies. (Long Island Productions) 16 min. c1995

Reversing The Trend: Driver Compliance V0268

Designed to assist you in your compliance with OSHA's Occupant Protection in Motor Vehicle standard. Teaches employees safe driving techniques, driving in hazardous conditions, skid control techniques, safe distances, the adverse effects of alcohol and seatbelt safety. (Summit Training Source, Inc.) 19 min. c1992

Rigging And Landing Safety For Managers And Supervisors V0082

Covers improving safety in Alaska's timber and logging industry. The manager's responsibility for the logging crew's safety is emphasized. Discusses: Reducing accidents; Management must commit to employee safety in-doctrination and employee training

and policies; Policies must be enforced; Personal Protective Equipment; and Safety Hazards. Specific safety tips for landing and rigging are given. (Department of Labor, Kansas State University) 20 min. c1988

Rigging Safety: Selection & Care Of Rigging Equipment V0121

Introduces slings and hardware commonly used for overhead lifting in industrial situations. The program covers characteristics of the equipment and proper care and handling to protect the equipment from damage. (Primedia Workplace Learning, Tel-A-Train, Inc.) 15 min. c1989

Right Move V0033

Using work situations as background, the basic principles of good movement are explained, then shown in practice. Covers proper lifting techniques, carrying, pushing, and pulling. (Capital Communications) 20 min. c1987

Right To Know: Workers & The Community (CC) [Also available on V0474] V0476

In an old television sitcom format describes how your local Emergency Planning Committee can tell you what chemicals are in the community and how to respond to a chemical emergency. Companies must provide MSDS's to the local fire departments on all chemicals that meet or exceed the EPA's threshold reporting criteria. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series Vol. 2, no. 8 Segment 2 c1995

Risky Business (Humorous) V0093

A hilarious look at the serious business of office safety. Entertaining yet informative format. A stuntman poses as an office worker to expose hazards in the office through the course of a routine day. (CoreMedia Training Solutions) 20 min. c1989

Road Rage V0817

Identifies the term road rage and potential hazards. Gives steps for reducing the risk and what actions to take if confronted by an aggressive driver. (Summit Training Source, Inc.) 16 min. c1999

Road Rage: Combating Aggressive Driving in Washington State V0856

Law enforcement officers across Washington state are using innovative approaches to combat increasing acts of road rage and aggressive driving. Viewers learn the consequences of road rage, plus driving strategies to employ when encountering aggressive driving. (Washington Traffic Safety Commission) 11 min. Available from WTSC on request. c2000

Road Rage And Aggressive Driving: A View From The Driver's Seat V0809

Hosted by Maury Hannigan, Commissioner Emeritus, California Highway Patrol. Addresses road rage from the perspective of the driver. Gives tips for preventing highway violence. (American Training Resources, Inc.) 20 min. c1998

Safe And Awake V0062

Using humor as a vehicle for motivating employees, this video demonstrates lifting techniques, good housekeeping habits, and a proper attitude. Industrial work environment. (Long Island Productions) 15 min. c1981

Safe And Effective Grinding V0218

Shows how to operate an off-hand grinding machine safely and efficiently. Includes: Types of grinding machines; Components which make up a grinding machine; Types of abrasive wheels; Abrasive wheel identification; Inspecting and abrasive wheels; Fitting a new wheel; Personal safety; Dressing and truing abrasive wheels; How to use an off-hand grinding machine; and Sharpening a twist drill. (Safetycare, Inc.) 18 min. Skills Education Series c1991

***Safe Driving [Also available on V0379] V0350***

One important key to safe driving is being prepared for emergencies by inspecting your vehicle and following simple maintenance routines. Another important key is by using all your senses, especially eyes, to constantly monitor for safe driving conditions. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. c1994

Safe Driving In Hazardous Conditions V0270

Defines techniques for driving in rain, fog, snow and ice. (Primedia Workplace Learning, Tel-A-Train, Inc.) 17 min. c1991

Safe Driving On Freeways V0687

Driving tips covered are: Carry a license, registration and insurance certification; and Accident kit, spare tire, and emergency first aid supplies. Also includes: Right, middle, and left lane definition; The three-second rule; and Consequences of driving under the influence. (Long Island Productions) 8 min. BITE Videos c1997

Safe Handling Of Gases V0203

Compressed gas cylinders supply a wide variety of gases for a multitude of different industrial, medical, and domestic purposes. Covers: types, hazards safe handling and storage of gases; transportation; leak testing; emergency procedures; and Material Safety Data Sheets. (Safetycare, Inc.) 19 min. c1992

Safe Handling Of Pesticides V0114

Focusing on hazardous chemical and physical agents used on farms, in nurseries, and floral industries, this program is designed to assure compliance with the Federal and State Right To Know legislation. Covers the various types of pesticides and their related hazards. Special handling procedures and first aid are reviewed. (Comprehensive Loss Management, Inc.) 15 min. c1985

Safe Lift Truck Operation V0281

Designed to help meet OSHA requirements for operator training. Stresses the importance of an attitude of safety when operating a lift truck. Covers: lift truck types and characteristics, lift truck controls and their functions; operating principles of lift trucks and how they affect safety and stability; driver responsibilities for personnel and material safety; safe lift truck driving practices; moving on ramps; loading dock procedures; methods of lifting, moving, and handling loads; and refueling procedures. (Industrial Training, Inc.) 24 min. c1989

Safe Lifting [Also available on V0378] V0346

Compares good and bad lifting techniques. Gives step-by-step instructions for safe lifting, beginning with assessing the situation and proceeding through the carrying and setting down stages. Illustrates correct positioning and shows importance of determining how much can be lifted safely and how high differently weighted items can be lifted safely. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 1 Segment 4 c1994

Safe Lifting For The Trucking & Warehouse Industry V0665

Consistent care of the back, including safe lifting, is essential to prevent disk degeneration, the cause of 70% of all back injuries. Covers: Back mechanics: structure and function; Lifting principles and techniques: load and counterload, 10 to 1 ratio, palm grip, load in close, leg power; and Techniques for awkward positions. (Long Island Productions) 9 min. c1996

Safe Lifting in the Warehouse V0852

Purpose: to prevent back injury in the warehouse environment by using proper lifting techniques, back exercises, warmups, and stretching. Various solutions in brief scenarios. Risk Analysis and suggested workstation modification. (VOCAMM) 22 min c1998

Safe Operation Of Overhead Cranes V0585

Crane accidents can occur and if they do happen they can be tragic and attributed to operator error and the failure to adhere to safe work procedures. Discusses: Lack of adequate inspections and checks; Overloading the crane beyond recommended capacities; and Lack of knowledge of critical information by the operator. Covers the five major steps that must be used to insure safe use of overhead cranes: Pre-operational check; Operational checks; Planning the lift; Operational rules; and The Shutdown procedures. (Safetycare, Inc.) 17 min. c1995

Safe Patient Lifting V0089

Paced for viewer input, this program is concerned with techniques for lifting and transferring patients. For health-care workers. (Center for Training and Development, State Compensation Fund) 17 min. c1989

Safe Tractor And Machinery Operation V0322

Topics include: Proper clothing and footwear for tractor operation; Maintaining alertness through proper sleep and nutrition; Pre-operation safety checks; Proper mounting/dismounting procedures; and Other principles of safe tractor operation. (Videotaped at a live seminar). Spanish Version V0323 (University of Florida, IFAS Publications) 33 min. c1992

Safe Use Of Hand Trucks, Dollies, And Pallet Jacks V0586

Demonstrates safe use of hand trucks, large-item hand trucks, drum handlers, piano & furniture dollies, pallet trucks and jacks, platform trucks, and service carts. Includes procedures for loading, operating and moving large items. (Media Resources Inc.) 20 min. c1992

Safe Winter Driving V0339

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Topics include basic

emergency equipment, rain, snow and icy conditions, what to do when stopped and stranded. (Coastal Video Communications Corp.) 17 min. c1993

Safe Workstation Is No Accident V0254

By following these guidelines, you can create a comfortable working environment and help reduce the risks of serious body aches, eyestrain, and even debilitating conditions. (Executect Office Services, Inc.) 14 min. c1993

Safer State at .08: Washington's New Drunk Driving Laws V0857

The legal blood alcohol limit has been reduced to .08 for drivers in Washington. Other Washington Laws include tougher penalties for repeat DUI offenders, fines, and the possibility of doing jail time or being subjected to home monitoring. (Washington Traffic Safety Commission) 10 min. Available from WTSC on request. c1999

Safety - Everyone's Responsibility (Charlie Morecraft) V0918

Keynote speaker to Governor's Safety Conference 2000 and 2001, Charlie Morecraft, motivates workers and management to work as a team to create a safer work environment. Charlie is dynamic in inspiring viewers to take responsibility for their own actions and their own safety, because it affects to lives of everyone around them. Powerful follow up to "Remember Charlie" V0707. (Phoenix Safety Management) 48 min. 1995

Safety By Design Ergonomics V0119

Intended for supervisors or safety officers in the industrial work environment, this program focuses on the impact of system and environmental design on daily work tasks. A training sequence on workplace assessment is included. Shows common sense solutions by utilizing ergonomic observation and interviewing techniques. (CoreMedia Training Solutions) 13 min. c1989

Safety Committee: Problem Or Solution? V0532

Designed to provide all safety committee members with techniques and procedures necessary to improve a safety committee. Demonstrates the effects of an unorganized safety meeting and offers suggestions for improvement. Outlines the functions and benefits of a safety committee, suggests ways to build committee members' confidence, and indicates procedures to follow in planning and conducting a successful safety meeting. (Primedia Workplace Learning, Industrial Training Systems Corporation) 31 min. c1993

Safety Committee Participation: A Safety Carol [Also available on V0469] V0470

The Ghost of Safety Committees Past arrives after the members of the safety committee die of boredom. Get leadership tips for making the safety meetings become alive and productive. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 7 Segment 1 c1995

Safety First: Safety Is Important (English Version) V0756

(Pictograms For The Food Processing Plant) A pictogram and video project developed to reduce the number of food processing plant accidents that occur due to non-English speaking employees' inability to read and understand hazard warning signs and literature. (Department of Consumer Business & Services, Oregon OSHA, Northwest Food Processors Association) 5 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Safety for Sale : The Role of Incentives in Safety Culture V0832

Explains the elements of a strong safety culture, how to elevate the strengths and weaknesses of incentive programs; tells how incentive programs can reinforce or undermine safety culture; and motivates

viewers to explore changes to incentive programs. (Coastal Video Communications Corp.) 28 min c1998

Safety Gear: Foot Protection V0099

Narrated by Martin Kove, this program explains proper safety shoes and their applications in both light and heavy industry. (AIMS Media) 11 min. c1989

Safety Guidelines For Tube & Clamp/System Scaffolds V0141

An instructional tool for learning the basic safety guidelines for using, erecting, and dismantling tube and clamp/system scaffolds. (Scaffold Industry Association) 20 min. c1991

Safety In The Nursery Industry V0325

Encourages employers in the nursery industry to develop safety programs for their operations. Details the basics required to set up an effective safety program and highlights areas that employers should consider for safety enhancement. (Farm Safety Association, Inc.) 9 min. c1989

Safety In The Warehouse Operations V0280

Awareness training for anyone working in a warehousing environment. Reviews safety precautions for employees working in a warehouse environment where forklifts are operating, at shipping / receiving docks. (Long Island Productions) 10 min. c1993

Safety Magazine Presents: The Use And Care Of Personal Protective Equipment V0459

Monica Burdern and Kacy Phillips do a little investigative reporting for Safety Magazine on PPE (Personal Protective Equipment) by touring a safety supply store. Training designed to provide employees with an overview of PPE is, its importance, and proper use. Key points covered are Personal Protective Equipment, Head Safety, Eye Safety, Ear Safety, Clothing, Hand Safety, Foot Safety, Respirators, and a general wrap-up. (29 CFR 1910.132) (CoreMedia Training Solutions) 26 min. c1994

***Safety Meetings:
Give 'em What They Want (CC)
V0919***

Shows managers and team leaders the elements of safety meetings. Gives tips on presentations, planning meetings, and adult learning. (Coastal Video Communications Corp.) 15 min. 2000

***Safety On The Job: Accident
Causes And Prevention V0243***

A series of dramatizations in the manufacturing work environment show how a person's mental or physical condition can affect on-the-job performance and lead to accidents. The program stresses that identification or risk-producing behaviors can reduce the chance of injury. Illustrates warning signs that staff and supervisors should be alert to and notes that employee assistance programs may be available to provide help or advice. Spanish version V0229. (AIMS Media) 16 min. c1984

***Safety On The Job:
Accident Causes And Prevention
(2nd edition) V0164***

The factors of stress, negligence, recklessness, over-exertion, and fatigue are explored in this program. Promotes identification or risk-producing behaviors can reduce the chance of injury. Illustrates warning signs to alert staff and supervisors. (AIMS Media) 16 min. c1991

***Safety On The Job:
Fire Extinguishers V0230***

Shows the four different types of fires and fire extinguishers and the five main types of extinguishing agents. Instructions for safe operation of extinguishers and other fire emergency procedures. Spanish version V0231. (AIMS Media) 23 min. c1987

***Safety On The Job:
First Aid For Accidents V0019***

Through a series of vignettes, illustrates first aid treatment of some of the most serious accidents occurring in the workplace. The injuries include broken legs, broken backs, bleeding, head wounds, burns and electric shock requiring CPR. (AIMS Media) 20 min. c1985

***Safety On The Job: Forklift
Operation (CC) (For non CC
version see: V0182) V0786***

Basic safety procedures covered are proper techniques for: pre-check; stopping and driving in reverse; stacking loads; carrying loads up and down a grade; lowering loads; and handling emergency situations. Spanish version V0233 (AIMS Media) 19 min. c1988

***Safety On The Job:
Forklift Operation
(For CC see: V0786) V0182***

Basic safety procedures covered are proper techniques for: pre-check; stopping and driving in reverse; stacking loads; carrying loads up and down a grade; lowering loads; and handling emergency situations. (AIMS Media) 19 min. c1988

***Safety On The Job:
Manual Load Handling In The
Warehouse V0133***

About two-thirds of warehouse injuries are caused by improperly lifting, carrying, or handling materials. Describes how to correctly inspect a load. Provides safety rules for using special tools in the warehouse. (AIMS Media) 12 min. c1990

***Safety On The Job: Powered
Equipment In The Warehouse
V0134***

Proper techniques for handling equipment on loading docks are illustrated including checking trailer wheels, inspecting dock boards, working inside a rail car, and operating forklifts. Safety rules for stacking and picking orders are reviewed as well as tips for the safe operation of hoists and conveyors. Motivates workers to wear personal protective equipment that is appropriate for the job and safety precautions to take around chemicals in the warehouse. (AIMS Media) 12 min. c1990

***Safety On The Job:
Preventing Back Injury V0234***

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Dated, but classic. Spanish version V0235 (AIMS Media) 24 min. c1987

VIDEO TIP:

*Don't forget the
10 day notice requirement
which means you have to order at
least ten days before you want to
show your videos.*

***Safety On The Job:
Slips Trips & Falls V0027***

Concise narration and dramatic vignettes teach employees and supervisors how to eliminate the causes of falls, and to cooperate in correcting or reporting hazards. (AIMS Media) 17 min. c1985

***Safety On The Job:
The Air-Purifying Respirator
(CC) V0165***

Dramatizes several situations in which workers risk their lives by using air-purifying respirators improperly. Each person is breaking one of the cardinal rules of safe respirator use: The functions of the three types of air-purifying respirators are described and explained in this program. (AIMS Media) 13 min. c1988

***Safety On The Job:
The Air-Supplied Respirator
V0237***

Explains the air-supplied respirator, the different kinds of respirators, how they work, and the situations each type is designed for. Shows step-by-step rules for using air-supplied respirators. Spanish version V0236 (AIMS Media) 12 min. c1988

***Safety On The Job:
The Hazards Of Substance
Abuse V0044***

The program shows how alcohol and other drugs impair coordination and perception and can cause workers to make risky choices, endangering the life of the substance abuser and the lives and limbs of co-workers. (AIMS Media) 18 min. c1984

***Safety On The Job:
Van And Truck Driving V0239***

The program teaches drivers the fundamentals of pro-driving procedures habits that anyone who drives for a living should adopt. Stresses safety attitude. Spanish Version V0240. (AIMS Media) 23 min. c1986

***Safety On The Job : Working On
Aerial Lifts, Cranes, And Swing
Stages V0166***

Shows workers how to safely operate aerial lifts, cranes, and swing stages. Details the importance of pre- inspecting aerial equipment each work day, warming up engine and hydraulic systems before operation, maintaining safe clearance from electrical current, wearing hard hats and other safety gear. Shows safe entry and exit procedures of aerial equipment, and demonstrates proper ground-to-equipment hand signals. (AIMS Media) 15 min. c1988

***Safety On The Job: Working On
Ladders, Poles, And Scaffolds
(CC) V0167***

Covers safety precautions: choosing the right ladder for the job; setting up; inspecting; climbing and descending equipment properly; and calculating weight capacity of

the equipment. The dangers of substance use when working off the ground are also discussed. (AIMS Media) 15 min. c1988

***Safety On The Job: Working
With Electricity V0241***

Details the hazards associated with using electricity on the job and illustrates the importance of knowing standard procedures for common electrical problems. Common hazards explored in this program: insufficient wire insulation, faulty breakers, dirty casings, overloaded outlets, and work with power tools around water. Fundamental OSHA regulations are reviewed, along with the absolute necessity for all employees to be advised of their company's safety procedures in the event of an electrical fire. Work environments include warehouses, manufacturing plants, and construction areas. (AIMS Media) 16 min. c1989

***Safety On The Job:
Working With Machinery V0168***

Procedures are shown to safeguard against injury from forklifts and machinery that shears, rotates, presses, or grabs. Demonstrates possible results of failure to take proper safety precautions. (AIMS Media) 17 min. c1986

Safety On Trial V0485

Developed to assist project superintendents and project managers in the difficult tasks of establishing work rules to prevent violations of safety and health regulations and to communicate these rules to their employees. This video assists the general contractor on multiemployer worksites to better understand their roles and responsibilities toward worker safety including the employees of subcontractors. Dramatically demonstrates how seemingly small incidents on a construction site can devastatingly alter one worker's life and that of his family. (Washington Construction Safety Task Force) 35 min. c1994

Safety Orientation V0587

New employee orientation, industrial work environment. Topics include responsibilities, warning signs, hazard communication, process systems, machine guards, lockout/

tagout, forklift & pallets, housekeeping, emergency eyewash and shower stations reporting injuries, work permits, emergencies and prohibited activities. (Visionquest Films) 14 min. c1996

***Safety Orientation:
Don't Be a Zombie (CC) V0772***

Spooky Dramatization; industrial setting. Covers: PPE; Back injuries; Slips, trips and falls; Hazard communication; Bloodborne pathogens; Lockout-tagout; and Fire safety. (Coastal Video Communications Corp.) 23 min. c1996

***Safety Orientation: It Takes A
Winning Attitude V0588***

Reviews safety procedures to protect employees from the most common industrial hazards Topics outlined: Hazard communication; Lockout/tagout; Bloodborne pathogens; Personal protective equipment; Back safety; and Fire safety. (Coastal Video Communications Corp.) 18 min. c1996

***Safety Orientation
[Construction] V0688***

Short overview program covering: Drug and alcohol prohibition on the jobsite; Review of MSDS; PPE; Proper ladder usage; Slips, trips and falls; and Accident and injuries. (Long Island Productions) 5 min. BITE Videos c1997

***Safety Orientation [Employee]
V0689***

An overview. Covers: Avoiding accidents due to inattention or short cuts; Providing counseling, starting consequences and time allowed for behavior correction; Training and authorization required for use of equipment and chemicals; Proper PPE; Rules of fire prevention; Reporting accidents and injuries; and Prevention of back injuries. (Long Island Productions) 6 min. BITE Videos c1997

***Safety Showers & Eye Washes
V0251***

Reviews situations where safety showers/eye washes should be used and how to use them. Describes different types and how to operate,

chemical splashes, first aid, assisting a victim, and maintenance and testing. (Long Island Productions) 12 min. c1994

Safety Training For Handling And Transporting Hazardous Materials: A Safety Training Program For DOT HM-126F V0244

Safety training section of the regulation in which employees learn about: reviewing Materials Safety Data Sheets before moving hazardous materials, accident prevention, Personal protection equipment; and Emergency First Aid. (AIMS Media) 19 min. c1993

Safety Watch Series, Vol. 1, no. 1, April 1994 V0378

Contains these four segments on safety issues: WORKING IN CONFINED SPACES (V0343), RESPIRATORY PROTECTION (V0344), ELECTRICAL HAZARDS (V0345), and SAFE LIFTING (V0346). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 29 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 2, May 1994 V0379

Contains these four segments on safety issues: INTRODUCTION TO HEARING PROTECTION (V0347), FALL ARREST SYSTEMS (V0348), HAZCOM: REVIEW (V0349), and SAFE DRIVING (V0350). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 30 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 3, June 1994 V0380

Contains these four segments on safety issues: HAZCOM: LABELS AND MSDSs (V0351), HEARING PROTECTION: HCP & PPE (V0352), PORTABLE POWER TOOLS (V0353), and GROUNDS KEEPING: LAWN MOWER SAFETY (V0354). For descriptions of each segment, refer to specific titles and

title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 35 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 4, July 1994 V0381

Contains these four segments on safety issues: LADDER SAFETY (V0355), HAND PROTECTION (V0356), HAZCOM: TRAINING (V0357), and HEAT STRESS (V0358). For descriptions of each segment, refer to specific titles and title number as listed here. (Primedia Workplace Learning, Safety Watch) 31 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 5, August 1994 V0382

Contains these four segments on safety issues: EMERGENCY PREPAREDNESS (V0359), LOCKOUT/TAGOUT (V0360), INDUSTRIAL ERGONOMICS (V0361), and ASBESTOS AWARENESS (V0362). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 31 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 6, September 1994 V0383

Contains these four segments on safety issues: HAZMAT SPILLS: ARE YOU READY? (V0363), EYE PROTECTION (V0364), BACK INJURY PREVENTION (V0365), and LEAD AWARENESS (V0366). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 34 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 7, October 1994 V0384

Contains these four segments on safety issues: RESPIRATOR MAINTENANCE (V0367), BASIC FIRST AID (V0368), HAZARDOUS WASTE AWARENESS (V0369), and LOCKOUT/TAGOUT: THE BASICS (V0370). For descriptions of each segment, refer to specific titles and titles numbers as listed here. (Primedia Workplace Learning, Safety Watch) 28 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 8, November 1994 V0385

Contains these four segments on safety issues: HAZARD RECOGNITION (V0371), FOOT PROTECTION (V0372), ELECTRICAL HAZARDS: COMMON MISTAKES (V0373), and FIRE SAFETY REVIEW (V0374). For descriptions of each segment, refer to specific title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 29 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 9, December 1994 V0386

Contains these four segments on safety issues: FIRE SAFETY: EXTINGUISHERS (V0387), WHY PERMITS ARE IMPORTANT (V0388), FORKLIFT SAFETY (V0389), and WELDING AND CUTTING (V0390). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 34 min. Safety Watch Series c1994

Safety Watch Series, Vol. 1, no. 10, January 1995 V0396

Contains these four segments on safety issues: FIRST AID : HANDS AND FINGERS (V0392), PORTABLE HAND TOOLS (V0393), ELECTROMAGNETIC FIELD AWARENESS (V0394), and CONFINED SPACES : YOUR TRAINING (V0395). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 29 min. c1995

Safety Watch Series, Vol. 1, no. 11, February 1995 V0398

Contains these four segments on safety issues: SLIPS, TRIPS & FALLS (V0399), HANDLING HAZARDOUS MATERIALS (V0400), STRESS IN THE WORKPLACE (V0401), and MACHINE GUARDING (V0402). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 37 min. Safety Watch Series c1995

***Safety Watch Series, Vol. 1,
no. 12, March 1995 V0403***

Contains these four segments on safety issues: TAKE HOME TOXICS (V0404), WASTE MINIMIZATION (V0405), COLD STRESS (V0406), and COMPRESSED GAS CYLINDERS (V0407). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 26 min. Safety Watch Series c1995

***Safety Watch Series,
Vol. 2, no. 1, April 1995 V0412***

Contains these four segments on safety issues: CONTINGENCY TRAINING (V0408), FALL PROTECTION: THE BASICS (V0409), HAZCOM: USING MSDSs (V0410), and WORKPLACE VIOLENCE (V0411). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 47 min. Safety Watch Series c1995

***Safety Watch Series,
Vol. 2, no. 2, May 1995 V0413***

Contains these four segments on safety issues: OFF THE JOB SAFETY (V0414), CONFINED SPACE: USING CHEMICALS (V0415), HOUSEKEEPING FOR SAFETY (V0416), and BLOODBORNE PATHOGENS: WHAT ARE THEY? (V0417). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 41 min. (Safety Watch Series) c1995

***Safety Watch Series,
Vol. 2, no. 3, June 1995 V0419***

Contains these four segments on safety issues: HAZCOM: CORROSIVES (V0420), MAKING HEALTHY CHOICES: SAFE AND HEALTHY LIFESTYLES (V0421), ELECTRICAL MAINTENANCE (V0422), and FORKLIFT LOADING (V0423). For descriptions of each segment, refer to specific titles numbers as listed here. (Primedia Workplace Learning, Safety Watch) 38 min. (Safety Watch Series) c1995

***Safety Watch Series,
Vol. 2, no. 4, July 1995 V0424***

Contains these three segments on safety issues: HAZCOM: REDUCING EXPOSURE (V0425), BLOODBORNE PATHOGENS: PROTECTING YOURSELF (V0426), and UNDER THE INFLUENCE: ALCOHOL IN THE WORKPLACE (V0427). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 26 min. (Safety Watch Series) c1995

***Safety Watch Series,
Vol. 2, no. 5, August 1995
V0451***

Contains these four segments: CONFLICT RESOLUTION (V0452), SMOKING AT WORK (V0453), HEAD PROTECTION (V0454), and LOCKOUT/TAGOUT: JUST DO IT (V0455). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 30 min. (Safety Watch Series) c1995

***Safety Watch Series,
Vol. 2, no. 6, September 1995
V0464***

Contains these four segments on safety issues: PERSONAL FALL PROTECTION SYSTEMS (V0465), BLOODBORNE PATHOGENS: POST EXPOSURE FOLLOW UP (V0466), WORKPLACE SECURITY (V0467), SURVIVING THE COLD AND FLU SEASON - HUMOROUS (V0468). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 13 min. (Safety Watch Series) c1995

***Safety Watch Series,
Vol. 2, no. 7, October 1995
V0469***

Contains these four segments on safety issues: SAFETY COMMITTEE PARTICIPATION: A SAFETY CAROL (V0470), PPE: PUT IT ON (V0471), EYEWASH SHOWERS & STATIONS (V0472), CONFINED SPACE: AIR MONITORING (V0473). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 39 min. (Safety Watch Series) c1995

***Safety Watch Series, Vol. 2,
no. 8, November 1995 (CC)
V0474***

Contains these four segments on safety issues: WORK SURFACE SAFETY (V0475), RIGHT TO KNOW: WORKERS & THE COMMUNITY (V0476), PPE: ELECTRICAL (V0477) and FIRST AID: CPR REVIEW (V0478). For descriptions of each segment, refer to specific titles and title numbers as listed here. (Primedia Workplace Learning, Safety Watch) 42 min. Safety Watch Series c1995

Scaffolding (CC) V0736

Footage shot at actual job sites is used to demonstrate proper scaffolding techniques. Covers OSHA's new scaffolding regulations; reviews rules on the selection and construction of scaffolding; the creation of foundations, footings and platforms; and the use of guardrails and ladders. (J. J. Keller & Associates, Inc.) 17 min. c1997

Scaffolds V0106

Using techniques conforming to OSHA standards, shows proper procedures for using tubular frame, rolling scaffolds, fold-up scaffolds, adjustable scaffolds, and trailer-mounted scaffolds. (International Film Bureau Inc.) 16 min. c1987

Scaffolds:

Safety At All Levels V0653

Covers the OSHA Revised Standard 1926.450-454. Reviews the role of the competent person, pre-assembly inspection, assembly, pre-shift inspection, safe work practices, and fall protection. (Coastal Video Communications Corp.) 19 min. c1997

***SCBA Care & Maintenance
The Time Is Now V0500***

Gives employees a solid understanding of the different types of respirators, while demonstrating the proper care and fitting of respirators. Covers: SCBA component descriptions; Disassembly/Disinfecting; Inspection; Reassembly/Testing; and Proper equipment fit. (Coastal Video Communications Corp.) 15 min. c1991

Scissors Lifts in Construction (CC) V0902

Training includes lifting principles, elements of the walk around inspection, and operation safety. (Coastal Video Communications Corp.) 9 min
Hard Hat Safety Series 1997

Seatbelt Safety (CC) V0829

Dramatic footage of auto accidents motivates workers to wear seat belts. This video covers federal regulations for seat belt safety and disproves arguments against wearing seat belts. (Valley Videos) 5 min c1998

See And Be Seen V0212

Demonstrates techniques for identifying hazards, how to get and maintain SPACE, and ways of communicating the driver's presence and intent. Improves observation skills for defensive driving and suggestions for eliminating physical distractions before getting on the road. (Visucom Productions, Inc.) 12 min. It's No Accident Series c1992

Seguridad con la Electricidad en la Granja y en el Rancho (Farm And Ranch Electrical Safety) English/Spanish Version V0150

Narrated by Wey Simpson, this video demonstrates many daily farm practices with the potential of electrical shocks. Includes hadlying irrigation equipment, wiring and grounding electrical systems, and emergency procedures. (University of Idaho, Agricultural Communications Center, Cooperative Extension System) 19 min. English c1992

Seguridad con la Equipo en la Granja y en el Rancho (Farm And Ranch Equipment Safety) (English/Spanish Version) V0296

This video discusses farm and ranch equipment accidents and what can be done to reduce them. Bob Tallman, famous rodeo personality and the voice behind "The American Farmer" radio program, narrates the program. Emergency Medical Technicians discuss accident situations they

experienced involving equipment and offer advice on accident prevention. Communication strategies for farm and ranch workers are also discussed. Recommended training for all workers on farms and ranches. (University of Idaho, Agricultural Communications Center, Cooperative Extension System) 36 min. c1990

Seguridad con los Pesticidas: Proteccion del Trabajador: Trabajadores Agricolas/ Manejadores y Trabajadores de entrada reciente (Pesticide Safety: Worker Protection: Agricultural Workers/Handlers And Early-Entry Workers) (English/Spanish Version) V0249

Intended to help meet the requirements set by the EPA for training Agricultural Workers and Pesticide Handlers under the new Worker Protection Standard's regulations. Divided into two sections, the first is for both the Agricultural Worker and Pesticide Handler. Part two has additional information for Pesticide Handlers and Early-Entry Workers. (University of Idaho, Agricultural Communications Center, Cooperative Extension System) 66 min. c1993

Seguridad durante la Operación del Tractor y la Maquinaria (Safe Tractor And Machinery Operation) V0323

Topics include: Proper clothing and footwear for tractor operation; *Maintaining alertness through proper sleep and nutrition; *Pre-operation safety checks; *Proper mounting/dismounting procedures; and *Other principles of safe tractor operation. (Videotaped at a live seminar). English Version V0322 (University of Florida, IFAS Publications) 33 min. c1992

Seguridad en el Trabajo: Extinguidores de Incendio (Safety On The Job: Fire Extinguishers) V0231

Shows the four different types of fires and fire extinguishers and the five main types of extinguishing agents. Instructions for safe operation of extinguishers and other fire emergency procedures. English version V0230. (AIMS Media) 23 min. c1987

Seguridad en el Trabajo: Los Peligros en el Abuso de Sustancias (Safety On The Job: The Hazards Of Substance Abuse) V0238

The program shows how alcohol and other drugs impair coordination and perception and can cause workers to make risky choices, endangering the life of the substance abuser and the lives and limbs of co-workers. English Version V0 (AIMS Media) 18 min. c1984

Seguridad en el Trabajo: Manejando la Camioneta y el Camión (Safety On The Job: Van And Truck Driving) V0240

The program teaches drivers the fundamentals of pro-driving procedures habits that anyone who drives for a living should adopt. Stresses safety attitude. English Version V0239 (AIMS Media) 23 min. c1986

Seguridad en el Trabajo: Operación de la Elevadora de Orquilla (Safety On The Job: Forklift Operation) V0233

Basic safety procedures covered are proper techniques for: pre-check; stopping and driving in reverse; stacking loads; carrying loads up and down a grade; lowering loads; and handling emergency situations. (English version V0786 and V0182) (AIMS Media) 19 min. c1988

***Seguridad en el Trabajo:
Prevencion de Lastimaduras
de Espalda (Safety On The Job:
Preventing Back Injury) V0235***

Demonstrates proper ways to lift and move heavy objects. Explains the physiology of the back and demonstrates injury prevention techniques, particularly back-strengthening exercises. Mostly industrial setting, but brief segment in office environment. English version V0234 (AIMS Media) 24 min. c1987

***Seguridad en el Trabajo:
Primeros Auxilios para Accidentes
(Safety On The Job:
First Aid For Accidents) V0232***

Through a series of vignettes, illustrates first aid treatment of some of the most serious accidents occurring in the workplace. The injuries include broken legs, broken backs, bleeding, head wounds, burns and electric shock requiring CPR. (AIMS Media) 20 min. c1985

***Seguridad en el Trabajo:
Respirador Purificante de Aire
(Safety On the Job:
The Air-Purifying Respirator)
V0236***

Explains the air-supplied respirator, the different kinds of respirators, how they work, and the situations each type is designed for. Shows step-by-step rules for using air-supplied respirators. English version V0237 (AIMS Media) 13 min. c1988

***Seguridad en el Trabajo:
Trabajando con Maquinaria
(Safety On The Job: Working
With Machinery) V0242***

Procedures are shown that safeguard against injury from forklifts and any machine that shears, rotates, presses, or grabs. Illustrates proper uses of safety equipment. Accidents caused by shortcutting safety are demonstrated, showing that even the simplest job can be hazardous. (AIMS Media) 17 min. c1986

***Seguridad en el Trabajo:
Causas y Prevención Del
Accidente (Safety On The Job:
Accident Causes And Prevention)
2nd edition V0229***

A series of dramatizations show how a person's mental or physical condition can affect on-the-job performance and lead to accidents. The program stresses that identification of risk-producing behaviors can reduce the chance of injury. Illustrates warning signs that staff and supervisors should be alert to and notes that employee assistance programs may be available to provide help or advice. English Version V0243 (AIMS Media) 16 min. c1984

***Seguridad en la
Cosecha de la Manzana
(Apple Harvest Safety) V0309***

Covers the equipment used in harvesting apples. Details tractor/trailer and forklift operation, unloading bins, general orchard safety, proper lifting techniques and ladder safety. (English version V0297) (University of Arizona, Agricultural Health Promotion System) 16 min. c1993

***Seguridad en la Escalera
(Ladder Safety) V0299***

Incorrectly used, a ladder can be one of the most dangerous tools in the workplace. This program offers a few guidelines for safe ladder use. (Safety Short Production, Inc.) 5 min. c1990

***Seguridad en la Huerta usando
la Escalera Tripoide (Tripod
Orchard Ladder Safety)
(English/Spanish Version)
V0295***

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and proper clothing. Demonstrates how to inspect and set up tripod orchard ladders. (Oregon State University, Extension Service) 10 min. c1990

***Seguridad en las Gruas durante
Impactos Altos (High Impact:
Crane Safety) V0776***

Features re-enactment's of accidents involving indoor cranes. Included are: sling angles, inspecting chains and slings before use; proper lifting, moving and release of load, lifting capacities of cranes and rigging. Warning! May be too graphic for some audiences. (ERI Safety Videos) 18 min. Warning! May be too graphic for some audiences. c1998

***Seguridad en las Operaciones
Agrícolas (ATV Safety For
Agricultural Operations) V0376***

Co-sponsored by the ATV Safety Institute, State Fund Insurance and the AG Safety Institute, this video presents a basic safety strategy for the agricultural use of ATVs. Covers: Driving techniques; Maintenance checks; Pre-operation checks; Personal protective equipment; and Common Safety Rules. Shows how to drive on different terrain, respond to difficult situations, make safe turns and stops, and avoid hazards. (Visual Education Productions) 14 min. c1993

***Seminario de Seguridad para el
uso del Tractor en la Industria
Del Árbol frutal, Parte I, II, III
(Hood River Tractor Safety
Seminar For The Tree Fruit
Industry, Part I, II, III) V0751***

Provides in-depth training on the safe use and maintenance of orchard tractors. Covers OR-OSHA tractor safety rules and safety/accident statistics; proper maintenance for

borrowing privileges.

safe operation; protective device precautions; guards; universal symbols; safe operation procedures; tractor hitches; PTOs and hydraulics precautions; safety on the road; why accidents occur; and implementing safety standards. (Department of Consumer Business & Services, Oregon OSHA, Hood River Grower-Shipper Association) 52 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Serious Look At Chainsaw Safety V0135

Shows two workers' attitudes, first there's Charlie whose attitude is one of complete indifference to the safety of himself and his workmates, second there's George who practices safe chain saw safety techniques at all times. Gives graphic illustrations of common injuries involving chain saws, and stresses the importance of training and thinking safety at all times. (Furniture & Industry Training Board of Great Britain) 20 min. c197?

Servicing Multi-Piece Rim Wheels V0172

The OSHA standard requires training for all tire servicing employees, utilization of industry-accepted procedures which minimize the potential for employee injury. Describes the use of proper equipment such as clip-on chunks, restraining devices, or barriers to retain the wheel components in the event of an incident during inflation of tires, and the use of compatible components. (U.S. Department of Labor, Occupational Safety and Health Administration, Seattle Office) 10 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1980

Sexual Harassment: Serious Business (CC) V0693

Shows all employees that preventing or eliminating sexual harassment in the workplace will benefit them and their organization. It shows the negative impact of a hostile work environment on the team, how to deal with quid pro quo harassment, and how to confront a harasser and tell him/

her to stop the unwelcome behavior. (Primedia Workplace Learning, Tel-A-Train, Inc.) 25 min. c1993

Shipyards Safety Orientation V0915

Three part presentation. Part 1: Preparing to work. Describes work environment and instruction on PPE, respirators, welding, general housekeeping, etc. Part 2: Prevention - Proper handling yourself, products and materials such as load handling, rigging loads, Dog or Pad-Eye, pinch points, etc. Part 3 Potential Environmental & Health Hazards including heat exposure, frostbite, MSDS, noise, hot work, confined space, "near miss" situations, footwear, etc. (Shipbuilders Council of America) 38 min. 2000

Shocking Experiences: A Review Of Basic Electrical Hazards In The Workplace V0292

All employees who work with equipment need a clear understanding of electricity as well as the inherent hazards. Since we all encounter electricity in our everyday lives we often ignore common dangers. Four people talk about their close calls and what they will do differently next time. (CoreMedia Training Solutions) 20 min. c1990

Shoring Safely V0195

Shows how to install timber, screwjack and hydraulic shoring systems, as well as simple techniques for determining A, B, and C type soils, sheeting designs, and safety hazards unique to trenching. Perfect for foreman, crew leaders, or anyone that needs up-to-date information on how to safely install shoring. (Zomar Productions, Ltd) 24 min. c1990

Silica V0046

Identifies common types of silica and the health problems that can result from exposure. Work processes that can create airborne silica include: Tunneling; Metal foundries; Stone; Clay; Glass production; and Abrasive cleaning or sandblasting. (National Technical

Information Service) 22 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1990

Silver Stretch V0048

Kathy Norman, a nationally certified instructor and trainer and founder of Aeroflex, suggests this daily stretching program intended to increase your flexibility and range of motion as well as reduce the chance of injury. To receive booklets addressed in the video call the current phone number: 800-352-5173. (Purple Cross, Prairie States Life Insurance) 20 min. c1990

Slippin' and Trippin' V0320

Injuries from slips and falls are the second highest workmen's compensation claim in the United States. Illustrates a few ways to avoid these hazards. (Safety Short Production, Inc.) 5 min. c1988

Slips, Trips & Falls V0117

This motivational program educates workers on the common causes of slips, trips, and falls, both in the workplace and off-the-job. (Summit Training Source, Inc.) 12 min. c1987

Slips, Trips & Falls (CC) V0615

In the "Safety Crusaders" TV panel format, discusses the three laws of science addressing slips, trips and falls which are friction, momentum, and gravity. When these forces are out of balance, slips, trips and falls take place. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 18 min. Safety Watch Series c1997

Slips, Trips & Falls

[Also available on V0398]

[Humorous Dramatization] V0399

A visiting congressman tours a worksite and nearly destroys the company's excellent safety record as he tries to help employees do their work. Safety precautions for avoiding commonplace accidents are shown. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 1, no. 11 Segment 1 c1995

Small Spill [Clean Up] (CC)

V0617

Using the "Mission Impossible" format, Mr. Phipps's along with his "Spill Clean-Up Force" existing of John Kragen, Mac Hunter, Blaire Williamson, and Steven Hart's mission - should the choose to accept it - is to point out to the employees the importance of substance identification and hazard evaluation, communication with the appropriate personnel, ensuring personal protection as well as control procedures, containment, and cleanup. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 18 min. Safety Watch Series c1997

Smart Lift V0742

Designed to reduce the number, incidence and severity of lifting and twisting injuries in the retail industry through an updated, accurate program to educate employees in proper and safe techniques for lifting and moving heavy objects. (Department of Consumer Business & Services, Oregon OSHA, Associated Oregon Industries Retail Council) 8 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes 199u

Smoking At Work [Also available on V0451] V0453

In light of OSHA's proposed rule on smoking, this segment show examples of safety hazards which smoking can cause. While noting that smoking policy may vary from one company to the next, shows the importance of clearly marking areas where smoking needs to be prohibited. Also recommends tactfulness and consideration between smokers and non-smokers.

(Primedia Workplace Learning, Safety Watch) 5 min. Safety Watch Series Vol. 2, no. 5 Segment 2 c1995

Snow and Ice Control V0891

A training tape in three parts for DOT road maintenance personnel. Most information is applicable to other snow removal operators, primarily municipality and county workers. Part 1 (11 minutes) Preparation and Basic Information - Getting Ready, Routes and Priorities; Part 2 (15 minutes) Equipment

checks and maintenance; Part 3 (21 minutes) Snow & Ice, plowing, applying sand and anti-icers. Updated in 1999. (Washington State Department of Transportation) 47 min c1989

Sodium Hydroxide & Potassium Hydroxide V0589

Covers the hazards of handling caustics; emergency procedures; toxicity, and reactivity of caustics. (Media Resources Inc.) 25 min. (#6 Hazchem Series) c1995

Solving Chemical Dependency Problems V0690

Covers: Symptoms of cocaine or other drug use on the job, particular during shift work; Complete drug policy notification; and Documentation for chemical dependency problems. (Long Island Productions) 7 min. BITE Videos c1993

Spiral to Disaster (CC) V0840

Re-enacts the tragic series of events resulting in the loss of 165 lives and the destruction of one of the largest off-shore oil and gas production platforms in the North Sea. The platform was the Piper Alpha. Covers procedures and equipment to prevent or mitigate the outcome. Discusses Emergency Action Plan (EAP). work permit systems, risk analysis, and communication break downs. (Coastal Video Communications Corp.) 25 min c2000

Split Second Safety V0198

Explains basic electrical safety including how ground faults occur and about failure in electrical circuits which may cause fires or electrical shock. It shows many domestic situations where electricity is potentially lethal. (Coronet/MTI Film & Video) 11 min. c1973

Springfield:

Lessons Learned V0635

We join a team at the Springfield site who are demonstrating to us the circumstances that surrounded the death of Ron Mills on November 3, 1996. Ron collided with a forklift - he didn't see - and was killed while crossing the road. The Springfield team explains reliable methods established to

prevent reoccurrence of this situation at Weyerhaeuser. (Weyerhaeuser Company) 13 min. c1997

Stairways And Ladders: The First Step V0275

Outlines methods of personal fall protection and safe work practices for elevated surfaces. Covers: OSHA 1910.23-25; Bonus construction segment (1926.150, 60); Set-up and use; and Inspection and maintenance. (Coastal Video Communications Corp.) 18 min. c1991

Static Electricity V0818

In the work environment uncontrolled static electricity can have severe and dramatic consequences. Covers: static electricity, potentials hazards; engineering controls and best safety practices. (Summit Training Source, Inc.) 15 min. c1999

Stationary Scaffolds in Construction (CC) V0654

Provides training in proper scaffold use covering stationary scaffold assembly, the role of the competent person, recognizing hazards and proper materials handling. (Coastal Video Communications Corp.) 12 min. c1997

Staying A Step Ahead V0149

To acquaint employers and employees with WISHA guidelines and how to set up a safety program. Describes the elements of a safety program: mangement planning, hazard accessment, hazard correction, safety training, emergency procedures, and new employee orientation. For all workplaces, but mainly industrial. (Department of Labor and Industries, State of Washington) 18 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 1992

Staying Out Of Harm's Way V0178

Defensive driving techniques are demonstrated for these Danger Zones: intersections; merging lanes and highway/ rail road rossings. Describes techniques for avoiding danger with the weaver; tailgater;

speeder; turtle; and impaired or intoxicated driver. (Visucom Productions, Inc.) 15 min. It's No Accident Series c1992

Stop It Burning V0590

Systematically looks at types of fires, extinguishing agents, types of extinguishers and uses of each type of extinguisher. Reviews the four main types of fires: Class A, B, C, & D. (Safetycare, Inc.) 17 min. c1991

Straight Back Talk V0780

Actual interviews from real-life victims of workplace back problems. Success stories about protection and prevention strategies are included. Straightforward proper lifting techniques. (Coremedia Training Solutions) 10 min. c1997

Stress In The Workplace [Also available on V0398] V0401

Identifies signs of stress overload, suggests ways for individuals to change their reactions to stressful events and shows various other stress management strategies. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 1, no. 11 Segment 3 c1995

Stress Management:

A Practical Approach V0676

Compares the stress of a roller coaster ride to the ups and downs we experience during a busy day. Follows the stress coping challenges of several people and shows how they might handle those challenges. Helps to increase employees understanding of the ways unmanaged stress affects their health, productivity, and personal lives and to give them tools to take control of their stress levels. (American Training Resources, Inc.) 19 min. c1997

Stress Relief:

The Heimlich Method V0026

Dr. Heimlich explains what stress is, how it works, and gives strategies for cooling off stressful situations and changing habits that invite stress. (AIMS Media) 18 min. c1983

Stretchout:

A Guide To Stretching In The Workplace V0120

Avoid muscle pulls, discomfort caused by repetitive motion, and strain due to tedious assembly work by teaming the basics of stretching. Explains the physiology of stretching, and illustrates the benefits of a regular stretching program. (CoreMedia Training Solutions) 27 min. c1989

VIDEO TIP:

Please rewind your videos.

Su seguridad en la Planta de Empaque de Frutas (Your Safety In The Fruit Packing Plant) V0746

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in the prevention of accidents and injuries in the workplace. (Department of Consumer Business & Services, Oregon OSHA, Fruit Growers League of Jackson County) 10 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Substance Abuse:

A Management Intervention Program V0043

Shows how to identify the problem worker, document incidents and accidents. A confrontation scene is shown demonstrating positive and negative approaches. (AIMS Media) 17 min. c1983

Substance Abuse:

Awareness & Intervention V0264

Part 1: Employee Awareness provides employees with an awareness of the potential for substance abuse in the workplace. It discusses how co-workers can detect the problem and how to find help for their colleagues. Part 2: Supervisory Techniques is designed to provide supervisors and managers with specific information on what signs to look for and how to document and effectively deal with employee substance problems. (Primedia Workplace Learning, Industrial Training Systems Corporation) 30 min. c1987

Sulfuric Acid and Hydrochloric Acid V0591

Teaches fundamental lessons about identifying corrosives, the hazards of these acids, occupancies where these acids are found, reactivity problems, the danger of water, neutralization operations, emergency medical treatment, decontamination, and environmental concerns. (Media Resources Inc.) 26 min. (#1 Hazchem Series) c1987

Summer Safety V0126

Trains employees in emergency situations during the summer, both on and off-the-job. Covers: drowning, sunburns, heat exhaustion, poisonous plants, snake bites, and insect bites and stings. (Primedia Workplace Learning, Tel-A-Train, Inc.) 10 min. c1990

VIDEO TIP:

Be sure to return all shipping labels and complete attendance and showing statistics.

Summer Sports: Safety Wins! (CC) V0713

Through demonstrations and interviews with athletes and experts, explains how to enjoy the maximum benefits of sports, exercise, and avoid injuries. Demonstrates proper warm-up techniques. (Coastal Video Communications Corp.) 13 min. c1997

Supervisor's Role In Safety (CC) V0604

On a movie setting, the reasons why a supervisor should lead-by-example are discussed. When employees see the supervisor wearing appropriate personal protective equipment, following standard safety practices, safety becomes a non-negotiable issue with employees. The supervisor must provide full endorsement and support of safety practices. Most people like to give help because it makes them feel good and gives them a sense of being needed. By asking employees for help, the supervisor is giving employees a chance to buy into safety. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 14 min. Safety Watch Series c1997

Survival First Aid V0088

What is Survival First Aid? It is a series of basic actions to employ while waiting for emergency medical assistance. Ensure a safe environment for yourself and the victim; Establish and maintain a clear airway to the victim's lungs; Perform artificial ventilation; Perform cardiopulmonary resuscitation; Recognize and control deadly bleeding; Position the victim for airway maintenance and drainage; and Load and transport the victim to medical aid. (Workers' Compensation Board of British Columbia) 38 min. c1988

Survival! V0592

Reviews hypothermia and heat stress, hiking and backpacking, and four-wheeling. (Coastal Video Communications Corp.) 28 min. c1980

Surviving The Big One (CC) V0328

Henry Johnson, fire and safety specialist with the Los Angeles City Fire Department, visits major earthquake sites from California to Alaska and shows how the key to survival is knowing what to do before, during and after a major quake. Discusses: disaster planning; disaster supplies kit, hazards; utilities; and preparing family members. (KCET Videofinders) 58 min. c1989

Surviving The Cold V0066

A winter safety film including: recognizing and treating hypothermia; preparing the home for winter emergencies; winter travel; and blizzard survival. (Pyramid Film & Video) 16 min. c1984

Surviving The Cold And Flu Season - Humorous (CC) (For non CC version see: V0468) V0819

Tips for reducing the likelihood of contracting or spreading viruses. Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 2, no. 6 Segment 4 c1995

Surviving The Cold And Flu Season - Humorous [Also available on V0464]; (For Closed Captioned version see: V0819) V0468

Tips for reducing the likelihood of contracting or spreading viruses. Explains differences between colds and flu and shows preventative measures as well as tips for getting through colds or flu if you do contract them. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 2, no. 6 Segment 4 c1995

Suspension Scaffolds In Construction V0655

This program covers scaffold assembly, the role of the competent person, inspection, hoisting, electrical hazards, access, fall protection, and safe work practices. Each section looks at recognizing hazards and proper materials handling. (Coastal Video Communications Corp.) 11 min. Hard Hat Safety Series c1997

System That Works: A Right To Know Program For The Construction Industry V0105

A right-to-know program for the construction worker told from the worker's point of view. Discusses the special hazards on the job site, and of those trades working on the construction site. Includes hazardous material exposure limits, special clothing, and protective equipment. (Comprehensive Loss Management, Inc.) 23 min. c1987

Take Control— V0820

Safe defensive driving training. Covers: Module 1: Mind and machine; Module 2: Rules of the road; Module 3: Advanced concepts; Module 4: Secrets of the pros-1; Module 5: Secrets of the pros-2; Module 6: Secrets of the pros-3; Module 7: Adverse conditions; and Module 8: Handling the unexpected. (Group 7, Inc.) 75 min. c1998

Take Electricity Seriously: Shock - Fire - Explosion: Developing Awareness V0803

Increases awareness of electrical hazards and builds positive safety attitudes toward electricity at work and at home. Discusses positive safety attitudes toward electricity, electrical incident and injury reduction, and increased safety performance. (E. I. Du Pont De Nemours) 14 min. c1993

Take Five: Ergonomics V0872

In a TV interview format the basics of neutral postures, minimizing forces, reducing repetitions; adjusting workstations to fit the worker and working smarter not harder are

discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! (Safe Expectations) 9 min. c1999

Take Five: Lifting V0873

In a TV interview format the basics of lifting are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! (Safe Expectations) 9 min. c1999

Take Five: Sitting V0874

In a TV interview format the basics of sitting are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! (Safe Expectations) 9 min. c1999

Take Five: Standing V0875

In a TV interview format the basics of standing are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! (Safe Expectations) 9 min. c1999

Take Five: Stretching V0876

In a TV interview format the basics of stretching are discussed in an efficient straightforward manner. Stay tuned for the black & white "commercial" and out takes at the end! (Safe Expectations) 9 min. c1999

Take Home Toxics [Also available on V0403] V0404

Teaches awareness of the potential hazards of materials at work, practicing good hygiene habits, and using the necessary personal protective equipment can keep your family and associates safe from exposure to toxic substances. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series Vol. 1, no. 12 Segment 1 c1995

Taking Charge Of Claims For Your Business (Open Captioned) V0631

The mandatory workers' compensation law provides no fault insurance in case of industrial injury, occupational illness, or death. Employers in Washington State are required to carry workers' compensation

insurance for their workers. This video focuses on what you as an employer can do to keep your workers' compensation premiums as low as possible by preventing injuries at your business and effectively managing your claims.

(Department of Labor and Industries, State of Washington) 14 min. * Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1997

Targeting Workplace Violence: A Video For Front-line Workers V0630

Ann Schatz, a KOIN-TV news anchor reports her part in a workplace violence story. A lone gunman entered the Coin Tower where her station was located and held a number of hostages on the ground floor. Covers: Who are at the greatest risk; Specific things you and your fellow employees can do to reduce the risk of workplace violence; and Procedures that could have been implemented to reduce the risk of a violent assault. (Department of Consumer and Business Services, Oregon OSHA, Gary Adams Productions) 19 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1997

Tarp Smart: Protect Your Load ... And Ourselves V0738

Covers safe tarping procedures for square and odd shaped loads. Illustrates several different hazards to which drivers are exposed during tarping procedures and how to eliminate or minimize the hazards. (Department of Consumer Business & Services, Oregon OSHA, Oregon Trucking Associations, Inc.) 11 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1995

Task Exposure Analysis: Beginning The Pro-Active Safety Process (CC) V0593

Discusses the systematic pro-active safety method called IAIM (Identification, Assessment, Intervention, and Maintenance) that reviews anything that might cause an unsafe or dangerous situation. Helps supervisors and employees predict where an incident could become a hazard and develop

into an accident. Covers: How Task Exposure Analysis works; Preparing for TEA; and The Four-step plan. (Coastal Video Communications Corp.) 19 min. c1995

TB Respiratory Protection: Administrator's Review V0922

Thorough overview of the requirements of the TB respirator/protection program. Supplements NIOSH publication TB respiratory protection and health care facilities administrators guide. Includes CD ROM. (Center for Disease Control and Prevention) 24 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. ND

Temporary Grounding Seminar V0677

Classroom instruction by Lonnie Bell, hot line tools specialist and demonstrator, covers single-point, dualpoint and personal grounding practices in Part 1 - Principles and Development of Methods, and Part 2 - Equipment Selection, Research Testing (a video within this video, it shows high-current lab tests on clamps, cables and ground rods) and Application Simulations on a working model of a three-phase line. (Hubbell Power Systems) 50 min. c1997

That Moment in Time V0068

Shows dramatically how there is a "moment in time" when a person may choose to do the "safe" thing instead of an action that is convenient but not safe. (Charthouse International Learning Corp) 20 min. c1988

Think About This V0830

This short video is an excellent tool for starting the next safety meeting. The graphic accidents re-enacted in the program will force employees to think about the personal consequences of unsafe acts and how those actions also affect the lives of loved ones. Viewers will be ready to devote their full attention to the upcoming training topic. (ERI Productions) 5 min. Warning! May be too graphic for some audiences c2000

Today's Workplace.

Workplace Traffic Safety V0784

Does traffic safely play an important role in the workplace, or is it something we only need to think about on our morning and evening commutes? "Today's Workplace" investigates this question. By interviewing seven experts and taking an in-depth look at the key areas of traffic safety, "Today's Workplace" finds some interesting answers. (Department of Consumer Business & Services, Oregon OSHA, Associated Oregon Industries) 31 min. c199u

Trabajadores Expuestos (Evitar Enfermedades Contagiosas en el Lugar de Trabajo) Workers Exposed (Avoiding Exposure To Infectious Diseases In The Workplace) V0263

Focuses exclusively on non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contact with bloodborne infectious disease transmitting situations and/or implements. Washington AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. (Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min. c1993

Trabajando de manera Segura con los Pesticidas (Working Safely With Pesticides) V0269

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents. (University of Arizona, Cooperative Extension College of Agriculture) 17 min. c1989

Trabajando inteligentemente - No con más dificultades: Ergonomia en la Agricultura (Working Smarter - Not Harder: Ergonomics In Agriculture) V0802

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on

stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts. Demonstrates correct work practices.

(Department of Consumer Business & Services, Oregon OSHA, Oregon Association of Nurserymen, Inc.)

17 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1998

Tractor Safety Is No Accident V0110

Ray Siddell, an airline pilot, is also a practicing farmer, and shows how if a tractor driver follows the same safety precautions as a pilot, many less accidents would occur. (Case International Harvester) 16 min. c1987

Traffic Control - Danger in the Work Zone V0867

Narrated by Rick Olson, WSDOT, Director of Communications. Discussion of flagging safety issues; includes a video within a video (11 min.). The training video segment includes: Pre-Plan; Setting up Traffic Control; Flagger Safety; Taking Down Traffic Control. Produced by WSDOT and The Laborers' International Union of North America. (Washington State Department of Transportation & Laborers' International Union of North America) 30 min. c1996

Traffic Control Thru Work Zones V0445

Shows how to safely set up traffic controls for short-term jobs. Clear and simple demonstrations explain step-by-step installation of the five traffic control areas, including: basic flagging techniques; safe taper lengths; positioning of channelizing devices; flashing arrow signs; and detailed work practices. (Primedia Workplace Learning, Tel-A-Train, Inc.) 21 min. c1991

Traffic Safety (CC) V0505

Shows techniques for effective road management. This means knowing where your vehicle is in relation to other moving or stopped cars and applying safe driving guidelines at all times. Also discusses the problems which may arise from driving under the influence of alcohol. Suggested to

supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Training Greenhouse Workers To Handle Pesticides Safely V0298

Stresses alertness to the four ways horticultural workers might come into contact with pesticide chemicals. Covers: Handling; Equipment; Mixing; Application; Cleaning; Clothing; Safety gear; and First aid. (Visual Media, University of California) 16 min. c1986

Training With Media V0721

Provides tips on how to use media and visual aids to your advantage by including it in your training program. Covers visual images, handouts, diagrams, posters, handbooks, blackboards, dry erase boards, flipcharts, overhead projectors, computer enhanced projection systems, and training videos and multimedia products. (Coastal Video Communications Corp.) 14 min. Train the Trainer c1998

Trauma & Shock V0051

Demonstrates what shock is and the different stages. Shows what the signs of shock are and the appropriate treatment. (Journal Films) 17 min. c1980

Treating Common Injuries V0070

Reviews first aid procedures for bleeding, chemicals in eyes, burns, caustic or corrosive chemicals. Eye injuries, suspected fractures, possible back or neck injuries, and amputation. (Primedia Workplace Learning, Tel-A-Train, Inc.) 16 min. c1988

Trench Emergency V0433

Alerts workers to the importance of using proper protection during excavation work and emergency procedures for trench collapses. Illustrates the dangers posed by trenches, shoring, and shielding. (Coastal Video Communications Corp.) 16 min. c1993

Trenching & Excavation Safety V0196

Live footage and computer graphics provide clear explanation of the hazards created by digging trenches and excavations. Shows how these hazards are reduced by sloping, shielding, and shoring. With its emphasis on personal and work safety, this program is ideal for anyone working in or around trenches. (Zomar Productions, Ltd) 18 min. c1987

Trenching And Shoring: Hydraulic Shoring Installation V0771

One type of trench protection is hydraulic shoring. Hydraulic shoring prevents failure of trench walls, is easy to install, and is easily pressure checked, and can be used around crossing utilities. Covers: Definition of vertical shores; Benefits of vertical shores; What are hydraulic walers; and Benefits of hydraulic walers. (Coastal Video Communications Corp.) 13 min. c1996

Trenching And Shoring: Trench Box Installation V0767

Developed to teach employees how to understand trench hazards. Includes: Competent person; Trench shields; Selection of shield; Unloading; Assembly; Cohesion and soil testing; and Protective systems. (Coastal Video Communications Corp.) 14 min. c1996

Tripod Orchard Ladder Safety V0310

As a training aid, this program covers: Ladder safety inspection; Proper setting on level and sloping ground; and the right clothing to use. Demonstrates how to inspect and set up tripod orchard ladders. (Oregon State University, Extension Service) 10 min. c1990

Tuberculosis Awareness V0290

Since 1985 the Center for Disease Control has reported a resurgence of TB. Gives general information about exposure, prevention and treatment of tuberculosis. Also covers: symptoms of TB infection; who is at risk; and drug-resistant TB. (Coastal Video Communications Corp.) 16 min. c1994

Tuberculosis In The First Responder Environment V0313

Discusses: Epidemiology of TB; Latent, Active and Multi-Drug Resistant; Signs and symptoms of TB; High risk Groups and the reasons for the rise in TB cases. Regulatory aspects of TB: CDC Guidelines and OSHA Enforcement Policy; Workplace risks: Modes of transmission, Post-Exposure Management; and Exposure Control Plan. (Long Island Productions) 20 min. c1994

Ultimate Driving Challenge V0703

Hosted by well-known celebrities, Craig T. Nelson and Paula Zahn, with guest appearances by: Tim Allen, Annie Potts, Danny Sullivan, Deidre Hall, and Barbara Mandrell. Covers a series of live demonstrations of difficult and dangerous driving situations and how to correctly handle each one safely. (American Training Resources, Inc.) 30 min. c1994

Under The Influence: Alcohol In The Workplace [Also available on V0424] V0427

Describes the problems of alcohol abuse related to work situations. Impaired judgment, unsteady actions, mood swings, and other effects of alcohol jeopardize not only the safety of the individual abusing alcohol but also the safety of co-workers. Confidential counseling may help employees come to terms with their drinking problem. (Primedia Workplace Learning, Safety Watch) 7 min. Safety Watch Series Vol. 2, no. 4 Segment 3 c1995

Understanding & Preventing Musculoskeletal Injury in Sonography V0888

Prevent injury while scanning. Describes major causes and risk factors for Musculoskeletal Injury (MSI) specific to sonography. Covers the symptoms of scanning-related MSI's with suggestions for preventative measures. Includes a segment of stretching exercises. (Agilent Technologies) 28 min Agilent's Inside Tour of Ultrasound: Program 2 2000

Understanding Musculoskeletal Disorders (CC) V0898

Explains musculoskeletal disorders, causes, symptoms and risk factors. Shows how changes in work habits can prevent injuries. Uses terminology relevant to the Washington Rule. Includes industrial, light manufacturing and construction workplaces. (Comprehensive Loss Management, Inc.) 15 min. 2001

Understanding The Asbestos Hazard V0437

Trains employees in asbestos awareness and abatement techniques. Includes demonstrations of actual asbestos removal from steam pipes using glove bags and isolated space removal. Intended for workers and supervisors in asbestos abatement. (Summit Training Source, Inc.) 19 min. c1987

Vacation Safety: Play It Safe (CC) V0714

Covers the basics of planning and enjoying a safe vacation. Covers some safety tips you can take with you, in the car and at the airport. (Coastal Video Communications Corp.) 11 min. c1997

VIDEO TIP:

Please do not attempt to repair videos. Instead, notify the S & H Video Library of damaged materials.

Valve Safety V0871

Describes the different types of valves and associated hazards; importance of risk assessment. Reviews use of PPE and safety measures. Special emphasis on ergonomics; avoiding awkward postures and demonstrating proper lifting techniques. Program footage with scenes on site at a refinery and ships. The content is applicable to any industrial environment utilizing valves and pipes such as water, utilities, or petroleum. (Summit Training Source, Inc.) 17 min. c2001

Vibration Syndrome V0144

Discusses the hazards of hand held vibrating tools such as chainsaws and jackhammers. Covers: The etiology; Symptomatology; Assessment; and Treatment of this condition. Includes a brief introduction to the physics of vibration, and an examination of different assessment techniques. Produced for medical professionals. (National Technical Information Service) 27 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1981

Vehicle Safety (CC) V0524

Adam West the "Safety Crusader" confronts "Rudy the Reckless" in a spin-off from the old TV show "Batman". West narrates this video which covers safety rules for driving on an industrial site. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 14 min. c1996

Video de Entrenamiento para la Elevadora de Horquilla (Forklift Training Video) (English/Spanish Version) V0429

Discusses the proper procedures of safe forklift operations. The forklift operator is responsible for inspection of the forklift and for reporting necessary maintenance. Recommended equipment inspection involves going through a pre shift checklist: engine and operator compartments; controls; and gauges. (Northwest Environmental Services & Training) 20 min. each c1995

Violence:

Reducing Your Risk (CC) V0278

This video is about reducing your risk of being a victim. It teaches how to avoid potentially violent situations and how to form a plan of action for escape or defense if violence occurs. Experts in personal safety and law enforcement demonstrate simple yet practical and effective methods everyone can use to reduce their risk and defuse threatening situations. (Video Training Inc.) 28 min. c1994

Violence In The Workplace V0439

Defines causes and early signs of violence. Gives instructions on dealing with violence in the workplace and personal security. (American Training Resources, Inc.) 10 min. c1995

Violence In The Workplace: A Strategy For Prevention V0446

How to spot and defuse potentially explosive situations. (Visionquest Films) 14 min. c1995

Violence In The Workplace: Learn To Play It Safe V0632

Helps retailers and their employees obtain the skills necessary for dealing with potentially violent individuals. Gives key points on communication skills for workers dealing with difficult situations. (Department of Consumer Business & Services, Oregon OSHA, Elite Productions) 14 min. c1997

Violence In The Workplace, Part One (CC) (Non CC version see: V0789) V0523

Curlos Arauz, Personnel Director, City of Phoenix, covers the major "Steps for Prevention" of workplace violence, they are: Adopt strategies; Conduct training; and Utilize related programs to make sure you can deal with the issues of violence in the workplace. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 16 min. Safety Watch Series c1996

Violence In The Workplace, Part One (For Closed Captioned version see: V0523) V0789

Curlos Arauz, Personnel Director, City of Phoenix, covers the major "Steps for Prevention" of workplace violence, they are: strategies, training; and programs to address the issues of violence in the workplace. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 16 min. Safety Watch Series c1996

Violence In The Workplace, Part Two (CC) V0540

Curlos Arauz, Personnel Director for the City of Phoenix, continues covering "Steps for Prevention" of workplace violence. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 8 min. Safety Watch Series c1996

Walking & Working Surfaces: Watch Your Step! V0286

Outlines methods of personal fall protection and safe work practices for elevated surfaces. Complies with OSHA 1910.23-25; Bonus construction segment (1926.1050, 60); Set-up and use; Inspection and maintenance; Ramps, scaffolds & platforms. (Coastal Video Communications Corp.) 19 min. c1991

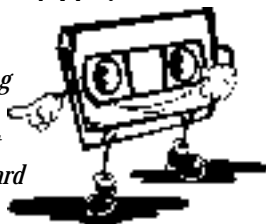

Warehouse Safety V0504

Focuses on careful use of industrial powered trucks and also shows tips for avoiding fire hazards and other hazards which may be found in warehouse settings. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1996

VIDEO TIP:

When returning videos, make sure that the shipping card is inserted with the video library address facing up.

Warehouse Safety: It's No Mystery (CC) V0773

Covers warehouse hazards and safety precautions including housekeeping, ladder safety, hazard communication, personal protective equipment, ergonomics, safe material handling, back safety, forklift safety, and loading dock safety. (Coastal Video Communications Corp.) 22 min. c1996

Warning Labels And Signs: Get The Message V0656

Identifies and defines various signs & tags. Describes HAZCOM, NFPA, HMIS, HAZMAT, SMARTRTK labeling systems. (Coastal Video Communications Corp.) 17 min. c1996

Washington Disasters: Are You Ready ? (CC) V0788

This video's intent is to motivate preparations before the emergency. Covers: •Earthquakes; •Fires; •Wind storms; •Winter storms; •Hazardous materials spills; •Volcanic eruptions; and •Flooding. (Family Protection Program Coordinator, Department of Community, Trade & Economic Development, Emergency Management Division) 80 min. c1994

Washington Give 'em a Brake V0868

Washington State Law regarding Flagger. Contains a clip of the Public Service Announcement for driver's awareness to safety throughout road construction zones. WORK ZONE SAFETY SERIES. (Washington State Department of Transportation; RXL Pulitzer) 9 min. Work Zone Safety Series c1995

Waste Minimization [Also available on V0403] V0405

Discusses ways to minimize waste by source reduction, by recycling, and by substituting non-hazardous or less hazardous materials for hazardous materials. Shows how to participate in this effort and the benefits from waste reduction. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 12 Segment 2 c1995

Watch That Dog! V0743

Explains basic protection and provides insight into the mannerisms of various types of dogs. Tells how to protect yourself from possible attack and injury. (Department of Consumer Business & Services, Oregon OSHA, Northwest Electric Light & Power Association, PGE, Pacificorp, and Idaho Power) 15 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes c1995

Way We Work: A User's Guide To Office Ergonomics And Body Mechanics V0169

Explains Cumulative Trauma Disorders; identifies risk factors of repetition, force and posture; and shows how to analyze and correct problems at the workstation. (Comprehensive Loss Management, Inc.) 18 min. c1991

Weathering The Storm: Disaster Planning V0435

Generic guidelines for various disasters: Floods - Hurricanes - Tornadoes - Earthquakes. Covers: planning, and preparation for human needs; security; update and revise the disaster plan regularly. (Coastal Video Communications Corp.) 13 min. c1994

Welding & Cutting Safety V0541

Wear the correct personal protective equipment (PPE) when involved in a welding/cutting operation. Know and understand the hazards associated with the materials with which you work. Read and review the Material Safety Data Sheets (MSDSs) associated with welding/cutting operations. Follow the protective measures and emergency procedures associated with these operations. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series c1996

Welding And Cutting [Also available on V0386] V0390

Points out the dangers specific to welding and cutting tasks which take place both in and outside of a welding shop. Shows essential PPE and other safety precautions for avoiding injuries. (Primedia Workplace Learning, Safety Watch) 8 min. c1994

Welding Hazards V0080

Details various hazards common to a welder's environment. Introduces basic precautions and describes the consequences if they are not followed. (Beacon Films) 11 min. Welding Safety Series c1986

Welding Safety V0170

Shows how to recognize hazards that accompany various welding work situations. The precautions and protective devices to safeguard the welder and others in the workplace are discussed. (Beacon Films) 11 min. Welding Safety Series c1986

Welding Safety V0219

Today welders use highly technical welding processes that can create dangerous conditions in the workplace. Shows: How to identify welding hazards; Evaluating hazards in the workplace; Workshop controls; Work practice controls; and Personal Protective Equipment. (Safetycare, Inc.) 16 min. Skills Education Series c1990

What Is Electricity? V0762

Prevent electrical incidents with this video designed to train both qualified and non-qualified employees. Covers: How electricity works; Associated hazards; Personal protective equipment; Fundamentals of grounding; Determining energized parts, Determining nominal voltage, Lockout & tagout procedures; Equipment start-up and operation; and Safe usage. (Summit Training Source, Inc.) 14 min. c1994

VIDEO TIP:

Yes, state employees still have to return videos by traceable shipper.

What The ISO Standards Mean To Safety Managers (CC) V0618

The International Organization for Standardization is a non-governmental organization that sets standards so that participating countries can count on materials, products, processes and services to meet a specified standard in the global market. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series c1997

What's Wrong With This Picture? (CC) (For non CC see: V0012) V0783

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. (Aurora Pictures) 17 min. c1989

What's Wrong With This Picture? (For Closed Captioned version see: V0783) V0012

Examples of incorrect and correct chemical safety procedures are re-enacted in a wide variety of work settings. Technical terms commonly found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations. For Closed Caption version see: V0783. (Aurora Pictures) 17 min. c1989

Wheel Of Misfortune. Grave Remarks V0545

In a game show format, "Wheel of Misfortune", serves to remind us that for every action there are a set of prescribed outcomes. "Grave Remarks" represents worst-case scenarios of losses and accidents...that lead to their final "resting places". Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series c1996

When Lightning Strikes V0331

Presents specific actions and precautions employees can take to avoid hazardous lightning and electrical storm conditions including lightning warning signals, conditions for lightning, safe and unsafe locations (outside, inside, vehicles); and emergency treatment for victims. (ERI Safety Videos) 14 min. c1992

When You Least Expect It! V0171

Stresses the basics of developing a defensive driving attitude, practicing defensive driving techniques and paying attention. Dramatic accidents are executed by professional stunt drivers from the Joie Chitwood Thrill Show. Motivates viewers to avoid distractions while driving. Narration by McLean Stevenson. (Aurora Pictures) 22 min. c1990

Whose Job Is It Anyway? V0102

Produced in Canada, this video shows a supervisor on a construction site where good housekeeping habits are ignored, and solutions for a safe workplace. (International Film Bureau Inc.) 12 min. c1988

Why Permits Are Important [Also available on V0386] V0388

Two co-workers show the importance of the team effort in entering and working in confined spaces. Stresses the significance of the attendant's role and the need for concentration and reliability on the part of both the worker within the confined space and the attendant who "signs on" the job when signing the permit. (Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 9 Segment 2 c1994

Why Star Quality V0828

Hosted by former ABC Anchor Steve Bell. An intensive overview of OSHA's Voluntary Protection Programs. Covers all elements of VPP: •Management Leadership, Employee Involvement, •Hazard Recognition and control, and •Safety and Health Training, as well as a full perspective about the value of VPP and its impact on industry and government. Helps you and your employees understand the VPP process from start to ceremony or be used to re-introduce employees to the VPP during the rectification process. (Voluntary Protection Programs Participants' Association, Inc.; VPPPA) 45 min. c1998

Winter Driving V0594

Teaches driver training techniques for utility and straight truck drivers. Uses computer animation and live video sequences to illustrate loss of control situations. Covers winter driving techniques and preparation of vehicles for winter travel. (Visionquest Films) 18 min. c1995

Winter Driving Tactics V0036

Winter drivers in Minnesota are used as examples in dangerous driving situations. Techniques for handling a skid, use of snow tires, and adjusting to different driving conditions are shown. (AIMS Media) 16 min. c1975

Winter Driving Tactics (2nd edition) V0045

Winter driving experts from Anchorage, Alaska show techniques for handling a skid, using snow tires, and adjusting driving habits. Also shows how to winterize cars and what items to stock in the trunk for emergencies. (AIMS Media) 14 min. c1985

Winter Driving Update V0179

The safe methods for driving safely in snow and ice are demonstrated. The importance of being prepared in the event of a breakdown is emphasized. (AIMS Media) 15 min. c1991

Winter Safety V0391

Details how workers can protect themselves from the hazards of winter while outdoors and on the road. Covers: Signs of hypothermia and frostbite; Treatment; and Off-the-job winter safety. (Coastal Video Communications Corp.) 14 min. c1993

With All Due Respect (CC) V0855

Designed to promote a respectful workplace, this program is for all employees. Through a variety of scenarios it gives a good overview of all types of sexual harassment with brief coverage of diversity and other forms of harassment. Gives guidance on intervention / resolution strategies. (American Training Resources, Inc.) 20 min. c2000

Without Power: How to Understand and Cope with Electric Outages V0859

Describes the electrical distribution system to businesses and homes. Gives suggestions for disaster preparedness measures in case of a power shutdown. (Washington Water Power) 19 min. * Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1997

Work Surface Safety (CC) [Also available on V0474] V0475

Everyday housekeeping is important to work surface safety. Keep work surface areas clear of obstructions. Clean up spills quickly and post appropriate warnings. Objects that do

not belong on the floor can contribute to falls and injuries. It is your job to monitor and keep the work surface clean and clear. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 6 min. c1995

Workers' Compensation Fraud (CC) V0619

Elaborates on workers' compensation costs, compensation insurance premiums, and indirect costs involved with worker injuries. (Primedia Workplace Learning, Safety Watch) 13 min. Safety Watch Series c1997

Workers Exposed (Avoiding Exposure To Infectious Diseases In The Workplace) V0262

Focuses exclusively on non-medical settings where school workers, building maintenance and janitorial personnel, and hotel housekeepers may come into contact with bloodborne infectious disease transmitting situations and/or implements. Washington HIV/AIDS Hotline: 1-800-272-2437 / National AIDS Hotline: 1-800-342 2437. (Department of Insurance and Finance, Oregon Occupational Safety and Health Division) 11 min. c1993

Working Back: A Guide For Municipal Workers V0140

A guide to back care, with specific focus on work situations faced by municipal workers. Two previously-injured workers share their experiences, while five individual segments address potential back injury hazards. (Workers' Compensation Board of British Columbia) 24 min. c1990

Working In Confined Spaces [Also available on V0378] V0343

Describes the types of atmospheres which can threaten human life in a confined space and outlines steps to be followed before and during entry into a confined space. Defines the role of the attendant and stresses the importance of this role. Suggested to supplement or as refresher training

(Primedia Workplace Learning, Safety Watch) 9 min. Safety Watch Series Vol. 1, no. 1 Segment 1 c1994

Working Safely With Electricity. Part Four: Emergency Response V0444

Describes emergency response for electrical shock. Emphasizes the importance of a medical examination even if an electrical injury seems minor. Shows the hazards created by a fire emergency. Examines different types of fire extinguishers. (Bergwall Productions Inc.) 16 min. c1992

VIDEO TIP:

What is the "only you" rule?

Don't loan out videos to others.

Working Safely With Electricity. Part One: Electricity Can Kill V0441

Details what happens when current flows through the body. Explains the disruption of the body's internal electrical system. Shows physical symptoms associated with electric shock. (Bergwall Productions Inc.) 18 min. c1992

Working Safely With Electricity. Part Three: The Importance Of Grounding V0443

Defines grounding. Explains proper grounding and the color-code system of identifying electrical wires. Describes ground fault circuit interrupters. Demonstrates use of multimeter - solenoid-type tester. Introduces Lockout/Tagout procedures. (Bergwall Productions Inc.) 15 min. c1992

Working Safely With Electricity. Part Two: The Shock Emergency V0442

Explains the danger of such common practices as locating a hot wire by touch and engaging in horseplay in the work area. Describes the appropriate dress for working with electricity. Emphasizes the importance of maintaining a safe environment. Examines generation/transmission of electrical energy. (Bergwall Productions Inc.) 14 min. c1992

Working Safely With Pesticides V0248

Covers material safety data sheets (MSDS) and their use, pesticide labels, personal protective equipment, container disposal, storing pesticides, poisoning symptoms, and how to handle accidents. (University of Arizona, Cooperative Extension College of Agriculture) 18 min. c1989

Working Safely With Radiation: Fundamentals Of Ionizing Radiation Protection V0595

Basic orientation for laboratory and other technical personnel who will be working with or around radiation sources on the job. Covers the biological effects of radiation, monitoring and dosimetry, techniques for limiting personal exposure, special considerations for pregnant workers, and regulations. (Business Training Systems Inc.) 19 min. c1995

Working Smarter - Not Harder: Ergonomics In Agriculture (English Version) V0801

Alerts agriculture workers to the hazards of injury from repetitive tasks. Focuses on stretching exercises for hand, wrist, arm, shoulder, neck and legs to improve flexibility. Gives solutions to minimize stress and strain on various body parts. Demonstrates correct work practices. (Department of Consumer Business & Services, Oregon OSHA, Oregon Association of Nurserymen, Inc.) 16 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. c1998

Working Together For Safety V0596

Explains the relationship between unsafe acts and accidents. Covers a variety of typical safety topics such as personal protective equipment, lockout/tagout, hazard communication, inspections, rules and procedures, accident reporting, protective devices, control measures, accidents and emergencies. (Business Training Systems Inc.) 19 min. c1996

Working With Display Screen Equipment V0276

Details on the following points: Basic Ergonomics; Layout and Working Environment; Common Hazards; Musculoskeletal problems, Visual fatigue, and Stress. (Safetycare, Inc.) 17 min. c1993

Working With Lead Exposure In Construction And General Industry V0258

Meets the General Industrial Standard & Interim Final Rule for Construction. Describes measurement concepts (PEL, TWA, Action Levels); exposure assessment; monitoring; methods of compliance; hygiene and housekeeping; and medical surveillance. (Long Island Productions) 15 min. c1993

VIDEO TIP:

*The best time to order summer videos
is in December and the best time to
order winter videos is in June.*

Workplace Ergonomics: A Better Way to Work V0559

Employee education. Covers four common cumulative trauma disorders, causes, and early symptoms and steps to take to minimize the risk factors associated with cumulative

trauma disorders. (Primedia Workplace Learning, Industrial Training Systems Corporation) 18 min. c2000

Workplace Security [Also available on V0464] V0467

A Safety Watch video with an entertainment tone, this program demonstrates reasons for establishing security policies such as protecting unauthorized people from safety hazards they may not be aware of, protecting employees from dangerous people, and protecting trade secrets. Suggested to supplement or as refresher training. (Primedia Workplace Learning, Safety Watch) 11 min. Safety Watch Series Vol. 2, no. 6 Segment 3 c1995

Workplace Stress V0659

Teaches your employees to understand stress and manage it effectively. Covers: physical symptoms and long term effects of stress, eliminating causes of stress and avoiding stress overload. How to manage stress with relaxation, stretching, exercise, power of good attitudes and positive lifestyles. (Long Island Productions) 13 min. c1994

Workplace Stress [Similar to V0659] V0184

Shows employees the powerful force of stress and its causes. Teaches how to control, eliminate stress factors, and how to relieve stress through simple exercises. (International Film Bureau Inc.) 15 min. c1992

Workplace Violence (CC) V0908

Designed to make employees more aware of the issues related to on-the-job violence, to encourage reporting threats or violence observed or experienced, to motivate respectful treatment to co workers and customers, and techniques to protect oneself. Deals more with internal interaction than with external customer service. Has a variety of scenarios. (R M Distributors) 26 min. 1994

Workplace Violence [Also available on V0412] V0411

Provides statistics on violence occurring in the workplace, revealing that robbery is the most common form of workplace violence. Identifies high-risk occupations (retail, hotel, hospital, taxi drivers) and gives tips for recognizing potentially violent behavior in situations involving external customers. Also describes warning signals of potential internal violence in situations involving company personnel. (Primedia Workplace Learning, Safety Watch) 10 min. Safety Watch Series Vol. 2, no. 1 Segment 4 c1995

Workplace Violence : First Line Of Defense (CC) V0277

Uses an interview with a convicted perpetrator as well as a compelling dramatization to communicate the impact of this problem, creates awareness of the warning signs, examines the legal issues in dealing with these individuals, and outlines steps to manage these situations. Shows how to protect employees through a managed organizational response. (Video Training Inc.) 30 min. c1994

Workplace Violence: Recognizing And Defusing Aggressive Behavior V0633

Familiarizes supervisors and managers with the warning signs of dysfunctional behavior that can lead to violence. Teaches intervention techniques for supervisors to approach troubled employees. Suggests techniques and tactics for defusing immediate threats of violence. (R M Distributors) 26 min. c1994

Workplace Violence: The Calm Before The Storm (CC) V0335

This program helps supervisors and employees prevent workplace violence by identifying the warning signs. Features author/expert Joseph A. Kinney interviewing a victim of workplace violence. Covers: characteristics of a potentially violent employee; establishing a violence prevention program; stress management, conflict resolution; hiring and firing; and response. Does not give intervention techniques. (Coastal Video Communications Corp.) 25 min. c1994

Your Back At Work V0095

Various ways of lifting and carrying objects are shown. Includes tips on shoveling and on exercises to improve back strength. (Coastal Video Communications Corp.) 18 min. c1988

Your Eyes Are Different: A New Approach To Eye Safety V0458

A program in four parts on eye protection. Part 1: Why Your Eyes Are Different; Part 2: Eye Protection Works; Part 3: Procedures and Controls; and Part 4: First Aid. (29 CFR 1910.133) (CoreMedia Training Solutions) 16 min. c1994

Your House In Order? V0041

A vintage safety video. This general housekeeping video shows many injuries and accidents can be attributed to untidiness or sloppy work habits. Shows incidents in factories, machine shops, warehouses, commercial kitchen, and in other settings. Some code violations in PPE. (International Film Bureau Inc.) 18 min. c1979

Your Right To Know V0145

Discusses safety practices in measuring airborne contaminants; flammables and flammables; evaluating hazards and prescribing operational controls. Covers: Chemicals, toxins; airborne contaminants; vapors and compressed gases. Stresses the importance of the Chemical Hazard Communication Plan, the departmental chemical list, MSDS (Materials Safety Data Sheets), the information and training program and the importance of reading the labels on all chemicals. (Westcom Productions) 24 min. c1985

Your Safety In The Fruit Packing Plant (English Version) V0745

For fruit packing employees. Covers health and safety measures to reduce the number of on-the-job accidents, injuries, and reduce time lost from work. Ensures continuity of training among fruit growers and assures that each employee understands the hazards and risks of his/her job. Emphasizes safety procedures and individual responsibility in

the prevention of accidents and injuries in the workplace. (Department of Consumer Business & Services, Oregon OSHA, Fruit Growers League of Jackson County) 10 min. *Permission is granted to duplicate this tape in its entirety only for non commercial purposes. 199u

Your Work: Keepin' It Safe (Young Worker / Power Project) V0920

Designed to teach teens about hazards they may experience at work; the importance of working with their co-workers and supervisors to prevent injuries and illnesses, their rights to a safe and healthful workplace, to be free from sexual harassment and protections under child labor laws in California. (UCLA Labor Occupational Safety & Health Program) 12 min. 1997

VIDEO TIP:

Remember the 5-5 Rule.

You may check out five videos for five days.

You're In Control V0213

Motivates people to drive only when they are in good physical and mental condition. Explains "Cool Down" strategies for recognizing and dealing with mental and emotional distractions such as anger and anxiety; demonstrates how alcohol affects driving performance; and reinforces safety belt usage. (Visucom Productions, Inc.) 17 min. It's No Accident Series c1992

*Admission fees, collections, or donations
may not be charged when videos
are shown.*

Intended for the teen audience. However, parents of teens should also view this video's drama of teens getting caught with alcohol in the car and the legal and financial consequences. (Washington Traffic Safety Commission) 11 min. 1999

Safety & Health Video Library Agreement Form

Please read and fill out this form to open your account and receive your borrower number

1. Copyrighted materials are loaned subject to the condition that **any form of duplication is strictly prohibited** in accordance with Title 17 of the United States Code of Federal Regulations. Unauthorized duplication of copyrighted materials will result in immediate cancellation of borrowing privileges.
2. **Materials are loaned for a period of five working days.** When videos are borrowed, the shipping label has the return date printed on it. This is the date the videos must leave your office. Three late returns will result in immediate cancellation of borrowing privileges.
3. **Borrower accounts are established by individuals.** There is no limit to accounts per business. However, a borrower may not loan materials to any person. Example of prohibited loans: consultant to client; corporate office to corporate office.
4. **The borrower is responsible for any loss or damage** of library materials, including video and shipping cases, and agrees to pay full replacement costs for any items lost or damaged during the loan period.
5. **The borrower is responsible for the cost of return shipping** Unless programs are hand-delivered by the borrower, return shipping must be through a **TRACEABLE SHIPPING SERVICE** e.g. *United Parcel Service, Federal Express* or *Certified Mail*. Return by untraceable means will result in borrower liability in the event of loss or damage.
6. **Thurston County users are required to pick up and return materials to the Safety & Health Video Library in Tumwater.**

I have read and understand these rules and policies. As a condition of my participation in the Washington State Department of Labor & Industries, Safety and Health Video Library, I agree to comply with them. I have kept a copy of this agreement for my records and returned the original to the Video Library.
